 Good Results of Prohibition Law Enforcement in Kansas.
 In view of the claims made by representatives of the liquor interests in the United States that prohibition in the state of Kansas has not proved a success during its regime of the past twenty years, the statements made public recently by Attorney-General Trickett in an address delivered at Little Rock, Ark., are of special interest.
 "You neighboring state, Illinois," he stated, "is the garden state of the nation with a rich soil and abundant rain, as a natural advantage to make it a state of great wealth. Go out along the prairies and consider the state of Kansas, a state one-half of whose territory was formerly known as the Great American Desert. It is the home of the cyclone, the grasshopper and the drought. We are about one-half as old as that great state of Illinois, but we have had no licensed saloons for twenty years, while they have had high license."
 "I say that to-day the people of poor cyclone-stricken Kansas, have more money per capita on deposit in the banks than have the people of the great state of Illinois."
 "Again, let me compare Maine with the great state of Ohio. Maine, they say in 1855, when it adopted prohibition was the most drunken and poorest state in the nation. Ohio was a rich state. In fifty years of prohibition Maine has organized and has to-day more banks and has \$22,000,000 more on deposit in those banks than has the wide open state of Ohio with six times her population."
 "The statement is sometimes made that prohibition does not prohibit in Kansas, that it does not lessen drinking. I present you a statement made by the governor of the state of Kansas recently and published over his signature. Of the 106 counties in Kansas only twenty-one have any paupers. Only twenty-five have poor houses. Thirty-five have their jails absolutely empty. Thirty-seven have no criminal cases pending upon the dockets of their courts. There is no county in Illinois which can make statements similar to this last. Kansas has the smallest number of paupers of all the states in the union. Kansas spends more money for education in proportion to population, than any other state in the nation—poor old Prohibition Kansas!"

most useful in the treatment of scalp and hair diseases. Glycerine acts as a stimulant to the hair bulbs, and has a soothing, healing and nourishing influence. Alcohol is indispensable in medicine because of its antiseptic, stimulating and preservative qualities.
 We want every one who has scalp or hair trouble to try Rexall "93" Hair Tonic, which contains all these ingredients. If it does not give you complete satisfaction in every particular, we will return every penny you paid us for it, for the mere asking and without question or formality.
 Of course you understand that when we say that Rexall "93" Hair Tonic will grow hair we do not refer to cases where the roots are entirely dead, the pores of the scalp closed, and the head has the shiny appearance of a billiard ball. In cases like this there is no hope. In all other cases of baldness Rexall "93" Hair Tonic will grow hair, or cost the user nothing. Two sizes, 50 cents and \$1.00. Remember you can obtain Rexall Remedies in Red Cloud only at our store, The Rexall Store, The H. E. Grice Drug Co.

Microbes in the Scalp
 The Latest Explanation is that Microbes Cause Baldness

Professor Unna of Hamburg, Germany, and Dr. Sabourand, of Paris, France, share the honor of having discovered the hair microbe.
 Baldness is not caused through a few weeks' work of these hair microbes, but is the result of conditions brought about by their presence. Baldness may not occur until years after the microbes began work, but it is certain to come sooner or later.
 The microbes cut off the blood supply. They feed on the fatty matter about the roots of the hair, through which the blood is absorbed. Finally the fatty matter is consumed, the food supply of the hair is gone and it starves and finally dies.
 Resorcin is one of the most effective germ destroyers ever discovered. Beta Naphthol is a most powerful, yet absolutely safe germicide and antiseptic, which prevents development of germ matter, and creates a clean, healthy condition.
 Pilocarpine, although not a coloring matter or dye, is an ingredient well established for its power to restore natural color to human hair when loss of color has been caused by a disease.
 Borax, because of its well-defined softening and cleansing properties, is
