CLEARINGS.

BOSTON, November 5.—Reports from 27 leading clearing houses of the United States for the week ending November 3d, gives the total clearances at \$1,107,276,733, being a decrease of 15 per cent compared with the corresponding week of 1882. The exhibit this week is an unfavorable one, both when compared with last week and with the corresponding week of last year. This loss is in legitimate trade, the movement of general merchandise during the week having been of more moderate character than for some weeks past.

THE DAY IN CHICAGO.

CHICAGO, November 5.—The grain markets opened today very active and soon became excited, growing intensely toward the close of the session. There was a general advance which, though not exceeding 1 cent, was stubbornly contested by the powerful leaders on both sides. Country and foreign orders were very numerous and the day's record altogether confirms the prediction made in these dispatches that a lively speculative era has begun. Wheat opened a shade higher and firmer on the strength of stormy weather. Liberal selling by the Kent and Walker crowd forced prices down about 1 cent. At this point an enormous buying movement began and amid the great excitement prices advanced 1 1/2 cents January closing 97 1/2@98c. Corn was equally active, trading in being enormous and larger than for many weeks. The bull element seemed to control it as well as wheat, and 66¢ for corn is freely talked of by parties who have hitherto been bearish. Prices showed a range of about 1 cent, the advances being fully offset by buying. Wheat and corn, and a number of different supply and shipment were circulated freely and confirmatory telegrams exhibited from the seaboard. Provisions took a hand in the general briskness of business and advanced for about 30c. On the call (which was the largest in a year) there was heavy and rapid buying. The improvement in all commodities was sustained at the close and was very firm. Curb offerings after the close of change were a fraction higher for every offering.
