

STORIES OF CAMP and WAR

BRIEF HISTORY OF 20TH U. S.

Organized by Order of President, May 4, 1861, and Made Up Wholly of Volunteers.

In response to a request for a brief history of the Twentieth U. S., the National Tribune makes the following reply:

The Twentieth U. S. was organized by order of the President, May 4, 1861, as the Second Battalion of the Eleventh U. S. It remained part of the Eleventh U. S. during the war, and in 1866 was separated from that regiment and completed as a separate regiment.

At the time of the reorganization of the Eleventh U. S. into a three-battalion regiment, the commander was Col. E. D. Keyes. It was made up wholly of volunteers and officers appointed from civil life, the only veteran at Fort Independence, where it was organized, being Orderly Sergeant Parr.

Their menace to navigation is always a very real and constant one, and hardly a ship that passed along the Newfoundland banks last year but had a report of ice written in her log.

"There was a distinct thrill in waking in the cold of early morning to a vigorous hammering on my door and the call of 'On deck, sir! Icebergs in sight!'"

DOWN LABRADORWAY

Goes on the Trail of the Giant Icebergs.

Interesting Story of the "Gray Ghost That Lies in Wait for hapless Vessels"—One Big Berg Was a Mile Long.

New York—"Some time after the Titanic went down I was possessed with the idea of going north in the hope of getting among the icebergs," writes James B. Corrington.

"I left New York on a summer day. The tar on the docks was soft from the scorching heat and even the breeze from the bay was hot. It was the beginning of one of the scizing spells of July.

"There was a distinct thrill in waking in the cold of early morning to a vigorous hammering on my door and the call of 'On deck, sir! Icebergs in sight!'"

In 1881 the regiment was transferred to the department of the Missouri, with headquarters at Fort Leavenworth. In 1885 the regiment was returned to the department of Dakota, with headquarters at Bismarck.

A "high" private of the 140th Pa., wounded at Chancellorsville, was taken to Washington. One day, as he was becoming convalescent,

"Hello, comrade. How do you know when your feet get cold?"

After Hunter's defeat at Lynchburg, Va., and on our retreat, we passed through a little town about four miles from Lynchburg.

"Madame, what is the name of this city?"

"Well," said he, "how far is it to Big Lick?"

"Faith, an' I won't draw me money out at all, at all."

FARM STOCK

DIFFERENT TYPES OF HORSE

Men of Science Have Recently Taken Up Study of Origin and to Differentiate Characteristics.

Horse breeding has been followed as a trade ever since animals were first domesticated, but the study of types has only quite recently been taken up by men of science.

The first type in this classification is the Celtic horse, found on the west coast of Norway, known as the Fjord

The Prejevalsky Horse, Specimens of Which Are Now Being Bred in the New York Zoological Gardens.

horse in Iceland, Faeroe, Barra, and other small islands of the outer Hebrides in northern Scotland, on the Shetland Isles, and in Connemara or northern Ireland.

The second type of horses is the Prejevalsky, found in a wild state on the steppes of central Asia.

Catching flies is affording a Shreveport (La.) man a profitable and independent living. He sells them to the city board of health.

Celtic Pony Developed in Norway for Show Purposes. He Shows the Characteristic Black Mark Down His Mane.

more inclined to believe that these big types are a species by themselves and shall call this family the third type.

The Arab or African horse forms the fourth type in our classification. His food is the grasses that grow on the ground, and his home has always been the open plains and hillsides remote from forests.

Raise More Live Stock. An exchange points out that our farmers should raise more live stock if they expect to keep up the fertility of their soils.

BOILED EGGS BETRAY THEM

Nationality of Dinners is Shown in Their Various Method of Eating.

Sherlock Holmes might have figured this out, but he did not!

A Frenchman, much like the Englishman, likes his eggs of three minutes, exactly. He then "peels" them, places them in a glass, stirs and mixes well together with salt, pepper and butter.

An egg is only fit in an Italian's estimation when it has been placed in cold water, and removed just as the water begins to boil.

The American is about the only one who prefers his eggs boiled hard. When they are served up to him, he knifes them in half, removes the contents into a glass, after which he adds a plentiful supply of pepper, butter and salt.

itching and burning

Iberia, Mo.—"I was troubled with scalp eczema for about five years and tried everything I heard of, but all of no avail.

England's Oldest Bowling Green. Which is our oldest recreation? There are not wanting archeologists who profess to be able to trace references to football and baseball on Egyptian mural tablets.

LONDON AND ITS LUMBER. London is the most conservative city in Europe, if not in the world. It loves its lumber. You may still see those notices attached to lamp posts which announce "Standing for Four Hackney Carriages."

To Identify the Corpses. In the blanks which life insurance companies provide their medical examiners for use in recording the data of the examination of the applicant for insurance, they provide a space for personal marks which may be used to identify the insured after death.

Good Magnet. Helper—We're going to have a big crowd here, and it'll be some job to keep 'em moving.

Ambiguous. "That actor has such finish in his work."

A Broken Heart Caused Death. A broken heart, caused by violent beating due to sudden emotion, was said by a doctor to be responsible for the death of Alexander Burness, sixty-four, a master tailor, at a London inequet.

Save the Babies. INFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent., or nearly one-quarter, die before they reach one year; thirty-seven per cent., or more than one-third, before they are five, and one-half before they are fifteen!

PUTNAM FADELESS DYES. Color more goods brighter and faster colors than any other dye. One lb. package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart.

Coca-Cola advertisement featuring a child with a glass of Coca-Cola and a bottle. Text includes "For That Picnic" and "Delicious—Refreshing Thirst-Quenching".

PARKER'S HAIR BALM advertisement. "A toilet preparation of merit. Helps to eradicate dandruff. For Restoring Color and Beauty to Gray or Faded Hair. 50c and \$1.00 at Drugstores." Includes an illustration of a man's head.

Saskatchewan Farms in Western Canada advertisement. "100 ACRE FARMS IN WESTERN CANADA FREE". "Your Opportunity is NOW in the Province of Saskatchewan, Western Canada".

Nebraska Directory advertisement.

BOILERS advertisement. "Vertical or horizontal—new or second hand. WILSON STEAM BOILER CO. Omaha".

GREEN GABLES advertisement. "The Dr. Benj. F. Bailey Sanatorium, Lincoln, Nebraska. Its brick and stone buildings so tastefully furnished and thoroughly equipped, in the beautiful park of 25 acres, with staff of experience and a nursing corps of unusual merit, offers you most perfect hospital results, yet always preserves the atmosphere of a delightful country HOME. Write for particulars."

PUTNAM FADELESS DYES advertisement. "Color more goods brighter and faster colors than any other dye. One lb. package colors all fibers. They dye in cold water better than any other dye. You can dye any garment without ripping apart. Write for free booklet—How to Dye, Bleach and Mix Colors. MONROE DRUG COMPANY, Quincy, Ill."
