The Cause of Many Sudden Deaths. There is a disease prevailing in this country most dangerous because so deceptive. Many sudden deaths are caused by heart failure or apoplexy are often the result of kidney disease. If kidney trouble is allowed to advance the kidney-poisoned blood will attack the vital organs, causing catarrh of the bladder, or the kidneys themselves break down and waste away cell by cell. Bladder troubles almost always result from a derangement of the kidneys, and a cure is obtained quickest by a proper treatment of the kidneys.
