FOR THE SPECIALIST.

Has long been acknowledged and more so at this day than any other. The vast field of medical science is ever increasing, and its numerous branches are brought nearer and nearer to perfection, and no one man can any longer grasp them all Hence the necessity for dividing the labor. And it is true beyond all doubt that disease, affecting the genito-urinary organs need special study more than anything else, if we would understand and know how to treat them properly.

DR. H. WAGNER is fully aware that there are many physicians, and some semsible people, who will condomn him for making this class of diseases a specialty, but he is happy to know that with most porsons of refinement and intelligence a mere enlightened view is taken of the subject, and that the physician who devotes himself to relieving the afflicted and saving them from worse than death, is no less a philanthropist and benefactor to his race than the surgeou or physician who by close apolication excels in any other branch of his profession. And fortunately for humanity, the say is dawning when the false philanthrophy that condemned the victims of folly or crime, like the lepers under the "Jewish law, to die uncared for has passed away.

Plain Facts Plainly Spoken.

Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was entirely avoided by the profession, and medical works of but a few years ago would hardly mention it.

To day the physician is of a different opinion; he is aware that it is his duty—disagreeable though it may be—to handle this matter without gloves and speak plainly about it; and intelligent parents and quardians will thank him for doing so.

The results attending this destructive vice were formerly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not invite cless investigation, it was willingly ignored.

The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitement once experienced, the practice will be repeated again and again, until at last the habit becomes firm and completely endaves the victim. Mental and nervous afflictions are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassitude, dejection or irrascibility of temper and general debility. The boy seeks seclusion, and rarely joins in the sports of his companions. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams, emissions and eruptions on the face, etc., are also prominent symptoms.

If the practice is violently persisted in, more serious disturbances take place. Great palpitation of the heart, or epileptic convulsions, are experienced, and the sufferer may fall into a complete state of idiocy before, thally, death relieves him.

To all those engaged in this dangerous, practice, I would say, first of all, stop it at once; make every possible effort to do so; but if you fail, if your nervous system is already too much shattered, and consequently, your will-power broken, take some nerve tonic to aid you in your effort. Middle Aged Men.

There are many at the age of 30 to 60 who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of this milkish hue, again changing to a dark and torpid appearance. There are many meny men who die of this difficulty, ignorant of the cause, which is the second stage of scannal-weakness. Dr. W. will guarantee a perfect cure in all cases and a healthy restoration of the genito-urinary or gains.

Relief to the Afflicted.

In medicines, as in science, the specialists are the ones who always comes to the front and a complish great results. This remark is especially applicable to to Dr. H. Wagner, of this city. He stands at the top of his profession, and the cures he performs for the unfortunate would seem wonderful if not properly viewed in the light of scientific acquirements. He is endorsed by the most eminent of the medical faculty. His office at 343 Laramir street, where he will speed; ily effects care for the suffering of either sex, no matter how complicated their complaint.—Pomeroy, Democrat.

Chronic Complaints Require Time for a Cure.

Persons at a distance who wish to be treated by Dr. Wagner need not feel backward because of inability to visit him. If they will write to the doctor he will send a list of questions which enables him to send medicines, counsel and advice to thousands he has never seen. He has patients in every city, town and station in Colorado, as well as allower the United States. See his address in his advertisement.—Den ver Tribune.

Shall We Reform?

Specific remedies for all diseases is the theory practice at present of educated and experience physicians, and in all large communities they have their specialties, to excel in which they direct their studies and practice. Dr. Wagner is a successful illustration of this modern school of specialties, and his imprecedented success in the treatment of private diseases is as wonderful as it is flattering.—Prof. J. Simms.
