A MARVELOUS RECOVERY.

Mrs. Ray Trusner, 30 W. 3rd St., New Albany, Ind., says: "Kidney disease had rendered me a chronic in-

valid. I lay in bed unable to move hand or foot. My right limb was swollen to twice normal size. I looked the picture of death and my case puzzled the doctors. Kidney secretions were highly

colored and scalded terribly. Marked improvement followed the use of Doan's Kidney Pills and in six weeks I was a well woman. My friends and relatives marvel at my recovery.

"When Your Back Is Lame, Remember the Name—DOAN'S." 50c all stores Foster-Milburn Co., Buffalo, N. Y.

The Largest Bells.

"Great Paul," the bell of St. Paul's ing at about the spot where the bot-Cathedral, in London, weighs nearly 17 tons and is nearly 30 feet around. The first "Big Ben" of Westminster was cast more than 50 years ago and weighed more than 14 tons. But "Big Ben" had a crack and was cast over, losing some weight, and the clapper was made smaller, now being about \$00 pounds instead of a ton. The great bell, "Peter of York," cost \$10.-000, weighs about 13 tons and is 22 feet in diameter.

The largest hanging bell in the world is in the great Buddhist monastery near Canton. It is 18 feet in height and 40 feet in circumference, being cast in solid bronze. This is one of the eight monster bells that were cast by command of Emperor Yung Lo about A. D. 1400. It cost the lives of eight men, who were killed in the process of casting.

NEW STYLE OF MILK BOTTLE

Has Small Opening at About Spot Where Bottom of Cream Line Is Quite Apt to Be.

Various devices have been invented to get the cream out of a milk bottle and a Michigan man has contrived a way that involves a new bottle. In this new bottle there is a small open-

New Style Milk Bottle.

tom cream line is apt to be. Normally this opening is plugged with a reto be run off this pin is taken out at the bottom and the same at the the hole. To do this, however, air buttle, so the plug is made with a sharp point which can be jabbed through the pasteboard seal that is in the top. It is important to keep each plug with its particular bottle, for once the plug is lost the bottle is of no use until another stopper can be found for it.

PREVENTION OF ROPY MILK

Caused by Certain Bacteria, One Type of Which is Found in Dirty, Stagnant Water.

A woman reader wishes help regarding ropy milk, asking the cause and the cure. The milk is strained at night and the next morning the cream is ropy and must be thrown away. It is not always easy to trace the cause of ropy milk to its source. Without going into any lengthy explanation, it may be said that ropy or slimy milk is caused by certain bacteria. One type may be found in dirty, stagnant water. If the cows wade in this water their flanks and udders become the resting place for this type. The bacteria are easily transferred to the milk at milking time. The stable becomes infected, as it were, and also the utensils that come in contact with the milk. The germs lodge in the crevices of the utensils and readily propagate in the warm milk. The cure lies in absolute cleanliness. All utensils should be thoroughly scalded. Lime is an excellent destroyer of all germ life. The utensils may be given a coating of the slaked lime, then washed in boiling water. It may be necessary to give the stable a thorough cleaning with lime used as whitewash.

HANDY DEVICE IN THE BARN

Lever Attached to End Used for Opening and Closing Stanchions-How It Is Made.

I have a handy device for opening and closing stanchions, says a writer in the Missouri Valley Farmer, When making it I took first a strip of one by four and bored one-half inch holes in it. These holes were as far apart as the stanchions were at the top.

The Lever Does It.

Then I bared holes the same size near the bottom of the swinging side of the ber that it is not usually the roarstanchions, and at the end attached a the killing. lever by which the stanchions could easily be closed. The lock on the end of the stanchion is the only one now that need be closed, as the strip keeps all the others closed.

Effect of Feed on Milk. Some dairymen believe that if the feed of their cows is changed it will have a bad effect upon the milk flow, but repeated scientific experiments show that changing from one feed to the kicking habit. another, and frequently additions to

Money in Dairying.

There is money in dairying in spite of a prevalent notion to the contrary, but it needs a combination of good cows and good management to get wonderful development of the fore us-

MANAGING A MATURE BULL

Animal Should Be Kept in Well-Fenced Pasture-Ration of Wheat and Ground Oats Is Good.

The service bull should be kept in a well-fenced grass pasture with a shed to go under in stormy weather during the grazing season. Give a mixed grain ration of wheat bran and ground oats. Give two or three quarts of grain night and morning. If grass is short, an armful of cornfodder should be fed twice a day. The cow to be served may be turned into the lot with the bull; after service, give a small feed of bran and while bull is eating, throw the stanchion lever, thus securely fastening the bull; the cow may then be removed without danger. By having the cows served so that part of the herd will come fresh in the fall and part in the spring, a regular quantity of milk may be had the year round, without the necessity of selling off half-fat cows at ruinous prices and buying in fresh cows at high prices. When this method is followed, the dairyman is always in debt to the cow dealer.

The bull should be kept in good thrifty condition. A cross bull may often be tamed by turning one or two dry cows into the lot with him. Bulls should have daily exercise and be grain fed. If this is not done, they may become impotent or slow in serving. The young bull should be kept in a separate pasture and not allowed to run with the helfers.

PLAN OF SATISFACTORY BARN

Building With Cement Basement and Holding Twenty-Eight Cows is Described and Illustrated.

My barn has a cement basement, the walls being eight feet in the clear, excepting where the driveway goes through, writes W. J. Yarnall in the Breeders' Gazette. The side walls are 16 inches at the bottom and 12 inches movable pin, but when the cream is at the top. The end walls are 14 inches and the cream allowed to flow through top. The driveway goes through on the level of the ground or about four must be admitted to the top of the inches above the ground level. It all has a cement floor. The barn cost in

Satisfactory Barn.

all about \$3,000. The cement basement cost with the wall about \$1,000 of this.

The barn holds 28 cows, 14 cows on a side. It also holds eight horses. It has one box-stall, one double stall and four single stalls, and a harness room,

Keeping Milk Sweet.

One of our enterprising dairymen finds it hard to compete with the sent a bottle of milk to Paris at the scenery and costumes of a big musical time of the exposition. It made the journey over and back, a trip of 28 days, and was still sweet. There was no preservatives used, and the only precaution was to have the dishes and bottle perfectly sterile, cooling the milk at once and keeping it all the time at a low temperature. This seems a good while to keep milk sweet, but it shows what cleanliness and a low temperature can do with milk.

DAIRY NOTES

The baby calf should have her rations changed by degrees.

Name the calves from the first and their training will be much easier. A calf should be fed five times daily about three pints at each meal. One of the greatest mistakes in dairy farming is having too much

land. No farmer can afford to have a cheap, inferior made silo on his farm.

Regularity in feeding and milking will go a long ways toward making dairy work successful. After a cow begins giving new milk

you will find that her udder is sometimes "caked." Rub it gently. A cold rain, fall or spring rain,

will check the flow of milk as much as a snow storm if the cows are exposed Look out for the gentle bull. Remem-

stanchion. I bolted the strip to the ing, bellowing, blustering bull that does Do not feed the cows corn meal if you are feeding corn silage, for there is as much corn in the silage as the

> cows should have. Butter from fresh and properly ripened cream not over one day old keeps better than does butter made from sweet cream.

A sore teat (remember the sore may be inside) will cause a cow to kick, but if handled gently she will not take on

The heifer that is cared for and handled gently throughout her entire life will need a little breaking in when it

comes time to milk her. The long, flat-bottomed udder of the Ayrshire is typical of the breed, and no other breed is able to show such

AID IS SOUGHT FOR INDIANS

Catawbas of South Carolina Have Always Been Friendly to the Whites.

In South Carolina is the earliest civilized tribe of Indians in the United States, and they are not the wards of the government. These are the Catawbas, and they number approximate-

State Senator W. H. Stewart, of South Carolina, is in Washington to confer with the congressional delegation of that state with the view of having these Indians placed on the same basis as all other red men, and it is probable that a bill will shortly be introduced to this end.

"It is strange, perhaps, that the Catawba Indians, who have been wards of the state of South Carolina for many years, should never have received any recognition from the national government," sald Senator Stewart. "but it is a fact, nevertheless. The Catawbas are the only American Indians, so far as my knowledge goes. that have always been friends of the white man. They never took the blood of a white man, and during all the early struggles of the whites against the Indians the Catawbas remained true. They were in what is now South Carolina when the first whites reached that territory, and they have remained there.

"For a long time the Cherokees oc cupied the same territory, and there was continual strife between the two tribes, for the Cherokees were among the most bloodthirsty tribes on this continent. In all the struggles the Catawbas took sides with the settlers against the Cherokees. The latter Indians massacred many of the settlers in South Carolina

"The state government, after having ing taken care of these Indians for so many years, now is seeking to have the national government make provision for them, so that they can, in common with other Indians, have lands allotted to them and become American citizens, which is only just and fair."-Washington Post,

MRS. SELBY AND PRIZE BABY

"I have always used Cuticura Soap and no other for my baby and he has never had a sore of any kind. He does not even chafe as most bables do. I feel sure that it is all owing to Cuticura Soap, for he is fine and healthy, and when five months old, won a prize in a baby contest. It makes my heart ache to go into so many homes and see a sweet-faced baby with the whole top of its head a solid mass of scurf, caused by poor soap. I always recommend Cuticura, and nine times out of ten the next time I see the mother she says: 'Oh! I am so glad you told me of Cuticura." (Signed) Mrs. G. A. Selby, Redondo Beach, California, Jan. 15, 1911.

Although Cuticura Soap and Ointment are sold everywhere, a sample of each, with 32-page book, will be mailed free on application to "Cuticura," Dept. L, Boston.

Competition. "Royalty has its difficulties," re-

marked the lord high keeper of the buttonhook. "Yes," replied the uneasy monarch. "It has gotten so that a court function

Even the absent-minded man may have a good presence.

The best of us like to play a little with fire.

NO ONE STRONGER THAN HIS STOMACH.

The celebrated Dr. Abernethy of London was firmly of the opinion that disorders of the stomach were the most prolific source of human ailments in general. A recent medical writer says: "every feeling, emotion and affection reports at the stomach (through the system of nerves) and the stomach is affected accordingly. It is the vital center of the body """." He continues, "so we may be said to live (through) the stomach." He goes on to show that the stomach is the vital center of the body. For weak stomachs and the consequent indigestion or dyspepsia, and the multitude of various diseases which result therefrom, no medicine can be better suited as a curative agent than

"Several months ago I suffered from a severe pain right under the breast-bone," writes Mrs. G. M. MURKEN, of Corona, Calif. "Had suffered from it, off and on, for several years. I also suffered from heart-burn, did not know what was the matter with me. I tried several medicines but they did me no good. Finally, I was told it was my liver. I did not dare to eat as it made me worse. Whenever I cwallowed anything it seemed that I would faint—it hurt so. I grew very thin and weak from not eating. Was told to take Dr. Pierce's Golden Medical Discovery. I took five bottles of it, and could feel myself getting better from the first dose. I could eat a little without pain and grew strong fast. To-day I am strong and well and can do a big day's work with ease. Can eat everything and have put on fiesh wonderfully. I will say to all sufferers write to Dr. Pierce. He has my undying gratitude."

Please Read These Two Letters.

The following letter from Mrs. Orville Rock will prove how unwise it is for women to submit to the dangers of a surgical operation when it may be avoided by taking Lydia E. Pinkham's Vegetable Compound. She was four weeks in the hospital and came home suffering worse than before. Then after all that suffering Lydia E. Pinkham's Vegetable Compound restored her health.

HERE IS HER OWN STATEMENT.

Paw Paw, Mich .- "Two years ago I suffered very severely with a displacement—I could not be on my feet for a long time. My physician treated me for several months without much relief, and at last sent me to Ann Arbor for an oplief, and at last sent me to Ann Arbor for an op-eration. I was there four weeks and came home suffering worse than before. My mother advised me to try Lydia E. Pinkham's Vegetable Com-pound, and I did. To-day I am well and strong and do all my own housework. I owe my health to Lydia E. Pinkham's Vegetable Compound and advise every woman who is afflicted with any female complaint to try it."—Mrs. Orville Roos, R. R. No. 5, Paw Paw, Mich.

"THERE NEVER WAS A WORSE CASE."

Rockport, Ind .- "There never was a worse case of women's ills Rockport, Ind.—"There never was a worse case of women's ills than mine, and I cannot begin to tell you what I suffered. For over two years I was not able to do anything. I was in bed for a month and the doctor said nothing but an operation would cure me. My father suggested Lydia E. Pinkham's Vegetable Compound; so to please him I took it, and I improved wonderfully, so I am able to travel, ride horseback, take long rides and never feel any ill effects from it. I can only ask other suffering women to give Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation."—Mrs. Margaret Meredith, R. F. D. No. 3, Rockport, Ind.

We will pay a handsome reward to any person who will prove to us that these letters are not genuine and truthful—or that either of these women were paid in any way for their testimonials, or that the original letter from each did not come to us entirely unsolicited.

For 30 years Lydia E. Pinkham's Vegetable Compound has been the standard remedy for fe-male ills. No one sick with woman's ailments does justice to herself who will not try this fa-mous medicine, made from roots and herbs, it has restored so many suffering women to health. Write to LYDIA E. PINKHAM MEDICINE CO. (CONFIDENTIAL) LYNN, MASS., for advice. Your letter will be opened, read and answered by a woman and held in strict confidence.
