

THE WALLIS

AMERICA'S FOREMOST TRACTOR

Farm Power in Simplest Form—A simple, dependable machine requiring least repair and adjustment is the most economical and easiest to handle—thus it is the one that is becoming the leader in the tractor field.

The Wallis is 12 years old and has stood the test of time. It has been tried on thousands of farms all over the world. It is sold by a company established half a century—known for its integrity and square business dealings.

When considering the cost of a tractor don't overlook these important points—FUEL, LUBRICATION, UPKEEP, SPEED, WEIGHT, DURABILITY, POWER, ASSESSIBILITY and SIMPLICITY. The principal element is the life of the tractor, plus the upkeep during its life.

The Actuelle

Greater than the Phonograph

Different in construction Superior in tone Actual in reproduction

THE ACTUELLE—a Pathe Freres invention—marks the first really radical advance in the science of sound reproduction since sound recording was invented.

The result achieved is a natural purity of tone which would have been beyond belief less than twelve months ago.

Now comes the real revolutionary advance—and again it is the Pathe organization that has won out—with the Actuelle.

Exit Sound Box, Tone Arm, Horn

The problem of the tone obitacials which affect the reproduction in a lesser way. The tone box, the tone arm, the tone chamber and horn are in the way. The ACTUELLE discards all the obstacles. A taunt wire carries the tone direct from the record to a parchment cone which amplifies and reproduces the tone in its natural, vivid vigor, with a full fidelity that no phonograph could ever equal.

Come in and hear this wonderful instrument play your favorite records. We will be pleased to have you call.
