

\$3.50 RECIPE CURES WEAK KIDNEYS, FREE

RELIEVES URINARY AND KIDNEY TROUBLES, BACKACHE, STRAINING, SWELLING, ETC.

Stops Pain in the Bladder, Kidneys and Back.

Wouldn't it be nice within a week or so to begin to say goodbye forever to the scalding, dribbling, straining, or too frequent passage of urine; the fore-head and the back-of-the-head aches; the stitches and pains in the back; the growing muscle weakness; spots before the eyes; yellow skin; sluggish bowels; swollen eyelids or ankles; leg cramps; unnatural short breath; sleeplessness and the despondency?

I have a recipe for these troubles that you can depend on, and if you want to make a quick recovery, you ought to write and get a copy of it. Many a doctor would charge you \$2.50 just for writing this prescription, but I have it and will be glad to send it to you entirely free. Just drop me a line like this: Dr. A. E. Robinson, K-259 Luck Building, Detroit, Mich., and I will send it by return mail in a plain envelope. As you will see when you get it, this recipe contains only pure, harmless remedies, but it has great healing and pain-conquering power.

It will quickly show you its power once you use it, so I think you had better see what it is without delay. I will send you a copy free—you can use it and cure yourself at home.

HIS WAY OUT OF IT.

Prospective Tenant (noticing several inches of water in the cellar)—My, this cellar leaks.

Landlord—it don't leak a drop. That water has been in here for two months and not a single drop has escaped.

"How Sharper Than Serpent's Tooth." An irritable old farmer and his ungainly, slouching son were busy grubbing sprouts one hot, sultry day, when the old man suddenly stumbled over a small stump.

"Gosh darn that everlasting stump!" he exclaimed. "I wish it was in hell!"

The son slowly straightened up from his work and gazed reproachfully at his father.

"Why, you oughtn't to say that, pap," he drawled. "You might stumble over that stump again some day."—Everybody's.

The Right Spirit.

Appropos of Valentine's day, a passenger on the Bermuda said:

"Mark Twain once told us, in a little Valentine day speech on this boat, of an Irish wooer who had the right Valentine spirit. Acceptance or rejection he could take with equal grace.

"Will ye be my valentine?" he said, on February 14, to the girl he loved.

"No," she replied; "I am another's."

"He heaved a sigh and said:

"Sure, thin, darlin', I wish ye was twins, so that I could have at last the half of ye!"

Cold Meat.

Mrs. Bacon.—They say these cold-storage houses are responsible for the high price of meat.

Mr. Bacon.—Is that so? Well, I hope we'll have no more cold meat for lunch, then.—Yonkers Statesman.

Hope is a fine thing, but it doesn't always enable a man to deliver the goods.

A LITTLE THING Changes the Home Feeling.

Coffee blots out the sunshine from many a home by making the mother, or some other member of the household, dyspeptic, nervous and irritable. There are thousands of cases where the proof is absolutely undeniable. Here is one.

A Wis. mother writes: "I was taught to drink coffee at an early age, and also at an early age became a victim to headaches, and as I grew to womanhood these headaches became a part of me, as I was scarcely ever free from them.

"About five years ago a friend urged me to try Postum. I made the trial and the result was so satisfactory that we have used it ever since.

"My husband and little daughter were subject to bilious attacks, but they have both been entirely free from them since we began using Postum instead of coffee. I no longer have headaches and my health is perfect."

If some of these tired, nervous, irritable women would only leave off coffee absolutely and try Postum they would find a wonderful change in their life. It would then be filled with sunshine and happiness rather than weariness and discontent. And think what an effect it would have on the family, for the mood of the mother is largely responsible for the temper of the children.

Read "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

FARM GARDEN

FARM NOTES.

God hard oil makes an easy running wagon.

A portable forge is a time and money saver.

Arrange so the chips do not fly all over the yard when chopping wood.

Do up the repair work, especially the blacksmithing, before the opening of spring's work.

An empty post-hole is but one degree less dangerous to life and limb than an open, unprotected well. Fill it up.

When the hoops come off barrels, hoop them with wire. Cheaper than buying new barrels, and anybody can do it.

The man who puts a lot of elder in his cellar to get hard is laying up for his boys something that cannot be kept in barrels.

The windy days of spring are here. Rattle a log chain down the chimney and get the soot out before it burns out, and maybe burns the house, too.

Even the much despised chicken mite has a use. According to the Ottawa (Kan.) Republic, they are killing the English sparrows in Kansas.

Two good eyes to a hill of potatoes are a plenty. We make a mistake many times in seeding too heavily. Good stocky shoots are better than spindling ones.

Simply pull up any weeds which succeed in pushing through the strawberry mulch. Generally speaking, it is best not to hoe or cultivate the fruiting bed in the spring.

Burn all the old brush heaps now and get rid of a thousand and one pests that have their home there waiting for warm weather to bring them into activity again.

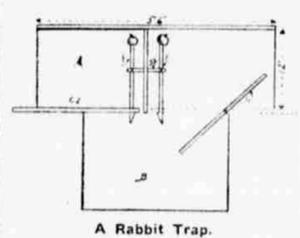

TRAP FOR CATCHING RABBITS

Cheaply Contrived Arrangement That Will Capture Many of Small Injurious Animals.

(By J. WESLEY GRIFFIN.) In making a rabbit trap one will need two boards for the sides; one board two feet six inches long and ten inches wide for the top. This board is nailed on the edges of the side boards, making the box eight inches wide and one foot tall in the clear.

There are no end pieces. The center board is 8x12 inches, to which the sides and top are nailed.

A is the side. B is a barrel or deep box set in a hole or hollow into which

A Rabbit Trap.

the rabbits fall when the bait is touched.

C is the treadle or bottom of the trap which works on a pivot. A nail driven through each side into C, which should work easily, forms the pivot on which the trap door works.

The end of C at the entrance of the trap should be just heavy enough to balance up the other end, so as to reset after a rabbit has been caught.

The square hole in board C fits over the lower end of E and is tripped by the rabbit when he touches the bait.

EE the triggers are made of pieces one inch square and nine inches long. D is two inches wide and six inches long which holds the triggers in position.

D and EE should be attached to the center barrel before the bottoms are fastened in place.

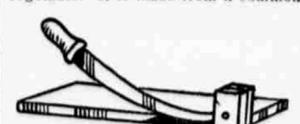

The pin through the lower end of E keeps the bottom board from going up too far when the trap is set.

Apples as bait will catch a dozen or more rabbits as they do not have a chance to eat a great deal.

DEVICE REMOVES ONION TOPS

Handy Little Implement Useful in Cutting Off Tops of All Kinds of Vegetables.

This is a handy device for removing the leaves of tops of almost any vegetable. It is made from a common

Home-Made Onion-Topper.

corn knife, is attached to the edge of a board, as seen in the picture, and things to be cut are placed beneath the knife. The board is of hard wood.

Oldest Vegetables.

The onion, asparagus and cucumber are three of the oldest vegetables known. Like pens, the Egyptians grew them 20 centuries ago. To the onion belongs, probably, the honor of being the first vegetable primeval man ever made trial of.

RESTORING WORN-OUT FARM

This Can Be Done by Putting Into Ground More Fertility Than Taken Out by Crops.

ON R. S. TAYLOR'S. A number of years ago a young Pennsylvania Dutchman bought a 200-acre farm in one of the southern counties of Indiana. This farm had been run down until by the old meth-

Manure by Forkful.

ods employed, it was not possible to make a living on it, and the owner had been compelled to sell because of sheer poverty.

The father of the young man who bought the farm had become rich on a farm most of which had been dug out of the hillside. He began gradually to improve the condition of the soil by plowing a little deeper every time. He started a three-year rotation of crops plowing under the stubble on the corn land to add humus. He sowed clover every year on new ground.

When the Indiana farmer sold at auction his belongings, when he left the place, he had less than a dozen animals all told. The Pennsylvania man went in debt for a half-dozen cows, 50 head of sheep and a dozen brood sows. In three years he had increased this number three or fourfold.

He made arrangements with the livery stables in the country town four miles distant to keep the manure

Manure Spreader.

hailed away from their back door and for five years all his spare time both winter and summer was devoted to this task.

The manure spreader was not known at that time, but he continued to pile the manure upon his acres by the forkful, until his neighbors began to make fun of him. Some of them declared that he would destroy his farm by making it "manure-sick"; but the Pennsylvania man smiled and kept his wagon going to the livery stables and back to the farm with its heavy load.

He was among the first farmers in the state to buy a manure spreader when they came in style.

LITTLE POTATO BEETLE PEST

Insecticide Recommended That Will Stand Considerable Wet Weather and Do Good Work.

(BY S. ARTHUR JOHNSON, COLORADO AGRICULTURAL COLLEGE.)

The potato beetle is such a common pest that a description scarcely seems necessary, but since other insects are often mistaken for it, it may be well to give a brief account of it. The adult beetle is oval in form, about three-eighths of an inch in length, and just a little narrower than long. The ground color is yellow. The upper wings are marked by ten black lines running lengthwise.

The adults live over winter in the ground to the depth of six to ten inches or more.

In the spring the beetles appear about the time that the potatoes break from the ground, and in a few days the egg laying begins. The eggs are bright yellow in color and are laid in patches on the under sides of the leaves. They are very easily discovered by simply turning over the vines with the hands so that the under sides of the leaves are exposed. Systematic examination of the vines by passing through his fields and turning over the leaves of two or three hills in each row.

The eggs hatch in from four to eight days, according to the temperature. The larvae are dark red grubs with black heads. For the first day or two they often eat the surface of the leaf upon which they were hatched. Then they migrate to the top of the plant and feed upon the young tender leaves which are just unfolding.

The ideal moment for the first spray is just when the eggs are beginning to hatch. Fortunately, we now have an insecticide which will stand considerable wet weather and still leave enough clinging to the leaves to do very effective work. This is arsenate of lead.

This poison usually comes in the form of a white paste, though some manufacturers make a powdered product. The arsenate is applied to the vines in water at the rate of six or eight gallons of the poison to a hundred gallons of water, or about three or four pounds to the barrel.

The best way to mix the poison is to weigh out the required amount in a pail, pour in some water, and mix thoroughly with a stick. Pour off the top of the mixture into the barrel of water through a screened funnel. Add more water to the remainder in the pail, mix, and proceed as before until all the substance has been dissolved.

The best method of application, especially in large fields, is by means of a power sprayer.

NEBRASKA IN BRIEF

NEWS NOTES OF INTEREST FROM VARIOUS SECTIONS.

ALL SUBJECTS TOUCHED UPON

Religious, Social, Agricultural, Political and Other Matters Given Due Consideration.

Fullerton has voted bonds for a new high school building.

Ground has been broken for the new high school at Broken Bow.

A "clean-up crusade" is on at Nebraska City by order of the mayor.

Scarlet fever has again got a foothold at Gothenburg, several new cases having recently developed.

Calvin L. Steele, at one time commander of the Grand Army of the Republic, died in Jefferson county last week.

John Griffin, one of the oldest engineers on the Burlington railway, has resigned his position and will become a farmer.

The advertising committee of the Commercial club at Kearney has decided to adopt the phrase: "Kearney—A Capital City."

The new bank at Bridgeport will soon be ready for business. In the near future a building it will be provided for the bank.

Boone county farmers are finding the seed corn problem a hard one. Those who are testing their seed are finding a great deal of it useless.

Emerson will decide the school question this year by popular vote. The village trustees will submit an ordinance which, if carried, will shut out saloons.

Kearney has paid \$445,197.22 in freight and passenger fares during the last twelve months, and with only two railroads, stands fifth in the state exclusive of Omaha and Lincoln.

The business men of Palmyra are pushing the good roads idea, and subscriptions are being taken with a view to dragging from thirty to forty miles of roads leading to the village.

John Kennedy of Omaha, 26 years of age, thought he wanted to drown himself, but when he got out into the Missouri river and found how cold the water was he changed his mind and waded back to dry land.

W. S. Wright, a retired farmer living at Valley, was shot in the leg by John Story, a Union Pacific detective, who was on guard in the railway yards on the trail of box car robbers. The wound is not serious.

For some time the seniors of the McCook High school have been remonstrating against what they call the "despotic rule" of the superintendent and principal and following the suspension of three of the class the whole class quit school.

W. E. Porter, a farm hand, is in the county jail at Fremont awaiting the arrival of the sheriff from West Virginia, having been arrested for the crime of seduction at his old home.

Buffalo county will get through the inheritance tax \$5,874 from the George Meisner estate, now being settled in county court. The interest on this amount will be added and will go to the county. The entire value of the estate was appraised at over \$600,000.

A number of farmers in the vicinity of Holdrege have been conducting some thorough investigations as to the probability of the wheat crop being damaged. The unanimous opinion is that the crop is entirely unharmed, and that the winter just closing has left fields in most excellent condition.

Jacob Kimmell, who died at Kearney last week, was buried in a coffin he made eleven years ago. He was 88 years of age.

J. F. Rosenfield of West Point, famous as the largest grower of peonies in the United States, is now visiting at Honolulu, Hawaii Island, having crossed from San Francisco. He has been sojourning on the coast for some months preparatory to embarking anew in the culture of peonies on a twenty-five-acre tract near Omaha, bought by him last summer for the special purpose of propagating this one plant.

About thirty members, heads of families, in and around Hampton, have decided to start a German Lutheran church in that town, and have rented the Christian church building for five years.

Ben F. Shults and Jess Cronk, both of Curtis, had their preliminary hearing at Stockville before the county judge on a charge of "bootlegging" whisky. Both were bound over to the district court. Shults, on two counts, was required to give a \$400 bond, and Cronk, on five counts, was required to give a \$750 bond.

Sherman Grubb, who is accused of participating in the theft of three horses from the John Reeves place in Merrick county, on September 9, is now in the custody of Sheriff Iler, after having escaped the hands of the officers of the law for several months.

Edward Russell, with many aliases, was arrested in Hastings on telegraphic information from the western headquarters of the Scientific American and its manager, H. L. Hayward, and is in the county jail. He has been defrauding the company through fake contracts.

EASTER AND REVIEW

Sunday School Lesson for March 27, 1910

Specialty Arranged for This Paper

GOLDEN TEXTS.—"Jesus went about all Galilee, teaching in their synagogues, and preaching the gospel of the kingdom, and healing all manner of sickness and all manner of disease among the people." Matt. 4:23.

"I am he that liveth, and was dead, and, behold, I am alive for ever more." Rev. 1:18.

Suggestion and Practical Thought.

These two "Golden Texts" express the truth and suggest the methods of one of the best and most interesting of Easter lessons.

For they teach us the most important truths we need to know for our life here and for our life forevermore.

That the Jesus who once lived in Palestine and did the works we have been studying.

Showing the love of God for man.

Teaching the eternal truths of heaven.

Expressing in visible forms the loving kindness of our Heavenly Father.

Setting us a perfect example.

And giving his life that we should not perish but have eternal life.

This same Jesus is really living today as he was then on earth.

He is with us now as when he dwelt in Galilee.

Is now inspiring the same life.

Teaching the same truths.

Doing the same works.

Is our present King, Saviour, Helper, Guide and Friend.

To realize these things will make a blessed Easter day.

The teacher can take up the lessons one by one with his scholars and show that the Risen Saviour is our present Saviour.

We are tempted. Jesus is "touched with the feeling of our infirmities" since "he was tempted in all points like as we are, yet without sin."

We study the laws of his kingdom, and we know he who "as a Son learned obedience by the things which he suffered," "became, unto all them that obey him, the author of eternal salvation." "For he dwelleth with you, and shall be in you."

The review of Lessons IV. to IX. will bring these truths to mind.

We have been studying his good deeds to the bodies and souls of men. Jesus the living Saviour, is continually here and now fulfilling his promise.

"He that believeth on me, the works that I do shall he do also; and greater works than these shall he do; because I go to the Father."

Lessons X. to XII. show what these works are.

BEGIN THE YEAR WITH CHRIST

No Period Can Be Happy or Beautiful Where the Lord is Left Out.

One reason why life is so serious is because we must give account of it all. Jesus hinted at the large meaning of this truth when he said that for every idle word that men speak they must give account. If for the idle words—light, trivial, empty words—how much more for the words which are filled with bitterness, or with malice, or with the evil of falsehood, of envy, of irreverence! We are not done with life as we live it; we shall meet it all again.

These things being true, how should we enter upon the new year? For one thing, we should begin it with Christ. Who is sufficient for the serious problems of living without the divine grace and help? There is no other hand that can guide us safely through the new and strange experiences.

Another suggestion for a prosperous new year is that we should fill its every hour with duty well done. Duty is a large word. It includes all that we owe to God—honor, love, obedience, faithfulness. It includes all that we owe to men. No year can be happy or beautiful with God left out.

The only way to have a year at its close stainless and beautiful, is to keep the days, as they pass, all pure and lovely with the loveliness of holy, useful living. It is in little days that our years come to us, and we have but the one small fragment to fill and beautify at a time. God never gives us years, or even weeks. He gives us only days. If we live each day well, all our life will, in the end, be radiant and beautiful.—Rev. J. R. Miller, D. D.

A Great Christian Man.

Gladstone was a member of parliament seven years before Queen Victoria ascended the throne, and was as great a figure in the world's eye as the queen when she celebrated her sixtieth regal anniversary. He was great in the splendor of his setting sun, sublime, as his death approached, as he discoursed of God, of the forgiveness of sins, of the great hereafter, and made sublime in the eyes of all men when his lifelong opponent, Lord Salisbury, conferred on him the highest title that even the Creator himself can bestow upon a human being: "A great Christian man."—Dr. J. M. Buckley, in the Christian Advocate.

Value of Church Attendance.

No danger is more subtle or fatal than the philosophy which disparages the value of church attendance. Break up the Christian assembly, and Christ's grip upon the nation is broken. The sense of God and the sense of sin, the august beauty of truth and the high dignity of duty, the sweetness of communion and the raptures of heaven, all these are heightened and made real in the great congregation. We kindle one another and lift up one another when as brethren we meet to meditate and pray.

GORDON'S TESTIMONY PROVES INTERESTING

Charles W. Gordon, whose picture is given above, is agent for the Atlantic & Pacific Tea Company in Ogdenburg, N. Y., and resides at 78 King street, that city. In giving testimony regarding his own case, Mr. Gordon recently made the following statement:

"Some time ago, while suffering from stomach catarrh, I was advised to take Cooper's New Discovery, and did so, two bottles of the preparation putting my stomach into good condition. Previous to my taking the New Discovery I could not eat a meal without experiencing pain and discomfort afterward.

"I had been in this condition for a long time, although I had tried many different remedies in search of relief, and at last reached the conclusion that I had exhausted every available resource. Cooper's New Discovery was therefore to me almost a heaven-sent blessing, and the work of the medicine was so permanent and lasting that I have had no recurrence of my former trouble whatever.

"I can eat anything I care for without noticing any bad effects afterward. I have recommended Cooper's New Discovery to many persons of my acquaintance, and it never fails to give satisfactory results. It reaches the seat of stomach trouble in mighty short order."

Cooper's New Discovery is sold by all druggists. If your druggist cannot supply you, we will forward you the name of a druggist in your city who will. Don't accept "something just as good."—The Cooper Medicine Co., Dayton, Ohio.

WERE NO TROLLEY CARS THEN.

Abel Stringham—I tell you, my boy, Shakespeare could never have written a drama like yours.

Playwright—You are very complimentary.

Abel Stringham—Not at all. Take, for instance, that trolley car accident in the third act.

A WONDERFUL CHANGE.

From Daily Wretchedness and Pain to Normal Health.

Mrs. R. Crouse, Manchester, Ia., says: "For two years my back was weak. Rheumatic pains racked my lower limbs, day and night. The action of the kidneys was annoyingly irregular. When I started using Doan's Kidney Pills, these troubles soon lessened and the dull

backache vanished. The kidneys now act normally and I give Doan's Kidney Pills credit for this wonderful change." Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Getting Rid of it. Dusty Rhodes—I wouldn't have to ask for help, but I've a lot of real estate on my hands that I can't get rid of.

Mr. Rural—Try soft soap and boiling water.

She Was. "Mrs. Gay has been deserted by two husbands."

"The abandoned creature!"—Cleveland Leader.

Hold fast to the present. Every position, every moment of life, is of unspeakable value as the representative of a whole eternity.—Goethe.

PILES CURED IN 6 TO 15 DAYS. PAIN GUARANTEED TO GIVE ANY CASE OF PILES, BLEEDING OR PROTRUDING PILES IN 6 TO 15 DAYS OR MONEY REFUNDED. 50c.

It's difficult to convince a woman that other women are as good as they want her to think they are.

FERRY DAVIS' PAINKILLER when thoroughly rubbed in relieves rheumatism and sprains in joints of muscles from any cause. All druggists, 25c, 50c sizes. Large bottles the cheapest.

Father Time was probably nursed in the lapse of ages.
