**INCOME TAX FACTS**

In making out his income tax return for 1921, the average taxpayer will find a considerable saving in comparison with the amount of tax paid on the same income for 1920.

The exemptions provided by the revenue act of 1921 are \$1,000 for single persons (the term including widows, widowers, divorcees, and persons separated from husband and wife by mutual agreement), \$2,500 for married persons whose net income was \$5,000 or less and \$2,000 for married persons whose net income was \$5,000 or more. Under the revenue act of 1918 the personal exemption allowed a married person was \$2,000, regardless of the amount of net income. The personal exemption allowed a married person applies also to the head of a family, man or woman who supports in one household one or more relatives by blood, marriage, or adoption.

The exemptions for dependents—a person who receives his chief support from the taxpayer and who is under 18 years of age or incapable of self-support because mentally or physically defective—is increased from \$200 to \$400.

The act requires that a return be filed by every single person whose net income for 1921 was \$1,000 or more, every married person whose net income was \$2,000 or more and by every person—single or married—whose gross income was \$5,000 or more.

The requirement to file a return of gross income of \$5,000 or more regardless of net income is a new provision. Net income is gross income less certain specified deductions for business expenses, losses, bad debts, etc., which are fully explained on the forms.

Returns must be filed by married couples whose combined net income for 1921, including that of dependent minor children, equaled or exceeded \$2,000 or if the combined gross income equaled or exceeded \$5,000.

The period for filing returns is from January 1 to March 15, 1922. Heavy penalties are provided for failure or "willful refusal" to file a return on time.

Forms 1040A for incomes of \$5,000 and less and 1040 for incomes in excess of \$5,000 may be obtained from the offices of collectors of internal revenue and branch offices. The tax may be paid in full at the time of filing the return, or in four equal installments, due on or before March 15, June 15, September 15 and December 15.

**His Ailment Diagnosed.**

"Water!" yelled the fervent orator. "Aqua, aqua!" he shouted, lapsing into Latin, his mother tongue. "Aqua pura! The greatest gift of Nature to thirsty man! What would the ocean be without water? Answer me that? What?"

That question had never struck his audience before. They pondered in silence.

"Water!" cried the orator again. "What would Niagara falls be without water?"

Another stupendous question. His audience stirred restlessly; his arguments were too much for them.

"Of what use," screamed the speaker, "would our bathtubs be without clean, beautiful water?"

As one man the audience turned and left the hall, perhaps to consider outside the orator's brainy conundrums. But one ignorant fellow said to another:

"That man has water on the brain!"

—Houston Post.

**The Shapes of Eggs.**

An expert recently entertained the Zoological society of London with a mathematical discussion of the differences in the shape of eggs. A few eggs, like those of the owl and the tortoise, are spherical or nearly so; a few, like the grebe's or the cormorant's are elliptical, with symmetrical ends; the great majority, like the hen's, are ovoid, or blunter at one end than at the other.

The hen's eggs are always laid blunt end foremost. Eggs which are the most unsymmetrical are also eggs of large size relatively to the parent birds. The yolks of eggs are spherical, whatever the form of the entire egg may be. This is shown to be due to their being enclosed in a fluid, the "white," which makes the pressure everywhere on the surface of the yolk practically constant.

**Safety First.**

Varlet—I prithee haste, sir knight, to the rescue of a lady imprisoned in yonder town by a wicked ogre.

Knight—Oh, bother! This is my day off. Why don't you go and save her yourself?

Varlet—She is my wife, sir knight, and she refuses to allow me to engage in so perilous an enterprise.—Punch.

**Nine Most Useful Words.**

Nine words, declares a philologist, do one-fourth of the work of our written and spoken English language, and thirty-four words one-half. The nine most useful words are stated to be: And, be, have, it, of, the, to, will, you.

**Change Your Key.**

The fellow who is always harping on one string soon gets out of tune with the world.—Boston Transcript.
