The Chief reserves its blame and praise of the conduct of individuals in connection with the plague for a future issue. But we desire it understood that full investigation will be given to the matter. As soon as we have obtained complete returns from the county, we shall endeavor to get returns from other counties, and compare results. We shall advise with the veterinarians at the university and with the authorities of Kansas and other states. We shall endeavor to find out how many of the deaths in this county were due to vaccination, and, if censured be proper we shall not be sparing. If praise belongs to anyone we shall not be deterred from ascribing that to whomsoever it may be due. This is too important a matter to be passed over in silence.

We firmly believe in the formation of a commercial club in this city. Its advantages are many and practical. In the first place organization of this character tends to draw men closer together. Even our competitor sitting by our side seems after all to be a human being and capable of enjoyment and comradeship. We learn that there is another side to the character and that his political views will be what we thought he was. The coming together of men who are daily absorbed in business to consult and plan for what is best for the city as a whole draws out hidden powers. It broadens our usefulness, broadens our mental horizon and gives us a larger view of life. If for no other reason than that our sociability should be developed we need an organization of this kind.

Again we must think of our little city as a whole. We have our joint interests, we are responsible to those about us to see that they get all that is their due. To think only on our own problems is to develop selfishness, narrowness and bigotry. It is the ambition of every town and hamlet in the United States to become a great city, to grow bigger and bigger every day and a live organization of the business and professional men of this city would convince the outside that we have a live metropolis pulsating with all the energy of confined steam. As soon as we believe in our selves we inspire confidence in the outsider which stimulates his appetite and makes him want to get his feet under our table and become one of us. As soon as people learn that we have something that we richly enjoy they will hunger for a bite.

The history of all nations, all cities, all communities is conclusive evidence that in union there is strength. The little efforts of one multiplied by the little efforts of one hundred produce advancement, achievement and renown undreamed of by any one by himself alone. So long as we are divided, each one pulling his own way regardless of the ambitions and desires of others just so long will we make mistakes and clog the wheels of progress. Divided we will dwindle down to the sleepy condition of a purposeless eastern village unknown unsung, but united by the ties of unselfish progress we will impress the people of Webster county, the people of the Republican valley, the people of the state of Nebraska, yea even the people living in the farthest corners of the globe, with the fact that we are running over with life, filled with ideas, bubbling with enthusiasm for all that makes for the betterment of mankind and in place of going down into the dreamless silence of the dreamless dust we will approach the sunset of life with eyes beaming, faces glowing and hearts beating with the consciousness of something accomplished something done.

If You Are Ready to Look at Your New Fall Wearing Apparel, We are Ready to Show It to You.

Fall Suits, Coats and Skirts with a genuine pepper smartness in every line and stitch. They are from the style creating factories that do things first and best. If you will take the time to give them a looking over, we have the time any time to show them.

Just as one turns to a thermometer to learn temperature, so one must turn to this store to learn correct styles in Women's Wear. We are the recognized barometer in this territory of what is not only new but what is correctly new. When a style finds its way to our departments, that alone is a guarantee that the wearer of that style will be dressed in perfect harmony with the season's most approved fashion, and for this style satisfaction you pay less here than in any other store in this or other cities.

CLOAKS

The most popular fabrics this season are Chinchilla, Boucle', Zilelines and other hairy effects. In short, rough fabrics are the stylish thing in coats.

Grays, Tans and Browns are the favorites. Buttons are used in large numbers, are large and to a great extent highly colored.

SUITS

Suits have jackets 32 to 34 inches long. In materials, serges are still the most popular fabric, although there is a strong liking for hairy effects. Skirts are being made a trifle wider than for Spring and appear much more graceful.

SKIRTS

Every woman feels the need of an extra skirt, for either dress or street wear, and you can get the kinds here that conform absolutely to the latest fashion, in both material and cut. They are made with the utmost care and you will find exactly what you want here, at the price you wish to pay.

We have large, complete stocks of Coats, Suits and Skirts, each and every garment being priced as low as possible, consistent with the quality.

Not alone in the Ready-to-Wear sections are we prepared for you, but all through the store we have received the New Fall and Winter Merchandise and will be pleased to have you come and see them.

Public Need Demands Universal Telephone Service.

That is the secret of the remarkable growth of the Lincoln Telephone Company System, demonstrating the people's appreciation of the tremendous value of a system that is truly comprehensive and universal.

More than keeping pace with the commercial growth of the city and state, the long distance lines of this Company are being steadily extended into every locality where economic need requires them, and new lines, new exchanges and new subscribers are being steadily added to the system, to the end that the service may be worth more to every subscriber.
