Queer Bird Friendship.
I am deeply interested in watching the strange companionship of one of the largest black and white woodpeckers with red crown I have ever seen and a sparrow. For two weeks they have been about the yard constantly together and seem to be the very best of friends. In front of the window where I am writing they spend a great deal of their time in a dead horse-chestnut tree. Near the top of one of the trunks is a very large hole. While Mr. Woodpecker goes in to find some delicacy, Lady Sparrow flies about the top chirping merrily. By their actions when Mr. Woodpecker comes out he must drop a "goodie" down Lady Sparrow's throat. I have never seen his mate around or any other sparrow when they are together. Just these two, who are so different in every way and still seem to be such good friends. Wherever he goes she follows, always flying about the tree where he is working.—Exchange.

His Incorrect Diagnosis.
He was not a regular traveling man, or the break he made at a little Missouri hotel never would have occurred. The waitress limped up to him with the graceful gait of a crippled duck, and said:
"Steak pork chops ham an eggs an cole-meats."
Not hearing anything in the tele-scoped sentence that appealed to his city-bred appetite, and not realizing the limitations of the hotel, he looked up and asked:
"Have you got frogs' legs?"
"Nah!" said the waitress, indignantly. "Roomatiz!"—Chicago News.

"On Himself."
A house painter in a New Hampshire village was proceeding down "the main street" one day when he was accosted by a fellow townsman.
"Hello, Tom!" called the latter.
"Why, I thought you were working on old Spinner's house to-day."
"I was about to commence the job," said the painter, "when the old man picked a quarrel with me. He said he'd put the paint on himself."
"Do you think he'll do it?"
"Well," said the painter, with a smile, "when I passed just now, that is where he had put a great deal of it."

A Master Stroke of Typewriter Invention

New Oliver Automatic Tabulator, a Twin Improvement to the Oliver Ruling Device.

Just a simple, clean-cut mechanism for tabulating—operated by a single key. Yet that single key unlocks scores of doors to added typewriter convenience. It does away with the brain tension of tabulating. The movements of carriage are controlled by unseen fingers. The tabulator works automatically with unvarying accuracy. Equipped with its new Automatic Tabulator, which can be operated in connection with the Oliver Line Ruling Device, the Oliver's sphere of usefulness is unlimited.

In the work of writing and ruling Statistical reports, Invoices, Statements, Inventories, etc.—Listing Checks, Deposit Slips, Cash Items, Vouchers, cash and credit sales, Trial Balances, Pay Rolls, Cost Records and scores of similar tabulated records, Oliver No. 5 has no equal. It is the only machine that covers the whole broad field of modern commercial work in a satisfactory way.

The Oliver Automatic Tabulator is an integral part of every new machine—furnished without a cent of additional charge. It caps the climax of a long series of improvements given to the world in the magnificent new Oliver No. 5. Each of these remarkable innovations—the Oliver Tabulator and the Oliver Ruling Device—supplements the other.

Together they form a combination of untold value in all branches of commercial accounting. The Oliver Typewriter is first of all a correspondence machine—supreme in splendid service. It makes work a pleasure by providing automatic means of spacing, tabulating, ruling, indicating exact printing point, securing proper register, etc. The saving of time, of mental calculation, of manipulation, of extra attention and of eye strain is an incalculable benefit to the operator. And the gain in volume of work well done—without extra operative effort—means much to every employer. Write for the new Oliver Catalog—or better still—ask the nearest Oliver Agent for a demonstration of Model No. 5.
