THE NECESSITY FOR THE SPECIALIST,

DR. H. WAGNER, BEMIS

Has long been acknowledged and more so at this day than any other. The vast field of medical science is ever increasing, and its numerous branches are brought nearer and nearer to perfection, and no one man can any longer grasp them all Hence the necessity for dividing the labor. And it is true beyond all doubt that disease, affecting the genito-urinary organs need special study more than anything else, if we would understand and know how treat them properly.

DR. H. WAGNER is fully aware that there are many physicians, and some sensible people, who will condemn him for making this class of diseases a specondemn him for making this class of diseases a specialty, but he is happy to know that with most persons of refinement and intelligence a more enlightened view is taken of the subject, and that the physician who devotes himself to relieving the afflicted and saving them from worse than death, is no less a philanthropist and benefactor to his race than the surgeon or physician who by close application excels in any other branch of his profession. And fortunately or humanity, the day is dawning when the false philanthrophy that condemned the victims of folly or crime, like the lepers under the "Jewish law, to die uncared for has passed away.

Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was en tirely avoided by the profession, and medical works of but a few years ago would hardly mention it. To-day the physician is of a different opinion; he is To-day the physician is of a different opinion; he is aware that it is his duty—disagreeable though it may be—to handle this matter without gloves and speak plainly about it; and intelligent parents and quardians will thank him for doing so.

The results attending this destructive vice were formerly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not invite close investigation, it was willingly ignored.

its nature does not invite close investigation, it was willingly ignored.

The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitement once experienced, the practice will be repeated again and again, until at last the habit becomes firm and completely enslaves the victim. Mental and nervous afflictions are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassitude, dejection or irras-ibility of temper and general debility. The boy seeks seclusion, and rarely joins in the sports of his companions. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams, emissions and eruptions on the face, etc., are also prominent symptoms.

prominent symptons.

If the practice is violently persisted in, more serious disturbances take place. Great palpitation of the heart, or epileptic convulsions, are experienced, and the sufferer may fall into a complete state of idiocy before, shally, death relieves him.

fore, finally, death relieves him.

To all those engaged in this dangerous, practice, I would say, first of all, stop it at once; make every possible effort to do so; but if you fail, if your nervous system is already too much shattered, and consequently, your will-power broken, take some nerve tonic to aid you in your effort. Having freed yourself from the habit, I would further counsel you to go through a regular course of treatment, for it is a great mistake to suppose that any one may, for some time, be tevery so little, give himself up to this fascinating but dangerous excitement without suffering from its evil consequences at some future time. The number of young men who are incapaciated to fill the duties enjoined by wedlock is alarmingly large, and in most of such cases this unfortunate condition of things can be traced to the practice of self-abuse, which had been abandoned years ago. Indeed, a few months' practice of this habit is sufficient to induce spermatorrhoa in later years, and I have many of such cases under treat ment at the present day.

Middle Aged Men.

There are many at the age of 30 to 60 who are troubled with too frequent evacuations of the blad-der, often accompanied by a slight smarting or burn-ing sensation, and a weakening of the system in a er the patient cannot account for. On exan manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of thin milkish hue, again changing to a dark and torpid appearance. There are many meny men who die of this difficulty, ignorant of the cause, which is the second stage of seminal-weakness. Dr. W. will guarantee a perfect cure in all cases and a healthy restoration of the genito-urinary or-

Married by Photograph. A Madrid photographer has, according to The Archiv, had a strange sitter to deal with lately. A young lady came to his studio to have her portrait taken. Having placed her in position, he turned to arrange his camera, when casting a last glance at the posing belle before removing the cap from the lens, he was horrified a revolver to her temple. "Stop! stop! he cried; "you surely do not mean to kill yourself! You would ruin my business, and, besides, it would be a pity to spoil that pretty face! The lady laughingly replied: "It gives me no pleasure to spoil one of your most beautiful pro-ductions, but I will tell you what I mean. My betrothed has deserted me, and I intend to send him a copy of my photograph in this position, with the remark that if he does not return immediately I shall pull the trigger." This astonishing intention was duly carried out, and a few weeks later the photographer had the pleasure of taking the newly married couple without the revolver, which apparently had done its work harmlessly.

Although Pozzoni's medicated complexion powder is perfectly harmless and non-explo-ive, still it goes off and makes a good report. Sold by all druggists.
