The Actuelle
Greater than the Phonograph
Different in construction
Superior in tone
Actual in reproduction

THE ACTUELLE—a Pathe Freres invention—marks the first really radical advance in the science of sound reproduction since sound recording was invented. The result achieved is a natural purity of tone which would have been beyond belief less than twelve months ago. Now comes the real revolutionary advance—and again it is the Pathe organization that has won out—with the Actuelle.

Exit Sound Box, Tone Arm, Horn

The problem of the phonograph maker is to take out of the way of the tone obstructions which affect the reproduction in a lesser way. The tone box, the tone arm, the tone chamber and horn are in the way. The ACTUELLE discards all the obstacles. A taut wire carries the tone direct from the record to a parchment cone which amplifies and reproduces the tone in its natural, vivid vigor, with a full fidelity that no phonograph could ever equal.

Come in and hear this wonderful instrument play your favorite records. We will be pleased to have you call.
