In 1870 Scrofulous Ulcers broke out on my body until my breast was one mass of correction. Some of these ulcers where not less than one and on half inches in diameter, the edges rough, ragged and seemingly dead, the cavity open to the bone and filled with offensive matter. Everything known to the medical faculty was tried in vain. Gradually the bone steelf became diseased, and then the suffering began in earnest. Bone Ulcers began to take the place of those hitherto on the surface. I become a mere wreck. For months at a time could not get my hands to my head because of extreme soreness. Could not turn in be 1. Knew not what it was to be an hour even free from pain. Had reason to look upon life itself as a cure. In the summer of 1880, after ten years of this wretched existence, I began to use the Cuticura Remedi's, and after two years' persistent use of them the last Ulcer had healed. The dread disease has succumbed. All over the breast where was once a mass et corruption, is now a healthy skin, My weight has increased from one hundred and twenty-three to one hundred and fifty six pounds, and the good work is still goingen. I feel myself a new man, and all through the Cuticura Remedies.

COLD NIGHTS FOR CORN.

Missouri, Kansas and Nebraska the Only States Showing An Increase.

The Wheat Harvest 17 Per Cent Less Than Last Year-The Harvest Generally.

Washington, September 10—The September returns of the Department of Agriculture indicate a lower condition of corn than in August, in every section of the country and in nearly every state. The only gains in the West are in Missouri, Kansas and Nebraska in which a light improvement is indicated, Minnesota stands as in August; Arkansas makes a gain of one poitn; Geor, ia and Alabama remain as in August, and all the other cotton states show a heavy decline. The figures are also much reduced for each of the middle states and corn surplus states show changes as follows: Ohio, a reduc-tion from 89 to 82; Michigan, 68 to 60; Indiana, 95 to 85; Illinois, 86 to 80; Iowa, 85 to 80. The increase in Missouri is 80 to 84; Kansas, 99 to 101; Nebraska, 84 to 87. The decline is New York is 90 to 77, and Pennsylvania 99 to 89. The general average condition on the 1st of September was 84 per cent, a

decrease of 5 per cent during the last nonth. The cause of this reduction, so nearly universal, is drought, which is reported from nearly every state of the Atlantic coast, Gulf coast, and the Ohio valley, and from the Mississippi to the crest of the divide between that river and the Missouri. Between the Ohio river and the lakes the distribution of rain has been unequal, in a few places in excess, while the deficiency is general. The crop is nearly everywhere late requiring one to two weeks longer to mature. Where Kansas and Missouri seed was planted in more northern territory, the crop is still later, causing much apprehension as to ripening where plant-ing was later and early season too wet. The average temperature of the summer has been low, making full yield an impossibility. Telegraphic communication is to the effect that they were captured by cowboys, near Georgetown, Colorado, afternoon, shows that the recent frosts damaged corn north of the 40th parallel. The Ohio agent places the injurp at 2

per cent. The Indiana agent estimates the loss at 10 to 20 per cent. in the north-57,000 ern belt, and 5 per cent. in the middle belt. The loss is heavy in Wisconsin and Minnesota. the heaviest corn of the west is beyond serious injury.

The condition of the return averages 83,

which indicates a product of 17 per cent. less than the yield of last year, or loss of 8,600,000 bushels.

The crop of oats will be large, the general average being 99. The promise for potatoes is good, rep-

resented by 95, three points higher than the reported average of September, 1882 The Damage by the Frost.

CHICAGO, September 11 .- The Far-

mers' Review, from very extended advices, will publish in to-morrow's issue, the following comment on the injury to corn crops: Recent frosts of greater or less severity have been experience throughout Minnesota, Wisconsin, Northern and nor hwestern lows, northern Illinois and Indiana, and the entire state of Michigan, causing serious in ury to late corn. The extent of this injury is imposible at this writing accurately to determine. In all the territory visited by the frosts some fields were so fully matured as to receive no damage. In many parts corn on high ground escaped injury, while that on low ground was severely cut. It will be safe, we think, to estimate the injury in the territory named at 25 per cent of the estimated crops. It may exceed this estimate. Throughout the same territory where minor crops, such as tobacco, hops, tomatoes, and other tender garden vegetables, as well as grapes, were greatly injured or utterly ruined. In Kansas, Nebraska, southern and western Iowa, southern Illinois and Indiana and all other portions of the corn-producing country

no material injury is reported. The Collapse in Corn. CHICAGO, September 11. which the corn market experienced yesterday suffered a reaction to-day. The heavy speculation indulged in by outside customers in anticipation of a sharp rise in prices, has apparently resulted disastrously for them. The market displayed signs of weakness from the opening and outside buying orders having fallen off, prices fell back very generally where they stood Saturday. Oats were steadier as compared with corn, though they were shaded off slightly. Wheat also showed a decline under yesterday's quotations.

The Harvest in New England. Boston, September 11.—Crop returns from Maine, New Hampshire and Vermont, shows a fair condition. The yield in Maine: V heat will yield 712,598 bush els; oats, 761,713; barley, 293,377; buck. wheat, 300,000; rye, 30,000.

Vermont grain of all kind looks The estimated yield of the principal crops is: Potatoes, 35,000,000 bushels; oats, 309,300; wheat, 312,000; corn, 2,056,000; barly, 173,500; buckwheat, 370,000. The season has been favorable for the production of butter and cheese. Wool will probably fall below the aver-

In New Hampshire the returns indicate a large yield of cereals and potatoes. The following is an estimate: Corn, 1,-325,126; oats. 1,072,541; barley, 77,287; wheat, 174,806; rye, 35,093; potatoes, 3,480,000.

THE JAMES GANG.

The Confession of a Dead Member Made Public for the First Time.

Kansas City, September 11.—In consequence of the recent publication of Dick Liddill's statement regarding the history of the James gang, Police Com-missioner Craig of this city has given out the confession of Clarance Hite, made to officials at Jefferson City, and which is published to-day. Clarence Hite, the youngest of the band, was captured in Kentucky shortly after Liddill's surrencomplicity in Winston and Blue Cut train robberies. He pleaded guilty in was sentenced to 25 years. This confession was made before Gov. Crittenden, Commissioner Craig and Sheriff Timber

The account of the movements of the The account of the movements of the gang during Hite's connection with it corresponds in all essential particulars with Liddill's gtory, and corroborates in detail Liddill's testimony at Gallatin, implicating Frank James in the Winston robbery. It also accounts for Frank's participation in the Blue Cut robbery, as told by Liddill and for which Lance.
