The high school is so crowded this fall that the school authorities have decided to place the eighth grade in the Lincoln building. The Washington building will now be used exclusively for high school work. The increase in the high school attendance is accounted for, because there are 75 non-resident students and because elective courses are offered which keep the boys and girls in school. Never before have the higher grades been so filled as this year and this condition is but the result of an adequate course provided for some time since which gives the pupils a choice of subjects for study and consequently holds their interest in school work. Under the old system of one course, boys and girls dropped out and quit.
