The Women Do The Work

The owners of lots fronting on South Seward Street near Division street had become so neglectful of their property that the weeds grew so high that one could not pass along the walk without getting their clothes drabbed. Becoming tired of brushing big weeds aside the women went armed with sickles, scythes and other implements and proceeded to demolish the "nuisances" in true feminine style. The owner ought to take the lesson to heart and keep the weeds cut in the future.

To the Teachers of Webster County.

The regular teacher's monthly examination will be held at Red Cloud the third Friday and Saturday following of each month.

Registration hours 8 to 10 a. m. and 1 to 2 p. m.

Since all schools are closed no departure will be made from the regular examination program.

I am pleased to note that teachers are beginning early to have their certificates renewed. The wide awake energetic teacher will not wait until the latter part of the summer before qualifying. School-boards dislike employing teachers who are not sure of their scholarship.

It is hoped that every teacher will endeavor to make her certificate better this year than last. I hope that the number of first grade and "With Credit" and "With Honor" second grade certificates will increase. By doing so, their grades will become permanent and we can devote our whole time and energy to our school work rather than preparing for examination year after year.

Let us have our County clear from emergency certificates, certificates issued with blank grades, or even third grades.

County Superintendent.
