How the Mule Got His Mate Up.
The street was slippery and the driver pulled at the reins. The mules strained in their effort to turn the wagon. One slipped. The next moment it was down and mixed up in the harness. The driver swore—and not gently.
"Twenty minutes now before I get that fool mule up," he grumbled as he left his seat on the wagon. But he didn't count on the mules. The one that was still on his feet looked at the one on the ground. Then he reached over and bit him on the 'topknot.' There was an animal grunt and a kicking of feet. Then without aid the mule got up. By the time the driver was back on his seat the mules were tugging again.—Kansas City Star.
