

GREAT SALE OF CROW AGENCY LANDS.

350,000 acres of the finest Crow Indian Reservation lands near Hardin, Mont., will be sold at auction October 21, 1912, at a minimum price of \$1.00 per acre; no residence is required and a title is furnished at once. These lands are located in Southern Montana, near Billings, and will advance steadily in value, because of the changing conditions in raising cattle.

YOU WILL NEVER HAVE A CHANCE Like This AGAIN

ROUND TRIP TICKETS will be on sale October 15th to Billings, Hardin and other destinations, stopovers allowed; on these tickets you can see the free Kinkaid homesteads in Western Nebraska, stop at Upton, McCroft and Gillette to see the Mondell 320 acre free homesteads; stop at Hardin and see the Crow Indian lands. Or you can buy homeseekers' tickets to all points in the Big Horn Basin at the same fares, and see the heavy crops in that locality.

October is a good month in which to visit that region and note the exhibit of 1912 dry farming and irrigated land products everywhere in the Northwest.

A Distinction With a Difference

YOU may not always get what you pay for. It takes a good judge of values to do that, but if there is one sure rule in business it is—you pay for all you get. You may not be able to see the difference between engines of similar appearance at different prices, but if you buy from a reputable firm you may be sure the difference in quality is there.

I H C Oil and Gasoline Engines

cost more than some others because they are more carefully made, and more thoroughly tested. Skillful designing, better material, better workmanship, more careful assembling, and more thorough testing, tell in the long run. Given equal care an I H C engine costs less per year of service than any other engine you can buy. If an I H C engine is given all the work it will do, pumping, sawing wood, running the grindstone, feed grinder, hay press, silage cutter, repair shop machines, cream separator, churn, washing machine, etc., etc., it will pay for itself in a very short time in money and labor saved.

I H C engines are made in every style—horizontal, vertical, air and water-cooled, stationary, portable and mounted on skids, to operate on gas, gasoline, kerosene, naphtha, distillate or alcohol, in sizes from 1 to 50 H. P. Kerosene-gasoline tractors, 12, 15, 20, 25 and 45-H. P.

Telephone Service Universal or Limited

Telephone users make more local than long distance calls yet to each user comes the vital demand for distant communication. No individual can escape this necessity. It comes to all and cannot be foreseen.

No community can afford to surround itself with a sound proof Chinese Wall and risk telephone isolation. No American State would be willing to make its boundary line an impenetrable barrier, to prevent telephone communication with the world outside.

Each telephone subscriber, each community, each State demands to be the center of a talking circle which shall be large enough to include all possible needs of inter-communication. In response to this universal demand the Lincoln Telephone System is clearing the way for universal service.

Every one of our telephones is a Long Distance Station.
