FINANCE AND COMMERCE.

FINANCIAL

NEW YORK, August 14.
Money—In better demand at 4 1/2 per cent; closed offered at 1 per cent.
Prime Mercantile Paper—5 1/2 per cent.
Sterling Exchange—Bankers' bills weaker at \$4.82; demand, \$4.81.
Governments—Lower for 4's and 4 1/2's.

Stocks—Opened 1/4 to 1/2 per cent lower than the close of last night for the general list of active stocks, the largest decline being in Washab preferred and Omaha preferred. The pressure to sell was at first only moderate, but was soon increased by heavy short selling directed against the Lackawanna, St. Paul, Northern Pacific preferred, Oregon & Transcontinental, Lake Shore, Union Pacific and New York Central. The effect was to bring out the pretty large amount of stock of the last six of the above which they all declined, carrying the rest of the market with them and causing considerable amounts of other stocks to be thrown upon the market.

Among these was the Chicago, Burlington & Quincy, which declined 2 1/2 per cent on sales of only about 1,300 shares, which was probably nearly all the long stock. The extreme of the decline was reached about 10:30, at which time the decline on the Oregon & Transcontinental was 4 1/2 per cent, Chicago, Burlington & Quincy 2 1/2, Jersey Central, 2 1/2, Northern Pacific common and preferred 1 1/2, Pacific Mail 2, St. Paul, 1 1/2, Western Union 1 1/2, Lackawanna 1 1/2, Illinois Central 1 1/2, Lake Shore 1 1/2, and Washab 1 1/2.

From these extreme declines there was a general and very rapid recovery by 11 o'clock, ranging from 1/4 to 3/4 per cent, the latter on Oregon & Transcontinental to 6 1/2, and from that time until 12 o'clock the market continued firm and there was evident recovery of confidence, not only as regards the day, but largely also as regards the prospect for futures of general market. This was in some measure due to the belief that the break was artificially produced and that without the hammering of the bears the market would only have continued dull and comparatively steady. This was the general feeling up to 12 o'clock, at which time the suspension of George W. Ballou & Co. was announced. The announcement of the failure at first caused a decline of 1/4 to 1 1/2 per cent in the market, from which it reacted in 20 minutes to 1 1/2 per cent, the latter on Lake Shore. At 12:30 the market was at the highest prices of the day for a good many stocks and strong but feverish. The total sales up to 12:30 were about 350,000 shares.

After 12:30 the market was at first stronger and there was an advance from 1/4 to 1 1/2 per cent, the latter on Oregon & Transcontinental to 6 1/2, and 1 per cent on Union Pacific. After 1:30 there was a decline of 1/4 to 1 1/2 per cent, the latter on Oregon & Transcontinental, with 1 1/2 on Washab preferred, 1 on Northern Pacific, 1 on Union Pacific, 1 on Washab common, and less than 1/2 on the rest of the list. These changes left the market a little lower than at 12:30. About this time also there were begun sales for account of Ballou & Co. and during the day 18,400 shares of stock and \$44,000 in bonds were closed out for account of the firm. The majority of stocks closed out were bought in on short account, and Ballou & Co. state that the great bulk of their liabilities were on short sales. The feature of the market in the last hour was a decline of 3/4 per cent in Western Union to 7 1/2. This was a puzzle to the street, as the stock had been pretty well sustained all day, the largest previous decline being 1 1/2 per cent in the earlier part of the day. The explanation given for the break was that a number of stop orders were in the market, which the bears discovered. After the bears' pressure was removed the market moved up, clearing itself of the underdone is much stronger than generally supposed. Before the close the Western Union recovered 2 1/2 per cent of the decline in the previous half hour. The whole market declined in the early part of the last hour to 1/4 to 1/2 per cent, the latter on Missouri Pacific, and when the Western Union recovered the rest of the market did likewise to a limited extent. In the final dealing the market declined 1/4 to 1/2 per cent, the latter on Western Union. The net result of the day's business is an advance over the closing prices last night for the great majority of stocks.

The Evening Post says: The majority of operators are inclined to believe the market has touched the bottom, at least for the present, though it is apparent it is now more subject to manipulation than at any previous time for a year, and though there is nothing in the general state of business to cause any very important further decline, some violent fluctuations are likely to be caused yet by artificial means. After the exchange closed a number of leading bankers expressed themselves as feeling more confident of the future. Liquidations going on for some time have resulted in placing the market on a healthy basis and already there are indications of investment. The public both here and abroad are purchasing.

The sales of stock according to the official list of the stock exchange amounted to 576,770 shares. A broker who did not leave the room all day estimates that at fully 700,000 shares. The change in railway mortgages is more important than for some time past. The Iron Mountain general, dropped 101 points to 60; the Oregon & Transcontinental firsts, 5 to 10; Denver & Rio Grande consols, 85 to 85 1/2; and Denver & Rio Grande western firsts, 5 to 7 1/2.
