Half Service or Double Service

Two telephone systems in one town mean a divided community or a forced duplication of apparatus and expense. Some of the people are connected with one system, some are connected with the other system, and each group receives partial service.

Only those received full service who subscribe for the telephones of both systems. Neither system can fully meet the needs of the public, any more than a single system could meet the needs of the public if cut in two and half the telephones discontinued.

What is true of a single community is true of the country at large. The Lincoln Telephone System is established on the principle of one system and one policy, to meet the demands for universal service, a whole service for all the people.
