Diamonds as Security.

From the New York Times. A recent advertisement in a morning newspaper to the effect that \$500,000 worth of diamonds and jewelry were offered in exchange for real estate prompted a reporter to inquire who had o large a stock of gems for trading purposes. It was ascertained from the broker who is managing the transaction that the diamonds were the property of a diamond merchant who desired to lessen his stock, and it being the dull season of the year took this means of accomplishing that "I do not often have diamond trades," said the broker, "but I have managed several. I traded for several houses in diamonds not long ago, the largest amount being \$75,000. This was all paid in diamonds. A few weeks ago I traded a \$20,000 lot of diamonds for a house that belonged to a well-known society lady. After the bargain had been closed the diamonds deposited in my safe, and the deed brought out for her signature, she asked to see the stones. that my house in that little box? I won't sign the deed.' She did sign it, though,

but not until after much persuasion."

A member of a firm of diamond im-

porters said yesterday that there were just two houses in this country who imported over \$500,000 worth of diamonds last year through the custom-house. He was satisfied that neither of these establishments was disposing of its stock for much difference between the selling and buying prices, and it takes a pretty sharp and experienced buyer to avoid a deception in regard to the true value of a A short time ago a gentleman bought \$4,000 worth of stones from us for cash. A few days afterward he returned and said that he would purchase \$100,000 worth of stones, provided we would value them at ten per cent more than that if our opinion was asked by any person wanting to buy them. We refused as a matter of course, and he left the office. Last week a wealthy gentleman called on us and asked our opinion of the value of a number of diamonds he had with him. He said that he loaned a certain sum of money on them, and, as the loan had not been returned, the stones were forfeited. We examined them and found that he hadloaned much more than they were worth. To our astonishment found that all of \$4,000 sale were included in the lot. We told him of this fact and described the man, whom is readily recognized. 'I am glad,' said he, 'that I didn't let him have any more money. I offered to lend him from \$100,000 to \$200,000 on diamonds, provided he would let me call here and have them appraised.' I explained then how the scamp had tried to bribe us to help him cheat, and the loaner has permanently retired from the diamond There 'are tricks in all trades, but I think there are none to excel those in

Explosion and Fire.

our business.'

PITTSBURG, September 20.—Shortly efore 2 o'clock this afternoon a battery f boilers at the iron mill of Lyon, Short & Co., south side, exploded with terrific force, killing and injuring a large num-ber of persons. Particulars of the explosion have not yet been received as the telephone wires are down. The mill is now burning and the fire department and large force of police have been dispatched to the scene of the disaster.

Heavy Failure.

Boston, September 20.—Ben. J. Burcess & Son's, augar dealers, recently fail ed, have made an assignment to William C. Rogers and Franklin Haven, Jr. Liabilities approximate \$1,400,000 of which more than \$170,060 is acceptances. The principal assets for unsecured creditors are claims of 8700,000 against parties in quickly heals over. luba. The creditors are scattered.

Fire.1

Tucson, Arizona, September 20 .-The town of Benson was burned last night. Loss \$70,000. Insurance \$20,-000. The railway depot, Wells & Fargo's office and the post-flice were saved. It was the work of an incendiary.

FARM MATTERS.

Facts About Sorghum. The commissions of agriculture in a Real Estate Transfers.

The following deeds were filed for resued, states that the value of the seed of cord in the recorder's office, September sorghum is variously estimated. Many and hides. for the purpose of stock food, and believe Manon, real estate agent:

W. T. Henderson to C. M. Deval, lots
1, 2 and 3, block 1, Bayliss' 2d add... \$1.

C. M. Deval to E. I. Woodbury, lots
1, 2 and 3, block 1, Bayliss' 2d addition,
\$1, 2 and 3, block 1, Bayliss' 2d addition,
\$4,500.

E. I. Woodbury to E. K. Cory, lot 1,

Light 1, Bayliss' 2d add... \$2,200.

that its value goes far toward defraying the cost of cultivating the crop. One raiser boils the seed, and states that when prepared this way and fed to hogs it is same quantity of corn. The average production seems to be from twenty to think 1, Bayliss' 2d add... \$2,200. that its value goes far toward defraying thirty bushels per acre, and its value is stated in one locality to be 75 cents per bushel. Other by-products do not seem to be utilized, although it is stated in one section that the first skimmings have been found to make good fertilizers, and that the last are rich in sugar and make good vinegar. In cases where wood alone is used it is found that it usually takes one-half cord per each one hundred gallons of syrup. Soft coal is also used at the rate of about one thousand peunds to each one hundred gallons manufactured. In addition to these articles used as fuel there are found many cases where the bagasse is used as auxiliary to one or the other, and one case is reported where bagasse is used alone for running an ordinary evaporator. The price of coal is not given, and that of wood, when purchased, varies from \$1 to \$2 50 per cord. There is one report of the return to the land of the ashes of bagasse, but the results not stated. An estimate of the profit of alone. raising an agre of sorghum has been furnished, and this profit, based upon an estimated production of ten tons per acre, is placed at \$10 25 for each acre. The average price realized for sirup; the neglect to state whether board is or is not included in the average wages paid; whether or not the value of the owner's

> have been calculated; whether the fuel usually cut from the farm has been measured and accounted for, with other considerations, make it difficult to compute in an intelligent manner the profit of the manufacturer. The cost of producing an acre of sorghum is stated at from \$5 25 to \$6 38 as it stands in the field, and delivered at the mill, from \$10 to \$15. The cost of manufacturing a gallon of sirup, after the cane is stripped, is placed at from 5³/₄ to 6¹/₅ cents per gallon. Including the price of the cane, placed at \$1 50 per ton, the cost of production per gallon is placed by a large manufacturer at 23 cents, including 4 cents per gallon

Sprouted and Unsprouted Potatoes.

for barreling.

The Massachusetts Ploughman records an experiment which goes to prove that unsprouted potatoes are the best for planting: "To test the difference between octatoes that had been sprouted and those There is a marked difference in the size one for all parties concerned. and vigor of the stalks and leaves, those anything excepting money. "Diamonds are largely used for trading purposes," he said; "they bring a ready sale and command a staple price. There is, however, the said; however, the said; "they bring a however, they be a staple price. There is, however, they be a staple price. There is, however, they be a suppose the said; "they bring a the said; "the seed could be kept in a cool place where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any, yet kept in good condition, probably late potatoes where it would not sprout any yet kept in good condition, probably late potatoes wher by sprouting."

Apples for Cows. Economy may run sometimes wild, when it is a very costly substitute for the who are moderately well-to-do and who tame article. It runs wild when one yet want to keep up appearances. "saves at the spigot and wastes at the very poor and the extremely rich are Hunt's Remedy, I was completely cured. bung. makes the cow do such scavenging work as the gathering of fallen wormy apples of this stratagem. I've known of some type to use my name in ary manner you may desire.

JOHN W. JOHNSTON, in orchards on the rotten windfalls. We very aristocratic couples starting out on do not want any worms in ours, however their matirmonial journey with an elopewillingly others may take their milk thus ment which was caused by nothing on flavored. To put the cow to this busiiness is to put "filth" into the milk. There is nothing in an unripe wormy apple that can add a particle to the raw material from which a cow produces milk; and judging of a cow's stomach by they are innocent parties to the decepa man's—and there is a reasonable physical tion. This is an easy way to look at an ological analogy between them—it is not elopement, and it knocks out all the reprobable that a mess of hard, unripe, sour apples will be either aid or comfort good many, as I know from personal ob to the cow in her daily work. Apples servation. are of questionable use, in any way and at any time, for cows fodder. We have frequently given them to cows, and also fed the pomace from the cider mill, principally because the animals evinced a desire for them; but always and without exception the line has decreased in consequence, and sometimes very considerably. There is no doubt that at times some acid food is healthful even for a cow. One may healthful even for a cow. One may healthful even for a cow to some extent. always and without exception the milk never in regard to the quantity of it. This is the duty of the feeder to regulate. But sometimes the cow's appetite is abnormal and unhealthful and then requires to be controlled, and this control is necessary in regard to devouring unripe wormy apples, as much as in regard to over-drinking water from foul puddles, branches in excess thereof. There is sume wormy apples which fall from the good outlook for a full average demand water. Hogs may perhaps safely contrees, but cows must not be treated as hogs are by any means.

Indian Territory. One of the best coatings for tree effectually excludes air and the wound

Pear trees come into bealing after prices.

The roofs of barns should be steep, and

make them more durable. Straw and dirt collect under flat-roofed shingles and cause rapid decay.

Texas farmers sold last year \$59,000,000 worth of cotton, \$53,000,000 worth of cattle, \$7,000,000 worth of weel and mutton and \$1,000,000 worth of horses

Although the frost may have injured such crops as sweet pet stoes, yet it is well to allow the potatoes to remain in the ground as long as the vines appear green, for more or less growth is being made, and if rains occur the prospects will be better for an increase of the crop, and as the season is still early no harm can be done the potatoes by remaining in the ground a little longer.

An experiment was tried years ago in England, as to the relative value of horses and oxen for agricultural labor. The oxen ate 250 pounds of turnips day, each. Each horse ate sixteer pounds of oats daily, both having oat straw ad lib. The conclusion arrived at was that there, on farms, horses should be used exclusively.

As windgalls are of frequent occur-

rence, and often seem a bugbear in the eyes of some, we give the following from the Veterinary Journal, which is good authority on the treatment of the different diseases of horses. It says: "Windgalls may be removed by a strong decocmay be reduced by blistering, subsequent contraction of the skin. As they appear on colts and do no injury unless attended with inflammation, it might probably be policy to let them

A writer says: Sheep often go a long time without drinking, especially if in a pretty good pasture, and the dews are so neavy that they can fill up with wet grass in the morning; but when they do want to drink water it is as necessary to their health and comfort as to that of other animals. Therefore keep a supply of time, or that of the services of his team pure water in the sheep pastures as much as in any other, and if the sheep do not drink from it give them a little salt once a week. They should have salt as often as once a week under any circumstan-

RUNAWAY MARRIAGES.

The Economical Side of Elopements in Indiana and Kentucky.

souisville Courier Journal. known physician to a Courier-Journalist, yesterday, as he threw down a paper containing an account of a runaway in which the daughter of a local politician figured as the heroine

"What's bosh, doctor?" asked the re porter, on the lookout for a possible

"Why, this runaway match you have just published. That girl's father is a which had not a small piece of land was sharp man, but this is one of the sharpest planted June 10; the sprouts were six tricks he has ever played since I knew inches or more in length; they were him. That elopement was all a sham. handled very carefully so as not to injure them, and planted with the sprouts above or is one of the best-known men in this ground several inches. As the potatoes had been kept in the dark the sprouts sides. He has, necessarily, a very large were white and very tender, so much so that it was expected they would dry up and die before night, but much to our the slightest pretext, and, what with this and die before night, but much to our surprise they gradually turned green and soon began to grow; by the side of these was planted, at the same time, a portion of the same lot of potacoes, with the sprouts all taken off; began to grow appeared above ground the sightest pretext, and, what with this and the wedding festivities—supper and other etceteras—his daughter's marriage, solemnized in the ordinary manner, would have cost him a great deal of money. An elopement saved all this, so he just optom these appeared above ground manner, which is daughter's wishes at ready. fore these appeared above ground posed his daughter's wishes strongly I was recommended to try Hunt's Remedy, as it had those with the sprouts left on were near-enough to give a pretext to the two te ly a foot in height, with stalks nearly twice as large as those from the sprouted seed were when they had attained the same size. and, on the whole, are attended with a fair degree of success. In Wisconsin and Minnesota the manufacturing industries are enjoying a full tide of prosperity, notably the agricultural-implement works, foundries, machine-shops, and established by the greatest railway in America. tion of white oak bark and alum. They and Minnesota the manufacturing industablishments for the production of hardware specalties finding ready sale in that

Chicago industries, under the influence of the demand from the Northwest and West, are in the main in receipt of a fair amount of orders and are running on full

Pittsburg, industrsusly speaking, is in better shape—than one might—have been led to believe considering the drawbacks which have made themselves felt. The glass manufacturers, many of them (as in New Jersey), have a fair trade, and are looking for an improvement owing in part to the strikes among glass-makers at the West, which is expected to cause a diversion of trade to the East. Manufacturing is in better request than for some time past, and while demands continue to be based largely on presentneed, purchas es are becoming more frequent, and mills are running on full time.

Philadelphia reports an improved industrial situation. The chief disturb "That's all besh," remarked a well ance, therefore, to the manufacturing industry of the country continues to be with the mills producing the lower grades of cotton fabrics at Philadelphia, and particularly in New England, as noted in Providence and Beston reports But even in these the prospect not as unsatisfactory as it was some time ago.

On the whole the industries appear to be moderately well employed, though at narrow margins of profit. Orders are small, but frequent, and promise to continue in good number. This is a health ful condition, at least.

been used in several such cases here in Portland and time troubled with a weakness and inflammation the bladder, with a complication of other diseases pe culiar to women. After using only two bottles sl has been completely cured; and I can say that my wife is loud in praise of this wonderful medicine, and alysis of 100 bottles S. S. S., one particle of Mercury, I would highly recommend it to all who are suffering from kidney diseases or diseases of the bladder."

Pertland, Me., May 11, 1883. I hereby certify that I know the facts of the sick ness of Mrs. E. K. Heath, and that they are correctly stated in the foregoing certificate, and her cure was ecomplished by the use of Hunt's Remedy. A. W. SMITH, Druggist.

Cor. Portland and Green Streets. NO MATERIAL CHANGE.

This is to certify that I have used Hunt's Remedy for the kidney complaint, and derived much much benefit from its use.
