The Billion Dollar Waste

The greatest waste in any single industry in this country is made with the corn crop. The grain of the annual corn crop of the United States is worth on the farms one and a half billion dollars. In a ripe corn plant 60 percent of the feed value is contained in the kernels and 40 per cent in the stalk and leaves. With the grain worth one and a half billion dollars, the feed value of the rest of the crop is a billion dollars. At least 90 percent of the feed value of the stalk is lost under the present system of farm management—a waste with this crop alone of almost a billion dollars yearly. No other business but farming could stand such an enormous loss.

In the New England and the Middle States most of the stalks are saved as fodder, and there are many silos, but with the damage from weathering, the waste in handling and the loss in digestibility from drying, the farmers are very far from utilizing the full feed value of the corn stalk. In the corn belt, where the bulk of the crop is raised, comparatively few corn growers harvest the stalks, and the only returns most of them secure from the forage is by pasturing the dead stalks in the cold and storms of winter. Frequently the death of stock pastured in the stalk fields makes a loss that far exceeds the returns from the feed.

Contrast this waste by the corn grower with the practices of large business organizations. For years the great packing houses have sold dressed meat for less than they have paid for the live weight of the animals.

Yet every year these packing houses return millions of dollars profit because they utilize to the fullest extent the value of their by-products. The Standard Oil Company takes crude oil into its refining plants, puts it through costly processes, using apparatus that requires an outlay of millions, pays the freight and delivers the kerosene and gasoline direct to consumers at a lower rate than is asked for mineral water, where the only expense is to run the water through a pipe from the spring into a bottle. At the same time the corn growers are wasting most of 40 per cent of the feed value of over one hundred million acres of corn.

The silo provides the corn grower with the means for utilizing the largest proportion of the feed value of his entire crop, grain and forage. The whole crop can be stored economically in the silo in compact form. The silage can be kept for days, months or years, or feeding may begin as soon as filling the silo is completed. The silo can be filled in good weather, when it is raining, or in times of extreme drought and hot winds. Silage is good feed, daily, both in winter and summer. When grass is ready in the spring, the feed that remains in the silo can be covered and will keep well until needed when the summer drouth comes. Silage furnishes a green, succulent, appetizing feed through the winter, the same as grass through the summer. It keeps the animal's system in as good condition as when the stock is on good pasture, and feeds given with it are better digested.

Corn makes the best silage, Kafir corn, Milo and sorghum follow, their value being in the order mentioned. Green pea-vines, husks and cobs from the canning factories make good material to put in the silo. In continuous rainy weather alfalfa, clover and other hay crops may be saved in the silo.

The vast dry farming sections of the Southwest will be as thickly settled with comfortable farm homes as is the northern corn belt whenever stock raising, drouth-resistant forage crops and the silo are adopted, instead of exclusive grain farming. Every live stock growing district in the United States needs the silo. The general use of the silo will make the high-priced, small farms of the corn belt profitable growers, as well as finishers of cattle and sheep.

H. M. CORRELL.

True Progressivism

The significantly progressive plank in the state democratic platform is the one demanding the investigation by congress of the conduct of Judge Wright of Washington for his contempt proceedings against Gompers and Mitchell. This little federal appointee, who has a court in the city of Washington, took jurisdiction of a suit against Gompers and Mitchell and punished them for contempt by giving them a year's imprisonment in jail. His conduct was outrageous, but no political party took any action on the matter, and free speech and a free press found itself stifled when the laborers of this country undertook to express their opinions.

Bernard McNeny, of this city, brought the matter before the last democratic convention at Grand Island, and secured the adoption of a resolution instructing congress to investigate the action of this little tyrannical judge with a view to his impeachment.

In Monday's Bee, a special from Washington reports interviews with Congressman Stephens, Maguire and Lobeck, in which they say they will obey the command of the party in this state and investigate and, if proper, impeach Judge Wright.

This, to our mind, is much the biggest thing accomplished in the Grand Island convention, and the Chief feels proud that it was a Webster County man who brought this matter before the convention. Mr. McNeny is sometimes called a re-actionary by those who do not know the meaning of the large words they use, but his action, in this one instance, entitles him to a front seat among the most progressive men in politics to-day.

We venture to prophesy that this action of Judge Wright will be the last of its kind in American courts—and to the Grand Island convention and Mr. McNeny will be due the termination of this arbitrary conduct on the part of these judicial pickaninnies.

Odd Fellows Celebration

The Odd Fellows of this city are rapidly completing arrangements for their big celebration which will be held here on the twenty-first of this month. Prominent speakers will be in attendance, the Superior and Hastings state league base ball teams will play here that day. There will be a tug of war, foot races and plenty of amusements of all kinds. Everything will be absolutely free and a general good time is expected. Odd Fellows from all over are preparing to attend. The Ladies of the Rebekah assembly will entertain the Ladies in the evening and Ben Adhem lodge will exemplify the work at night. The general public is invited to all the games, amusements and program during the day. This will be a regular fraternal celebration.

Doings of the School Board

RED CLOUD, NEB., July 26, 1912.
Upon call of president Board met in special session

Members present—Gilham, Storey, Trumble, Cook, Coon.

Upon motion Mr. J. E. Wagoner was employed as music teacher at \$6 per week to give 2½ hours instruction per day on Tuesdays, Thursdays or Fridays of each week to grades 1 to 7 inclusive. Carried.

Moved to adjourn.]
R. D. MORITZ, Secretary.

RED CLOUD, NEB., Aug. 5, 1912.

Regular meeting of the Board met. Members present—Gilham, Trumble, Storey, Creighton. Minutes of previous regular and special meeting read and approved.

The following bills were read and ordered paid:

C. A. Crabill, wagonette exp.	\$ 6 00
A. Flanagan, supplies	24 91
American Bk. Co., grade books	58 25
Frank Smelser, drayage	2 75
Macmillan Co., grade books	10 40
Argus, printing	3 00
Saunders Bros., Bldg. material	243 67

Our Store Policy

has always been to carry the standard and desirable goods in every line. That is why we chose Kodaks for our photographic department. We felt sure from careful investigation that these were the goods that should be offered our customers. From our years of experience we now know that we were right.

Our sales of the

3A Folding Pocket Kodak

have been particularly satisfactory to us because these cameras have proved so satisfactory to our customers. Pictures post card size 3 1/4 x 5 1/2. Fast lenses, splendid shutter—quality all through. Price \$20. Let us show you.

Newhouse Bros.

E. H. Newhouse, Prop.

D. C. Heath Co., H. S. Books... 22 10
Silver Brudett Co., grade books 15 00
C. E. Merrill Co., grade books 101 78
Wm. Storey, labor..... 1 00

Moved and seconded that the Superintendent be instructed to pay light and water bills hereafter the first of each month. Carried.

Upon motion the supply committee was instructed to purchase Domestic Science equipment.

Upon motion the rules were suspended and Sara Jewell elected as Primary teacher at \$50 per month.

Board adjourned.
R. D. MORITZ, Secretary.

Pugsley to Address Bankers of State

Omaha, Neb., Aug. 6th.—Professor C. W. Pugsley of the State Experiment Station at Lincoln, Neb., will address the State Bankers' Association when it convenes in Omaha, August 26th and 27th.

The bankers of the state are anxious to give any assistance that they may be able to give the farmers of Nebraska toward increasing agricultural productions in our great state. Mr. Pugsley will tell the banker how he can help the farmer and will map out a plan of procedure. The agricultural products of Nebraska stand second to none, yet with the affiliated efforts of banker and farmer, great things can be accomplished for improvement. The Association has succeeded in

getting William J. Burns, the famous detective, to address the meeting. Mr. Burns is of world-wide fame and this number on the program alone should draw a large attendance. His subject will be "Bank Protection."

D. R. Forgan, of Chicago, Ill., will speak on "The National Reserve Association of the United States". P. I. Hall of Lincoln, Neb., has chosen for his topic, "The Record"; Henry W. Yates, Omaha, Neb., "Separate Reserve Associations"; C. G. Hulbert, Utica, Neb., "The Guaranty of Deposits Law"; J. A. S. Pollard, Ft. Madison, Ia., "Soil Culture." Messrs. T. L. Mathews of Fremont, Neb., and George M. Mangold, Bennington, Neb., will also address the convention.

Workmen in Demand

The Burlington repair track force was put on a ten hour a day schedule Monday. Last week they were put on a nine hour a day schedule, six days a week, after having worked for several months eight hours a day. Five days a week. It is said more help will be employed on the rip track if it can be secured. Bridge work on the Wymore division of the Burlington is said to be far behind, and men are being employed for the several different gangs working out of here every day.

Really Lucky Candidate.
It is a lucky candidate who is more talked about than talking.
