This Government Won't Put Its Money

In a bank that does not guarantee it against loss. **Why Should You?**

The United States will not deposit a dollar in a National Bank, on any other bank, unless the bank furnishes a bond for twice the amount deposited.

The United States Government can at any time make an investigation of any National Bank and learn all about its resources. But still the Government demands a guarantee for its deposits—why shouldn't YOU have protection.

Your deposits in this bank are protected by the State Guaranty Law—no matter what happens **YOU CAN'T LOSE!**

WEBSTER COUNTY BANK
RED CLOUD, NEBRASKA

ANNOUNCEMENT

Having purchased the Stock of Furniture and Undertaking business of A. E. Atkins I will continue the business with a full line to supply your wants. I will guarantee the same square dealing as you have received in the past. I have secured the services of Mr. Atkins to remain with me indefinitely.

ROY SATTLEY

Furniture and Undertaking

Licensed Embalmer and Funeral Director

ALL THE PHONES

Roy Sattley Buys A. E. Atkins Out

On Tuesday the deal was closed whereby Roy Sattley became the new proprietor of the A. E. Atkins Furniture and Undertaking business.

Mr. Sattley needs no introduction to the people of this community, he having been associated with Mr. Atkins for the past three years. He is a young man, full of ambition, competent and obliging and no doubt will keep the business up to the usual high standard and enjoy the same liberal patronage which this store has enjoyed under the management of Mr. Atkins, which because of his ability to meet the most exacting demands, the business has been added to and multiplied in a very gratifying manner.

Among other things which goes to prove Roy Sattley to be level headed, and bent on reaching the top round in the ladder of success, (besides a short while ago getting married and deciding to locate in our midst permanently,) he recently passed the state board examination for embalmers, and is now a full fledged licensed embalmer and funeral director.

He has secured the services of Mr. Atkins, who will remain with him indefinitely. In this he was also very fortunate, as Mr. Atkins' business ability is a well known quality.

To the firm of Roy Sattley, Furniture and Undertaking, the Chief extends the glad hand and wishes for him success.

Speakers to Help Save Corn Crop

To aid in getting the most out of your corn crop, arrangements have been made whereby special meetings will be held in various parts of the state under the auspices of the Nebraska Experiment Station.

In localities where it seems advisable to hold special meetings the Extension department will supply speakers, who will suggest ways and means. These localities desiring meetings should make arrangements whereby representative crowds will be in attendance.

If your section is affected by the continued drouths and the corn is not in as good condition as it should be, make arrangements for a meeting. Arrangements can be made by correspondence with the Extension Department of the State University or through the Bureau of Publicity of Omaha, which will co-operate with the Extension Department.

Send for one of the booklets or both, "The Value of Fodder and Silage For Feeding Purposes" or "The Method of Erecting Inexpensive Silos."

Make the most of your corn crop. You can save greatly by not neglecting your corn at this time.

The Chief suggests that the Red Cloud Chamber of Commerce make arrangement for a special meeting to be held here. A large crowd would no doubt turn out, and we believe the meeting would prove beneficial.

Who Could They Be?

A pair of hard looking citizens caused a furore in town, Monday, when they went ripping along our streets in a Maxwell auto at approximately three miles an hour. The occupants had the appearance of men borne down with anxiety, long tedious waits and much tinkering. Our marshal says if they pass this way again he will pull them on suspicion. The car they were driving had a lot of things the matter with it, including the wheezes, a harsh dry cackle and a desire to smoke up. Our garage men say the car came from up in the Red Cloud country, and that the driver is a son-in-law of Cale Jones. — Smith County (Kansas) Pioneer.

Institute Is A Big Success

The Webster County Teachers' Institute is in session in the Washington school building this week, and our able County Superintendent, Miss Gertrude L. Coon, is to be complimented on the attendance she has at the institute this year. This is sufficient evidence that the teachers recognize her leadership at the head of the rural schools, and rally to her support as well as appreciate her efforts in trying to make the Webster county schools give to the boys and girls the training which they need. Miss Coon is assisted in the work by Miss Ethel Ranney, who has proven to be a very able assistant and creditably fills that very necessary sphere of looking after all the details which are found at a meeting of this kind.

The instructors are Dean E. L. Rouse of Peru State Normal, Miss Mary Ellen Brown of the State University of Lincoln and Supt. G. E. Bixby of Blue Hill, all of whom are putting forth their best efforts to give the teachers in attendance helpful suggestions and ambition necessary for successful teaching.

Hot weather prevails, but the attendance has kept up, and all are good natured and jovial.

On Tuesday Deputy State Superintendent Elliott was present and gave a very able address. The talks of the visitors have all been very profitable to the teachers.

Superintendent K. D. Moritz gave two very able lectures, and many remarks were heard among the teachers concerning the helpful suggestions and new ideas they were able to obtain from his talks.

Tuesday evening Rev. E. N. Tompkins gave his stereopticon address on "Yellowstone Park." A large attendance listened to his realistic description of the scenes shown, and to his entertaining account of his travels, all of which afforded the teachers an opportunity of learning about this great scenic resort. After the lecture a reception was given to the teachers in the reception rooms of the church. Ices were served and a very sociable time was enjoyed by all present.

The Institute closes on Saturday with 8th grade graduating exercises, and the illustrated lecture of Miss Richardson of Los Angeles, California, on "Our Flag."

The Institute this year ranks among the best and most helpful to the county teachers that has ever been held here. Our county superintendent deserves the praise for it. She has worked hard for weeks to make it the success which it has proven, and no doubt a great load has been lifted from her mind on seeing it prove so beneficial and profitable to all the teachers.

Indians Will Play

The Genoa Indian School band will assist in furnishing music for the state fair, Sept. 1-5. In addition, the Geneva Girls' Industrial School band, the Nebraska State band, the Nelson Concert band and the Ord Concert band, will play. Liberati's band, assisted by ten grand opera stars, will give three free concerts each day in the auditorium and play a concert before the grand stand at 7 o'clock each night.

FOR SALE

1913 Model, Motor Cycles and Motor Boats at bargain prices, all makes brand new machines, on easy monthly payment plan. Get our proposition before buying or you will regret it, also bargains in used Motor Cycles. Write us today. Enclose stamp for reply. Address, LOCK BOX 11, TRENTON, MICH.

Widow's Pension

The recent act of April 10th, 1909 gives to all soldiers' widows a pension \$12 per month. Fred Maurer, the attorney, has all necessary blanks.

You Need a New Clock

Now is the time and here is the place to supply that need. We have on display right now the newest and best in the clock line for any room in the house.

Kitchen clocks, parlor clocks, hall clock, bed room clocks all included in this showing. Clocks that strike every fifteen minutes, others every half hour, others the hour only.

Prices run from \$1.00 to \$35.00 and every one full value for your money.

Get The Most Out Of Your Damaged Corn Crop

The continued drouth and warm weather has seriously damaged the corn crop in many parts of the state, according to Prof. C. W. Pugsley, head of the Extension Department of the State University. Under present conditions, much of the corn can be saved for feeding if proper attention is given and the corn is not neglected.

Reports which have come to the Extension Department indicate that the damaged sections are in every part of the state though the southern part is more affected than other sections. Requests have been pouring in to Pugsley, asking suggestions as to the best method of getting the most out of the corn crop.

Realizing that the condition is general, Pugsley has requested the Bureau of Publicity to co-operate with the Extension Department and the newspapers of the state in disseminating news relative to the condition. "Nebraska is not affected as much as other states" says Professor Pugsley. "However, that does not prevent us getting as much out of the corn crop as is possible. Generally speaking, Nebraska has been fortunate in her crops this year, especially small grain. But the corn crop has been affected and now it is up to us to get all we can out of the crop."

Most of the queries are "How is it possible to get the most feed out of the corn crop?" By properly handling it is often easy to get from many fields sufficient feed to carry the stock on the farm through winter.

Pugsley suggests three ways. One way is to let the corn plant stand in the field and then pasturing in the winter. Pugsley characterizes this as the poorest method as often times much of the dried-up portions will blow away, little feeding value remaining.

Another and better method is to make fodder of the corn by cutting at the proper time. In this way it is possible to save much feed from a field which would otherwise yield very little. Many prefer to shred the corn, the claim being that this enhances the feeding value of the yield. Professor Lee of the Department, says the best method is to put as much corn as

possible into a silo. Prof. Lee is authority for the statement that one-half more cattle can be wintered on any field of corn if that corn is put into a silo instead of being cut for fodder.

"If you have a silo, by all means fill it," is the advice from the Extension Department. In this emergency, it is not suggested that expensive silos be erected. However, Professor Chase of the University says a silo may be built for the purpose of saving injured corn by a small outlay of money. Chase states that a wooden silo holding 80 tons, may be built for about \$120, and will last several years. Also that the same sized silo may be built in the ground at a cost of from \$16 to \$25.

Now is the time to get the most out of the corn crop. In some sections, now is the time to put the corn in silo or cut it for fodder. In other sections, it can be left for several weeks, unless weather conditions become very severe.

As long as the corn is growing fairly well, it is better to leave it in the field, but in case hot, dry weather continues and the corn burns, it is better to cut it for feed. If a silo is to be built, no time is to be lost.

A bulletin on the value of fodder and silage for feeding purposes and another on the method of building inexpensive silos, have been prepared by the Extension Department. Either or both of these may be had free of cost by writing either the Bureau of Publicity, Omaha, or the Extension Department, State Farm, Lincoln.

Farmers are urged to save as much of the crop as possible. Either cut it for fodder or put it in a silo. Do the one you prefer.

State Taxes Increased

Webster county this year will be called upon to pay \$14,473.33 more in state taxes than it did last year. The state levy has been increased from 5.2 mills to 7.8 mills.

The amount of state taxes levied this year and last on Webster and adjoining counties are as follows:

	1912	1913
Adams.....	\$39,704.05	\$59,726.41
Clay.....	42,211.96	62,237.31
Hall.....	40,288.52	61,764.70
Webster.....	27,583.68	42,050.01
Kearney.....	22,359.22	33,517.64

New Court House A Certainty

The new court house for Webster county is now a certainty. Some 15-18 signatures to the petition which was circulated was secured and the county commissioners who met as a Board of Equalization on yesterday morning, adopted a resolution for a levy of four mills for the year 1913, 1914, and a sufficient sum for the year 1915, to make a total of \$85,000. This said sum is to cover all expense of tearing down and removal of the old court house, as well as for the erection of the new one.

Plans and specifications for the new building are to be submitted to the board, after which bids will be received and the contract let according to law.

It is indeed gratifying to know that the dream of years is soon to be a reality, and to Geo. Hummel and others being due credit for their faithful work along this line.

Special

Maple Ice Cream and Strawberry Sherbet every Saturday and Sunday at the Puritan Cafe.—H. Ludlow, Proprietor.

Corn Crop Badly Damaged

Reports from two-thirds of the counties in Nebraska according to the Omaha World-Herald show that the corn crop is badly damaged, to say the least. Without immediate rain, and in abundance, not even half a crop will be insured in many places. Baking hot winds that swept the state during the past week have ruined the growing corn, experts declare.

Grain men from every section of the state are of the opinion that the dry weather and hot winds have cut the crop of corn at least 25 per cent. In many places the loss will exceed this, while in others it will run less.

In some of the counties reporting it was said farmers now are cutting their corn for what feed it will make. From other sections came reports of satisfying rains that will insure a part of a crop of corn.

Apples For Sale

800 bushels of Sprayed Summer Apples—windfalls 25c or 5 bu. for \$1. Picked apples 50c per bu. At my farm 3 miles southeast of Inavale.—D. G. Norris.
