FLORENCE OIL COOK STOVES

**Comfort,
Economy
and
Efficiency**

COMFORT—for it means a cool kitchen. **Economy**—for it wastes no fuel. You burn kerosene oil only when you need it. **Efficiency**—for a Florence Oil Stove is easy and quick of operation and every bit of heat is concentrated close under the cooking.

Come in and let our salesmen show its many good points.

Will be Given Military Funeral

The remains of Charles Johnson, son of S. H. Johnson, living in Catherton Township, who was killed in action in the big drive at Chateau Thierry in the fall of 1918 arrived in Hoboken, N. J. this week and will be brought home for burial. The funeral services will be held Sunday July 31st, at 2:30 o'clock p. m. at the new Virginia church. Rev. Hill assisted by Rev. Schofield will conduct the services and the American Legion Post of this city will have charge at the grave.

After his departure with a large number of others from this county in September 1917, they were to Camp Funston, received his military training. In the spring of 1918 he together with several of his comrades were sent east where they joined the fourth regiment of infantry and went across where he sacrificed his life for his country on the battle field.

Carl McArthur Sells Out

Carl McArthur who has been conducting the Exide Battery Station in the Farmers Union Store Building for the past two years has sold his business to Bernard Burden who recently returned from Washington, D. C. where he has been attending an Electrical College and has had five or six years in the electrical field. Mr. Burden has moved the station to the room over this office where he will continue to handle the Exide Batteries and likewise repair them. He has purchased additional apparatus and will be fully prepared to handle repairs for electric motors and generators.

Since establishing the business Mr. McArthur has gained the confidence of a large number of friends and patrons who are indeed surprised to learn of him disposing of the business. He has made no definite plans for the future. The Chief along with the business men welcome Mr. Burden to our business circle and hope he will make his business as successful as his predecessor.

Ends Life by Taking Poison

James N. Morrison, a man about sixty years of age who appeared to have seen many of the hardships to which the early settlers in the west were subjected, arrived in this city Monday from Colorado where he has resided for many years, and was found in his bed in a dying condition about 2:00 o'clock Tuesday morning, and passed away five minutes later.

Mr. Morrison has lived at Woodland Park, Idaho Springs, Boulder and Denver, in Colorado. He was perfectly rational and conversed freely on various topics of the day before retiring incidentally asking if three grains of strychnine would cause death if taken by a human being explaining that he had administered one grain to a dog with disastrous effects. Dr. Stockman was immediately summoned when the deceased was found in convulsions calling for help but death claimed its victim before any treatment could avail. All the symptoms, and the horrible manner in which he died indicated strychnine poisoning. A search of his effects disclosed the fact that he had spent his last cent for a room and a bottle of soda water which he purchased just before his death.

A letter was found in his pocket addressed to his sister, Mrs. Martha Lampman, of Mapleton, Iowa, in which he stated that he had just arrived in Red Cloud from Denver and that he would be here about ten days, and suggested that if she would write him he might go there and visit her. In his conversation the evening of his death he said he had been a resident of Red Cloud in the early days, coming here in 1877.

The remains were taken in charge by the Amack mortuary and an inquest held Wednesday afternoon, the jury deciding that the evidence indicated that the old gentleman having become despondent had met death at his own hands. A telegram from the sister asks that the remains be held until further instructions.

COUNTY COMMISSIONERS HOLD SHORT SESSION

Red Cloud, July 18 1921
The County Board of Commissioners met at 1 o'clock P. M. as per adjournment of July 8th with all members present.

In the matter of Mrs. Eva L. Dickerson of Guide Rock who in giving in her personal assessment for 1920 gave in \$2,000 in Bonds which were not subject to taxation. This being an enormous assessment a motion was made and carried that the county Treasurer be instructed to refund to Mrs. Dickerson the excess tax paid by her out of the funds of School Dist. No 1 Village of Guide Rock and Webster County Funds. No refunds to be made of State Tax as same has already been paid into the estate.

The following claims were audited and allowed and County Clerk instructed to draw warrants on the proper funds in payment of same.

B. F. PERRY, County Clerk.

Married at Hastings

Word was received in the city this morning announcing the marriage of Miss Vera Hatfield, daughter of Mr. and Mrs. Bert Hatfield of this city, to Mr. Harold Gilbert, son of Mr. and Mrs. Ed Gilbert. The event occurred at Hastings last night. The bride for the past few months has been employed as stenographer by a law firm in Hastings while the young man of her choice graduated from our High School this year. The young couple's many friends are surprised to hear of their wedding but unite in wishing them much joy and happiness.

Mr. and Mrs. Boone Saunders and children of Billings, Montana arrived in the city Sunday evening to visit her brother, Harvey Rickerason and family.

Are you fair to your watch?

An automobile needs frequent attention. What about your watch—a mechanism infinitely more delicate?

CARBON in the motor of a car will decrease the running efficiency of that car. And yet the carbon will accumulate. The car owner, knowing this, has his car frequently overhauled—and the carbon removed.

And yet this same man, perhaps, will allow his watch, a mechanism infinitely more delicate, to run for years without attention. All the while it is accumulating dust—for tiny dirt particles will sift in through the most tightly fitting case—and this will in time impede the timekeeping performance of the watch.

Your automobile performs occasional service, but your watch has to run continuously for a full twenty-four hours each day. Look at your watch. How long has it been since you took it to a jeweler for examination?

If your watch is to run at its highest efficiency, it should be cleaned, oiled and adjusted at least once a year—before the last particle of oil has disappeared from the bearings.

Our Service Department is well equipped to make any repairs and adjustments that may be necessary.

And while you are in, we particularly invite you to view our very complete stock of new watches dressed in attractive Wadsworth Cases.
