

Silks and Embroideries

To be in style this year it is essential that you have a dress made of one of the above named goods.

That our silks have merit is shown by repeated sales to the same customers. Our dollar grade of

Messaline, Charmeuse and Brocade

is without doubt the best on the market at that price.

Embroideries

Is Our Middle Name

The line is complete, the quality is the best. We have 45-in Flouncings at

\$1.25 to \$3.25 Per Yard

You can't be well dressed unless you have a fine embroidered dress.

Correspondents

GARFIELD

March went out with some nice weather.

Disking and sowing oats is the order of the day in Garfield.

Mrs. Al Smith and children were visiting in town last week.

Col. Wiggins and family were visiting at T. W. White's Sunday.

Mrs. Louise Allen is visiting with her sister Mrs. Mary Amack this week.

Eli Houchin was shucking corn Saturday. He thinks it is ripe now and will do for seed.

George Amack and family and Will Fisher and children were callers at A. W. Shipman's Sunday.

The following farmers of Garfield hauled hogs to town Tuesday: George Harris 1 car, Joe Mudd 1 car and Barnes & Amack 1 car load.

COWLES

John Brush was a visitor in Hastings Wednesday.

Jas. McBride has taken official charge of the Cowles Bank.

Fred Gund was down from Blue Hill Monday attending to banking business.

All Saladen was on our streets shaking hands with old friends Tuesday evening.

Dr. Boren is figuring on putting up a dwelling house in the Foe & McBride addition.

Jud White and wife spent Sunday with Frank Amack's who live south of Red Cloud.

The Hardware firm of Wells & McTaggart are putting in a water system for Boyd Harrington this week.

A. J. Grant, our Township Assessor, has commenced to assess the people. The writer was favored by a call.

B. F. Morgan left Wednesday morning for the Pacific Coast where he expects to spend some time. We will try and take care of the Burrows Hart.

The Glenwood Telephone Co. of the Cowles district has commenced repairing their lines. They have a number of large poles to take the place of some of the two by fours which it has now.

The village election was held Tuesday and the following were elected on the Village Board for the ensuing year: R. Greenhalgh, Thomas Deakin, Morgan Davis, J. T. Lacy and Chas. C. Bennett.

The Band Concert given by the Cowles Band under the leadership of Professor Betz was well attended and appreciated by every one who was able to get in or near the building. On account of not having a building sufficiently large to accommodate the people the Band is thinking of repeating the entertainment on some future date.

Lost is Found

Bring that old picture and get it enlarged. Surprising results. We can please you, come in and see.

STEVENS BROS.

Notice of Probate.

In the County Court of Webster County, Nebraska.

STATE OF NEBRASKA, ss.

Webster County,

To all persons interested in the estate of Mary A. Heaton, Deceased:

TAKE NOTICE, that a petition has been filed praying that the instrument to be filed in this court on the 5th day of April, 1913, purporting to be the last will and testament of said deceased, may be proved and allowed and recorded as the last will and testament of Mary A. Heaton, deceased; that said instrument be admitted to probate, and the administration of said estate be granted to John W. Kinsel as Administrator with the will annexed.

It is hereby ordered by the court, that all persons interested in said estate appear at the County Court to be held in and for said county on the 5th day of April 1913, at ten o'clock A. M., to show cause, if any there be, why the prayer of the petitioner should not be granted, and that notice of the pendency of said petition and the hearing thereof, be given to all persons interested in said matter by publishing a copy of this order in the Red Cloud Chief, a legal weekly newspaper printed in said county, for three consecutive weeks prior to said day of hearing.

Witness my hand and the seal of said court this 19th day of March, A. D. 1913.

(SEAL) A. D. RANNEY

County Judge.

Sweet Clover: A Good Soil Builder

Frequent inquiries come to the State Board of Agriculture concerning the value of sweet clover as a forage and hay crop and for the restoration of wasting soils. Much interest has been aroused in this plant since it has been discovered that it carries in its root-nodes the characteristic bacteria which live on the roots of alfalfa and it is being sown extensively in the sandhill region. Secretary Mellor has recently issued the following letter which contains valuable information concerning sweet clover:

"The white sweet clover (*Malilotus alba*) is the better for pasture or hay, as well as for soil building, because of its more profuse growth. This plant,

Cars in the New 1913 Models

MODEL 25—As it is especially based upon experiences covering a long term of years, the Model 25 is bound to make a high place for itself as a car for general purposes and for family use. It is large, roomy and comfortable to the extreme. Luxuriously trimmed and refined in every detail.

CREAM SEPARATOR TALK

That dairying is one of the most profitable branches of farming, is, and has for a long time, been a well known fact. Not only in that it keeps the fertility of the soil at home, where it may be used to produce other crops, but also for the fact that it provides the farmer with a weekly cash income from the sale of butterfat. That the farmers of this vicinity are aware of the benefit to be derived from this source, is apparent by the high prices which are being paid for milk cows. After investing \$75.00 or more in a milk cow, why not derive the full benefit from such a purchase by the use of a good cream separator? In this article we wish to present to you the RUMLEY-OLDS cream separator, which has no superior on the market. This separator is of the disc type of machine, which is recognized as being the best type and has many superior points over other machines. The makers have not figured how cheap, but how good they could make a cream separator, and every feature to be found on this machine are considered the acme of cream separator construction. Some of the points to be found on this separator are the helical gears, reversible phosphor bronze worm wheel, ball bearing contact points on bottom and top of bowl spindle, noiseless roller ratchet which engages instantly at any point, large milk supply can with no sharp corners (easily washed and kept clean) split wing for milk distribution in bowl with patent wings which distributes milk evenly to all discs alike (therefore allowing of closer skimming and less discs than other machines of like type, also allowing of slower speed and prevents milk from foaming and thereby being dangerous to feed to calves). Call and see this machine and be convinced. We are willing to allow you to try this machine in competition with any other make of separator in the market. ONE TRY WILL MAKE YOU BUY.

RED CLOUD,

NEBRASKA

which is a biennial, grows a considerable quantity of large fleshy roots bearing bacteria nodules which add large quantities of nitrogen to the soil, and in the process of decay leaves much organic matter in the soil. If sown in the early spring this will sometimes make a light crop of pasture or hay during the autumn, though it is better to sow it in the fall, as the hard hull of the seed usually requires

the action of frost to assist in germination. There are two varieties of the yellow sweet clover, known as the *M. officinalis*, which is a biennial like the white, and the *M. indica*, which is an annual plant of oriental origin, growing profusely in California. The annual sweet clover (*M. indica*) we cannot recommend for any purpose, as it produces very little foliage and owing to its

creeping habit of growth is likely to become a troublesome weed. The biennial yellow (*M. officinalis*) is a low growing variety which does not bear as much foliage as the white, though it possesses the same properties as a host for bacteria which store nitrogen in the soil. The chief value attaching to the biennial yellow lies in the fact that it blooms two or three weeks ahead of the white, and for this reason is much prized by beekeepers.
