#### Boys Composition on Girls.

Girls is the only folks that has their own way every time. Girls is of several thousand kinds, and sometimes one girl can be like several thousand other girls if she wants to do anything. Girls is alike one way, and they are all like cats. If you rub 'em the right way of the hair they'll purr and look sweet at you, but if you rub 'em the wrong way or step on their tails they'll claw you. So long as you let a girl have her own way she's nice and sweet, but just cross her and she'll spit at you worse nor a cat. Girls is also like mules. If a girl don't want to believe anything you can't make her. If she knows its so she won't say so. Brother George says he does not like big girls but he does like little ones, and when I saw him kissing Jennie Jones last Sunday, and told him of what he'd said, he said he was a biting her cause he didn't like her. I think he hurt her, for she hollered and run, and there was a big red spot all over both of her two cheeks. This is all I know about girls, and father says the less I know about them the better off I am.

I will add further that on account of your action we voted to replace our old switchboard with a new one, which was badly needed, and now we feel that we can exist at least two more years. Thanking you most heartily for the interest taken in behalf of the "under dog," I remain, yours very truly,
