"The honest settlers bemoan the constant evasions of the law which throw adjoining lands into the hands of nonresident speculators, hinder settlement and retard the development of the country. The bona fide settler wants neighbors, schools, churches, bridges and the comforts and conveniences of civilization, which he cannot have if all the lands in a township are held by a score of individuals, half of whom are nonresidents. I suppose in the Bismarck land district there are about as many lawyers as there are real farmers. A change is taking place in public sentiment there, however, and the people generally have begun to see that what

Some of the Big Grazing Fields Leased from the Cheyennes and Arapahoes.

St. Louis Republican, Nov. 13. Col. H. B. Denman of Washington, D. C., was in the city yesterday, having just returned from the Indian Territory. Col. Denman gave a Republican reporter at the Planters an interesting statement of affairs in the Cheyenne and Arapahoe agencies. Col. Denman says the Chey-erne and Arapahoe Cattle company, of which Mayor Cooper, of New York, is president, and he, Col. Denman, one of the executive committee, have leased 100,000 acres of land for ten years from the Cheyenne and Arapahoe Indians. They lease it at two cents an acre per annum. The tract covers an area of 43 miles square, taking in both the Cana-dian and Washita rivers, which flows through it. The famous antelope hills, where Gen. Sheridan gained a victory over the united tribes of Kiowas and Cheyennes, is included in the lease. The company is organized on the basis of \$1,000.000 capital. It is intended to place 60,000 head of cattle on the leased tract. A wire fence is now being constructed aroud the entire tract, making 172 miles of fence. Col. Denman has just passed over and inspected the entire track, and thinks it is one of the finest cattle ranges in North America, combin-ing as it does the three great essentials, wit: Varieties of the most nutritious wild grass, good running water scattered over the entire tract and ample shelter and protection furnished to the stock by the breaks and canyous of the rivers. Hon. Abram S. Hewitt of New York, and R. C. Kerens, of St. Louis, are interested in this enterprise. On the north of this tract lies the Cherokee strip, as it is called, comprising six million of scree. It has also been leased by the Cherokee nation to cattle compa-

nies. There are about 6,000 Arapahoes

and Cheyenne Indians located near Fort Reno, at their agency on the reservation. These Indians have leased to different

capital companies enough lands to yield them \$75,000 per annum, which is paid to them per capita This reservation is not at all adapted to agricultural purposes and heretofore has been wholly unproductive. It is purely a grazing country, for which purpose it is the way to utilize it for the benefit of the Indians. This may be regarded as fortunate for these Indians, because of the fact that the treaty stipulations giving them clothing, blankets and other dry goods annually have expired. They are, however,

ernment.

The Atlantic and Pacific railroad passes centrally through this region, which lies about 150 miles west of the present terresenting himself as a special United minus at Red Fork, on the Arkansas, States revenue agent, and his case will and when extended will make the trade go at once before the grand jury now in of this immense territory tributary to St. Louis. Col. Denman adds the following particulars: On the 10th day of The sheriff at Hebron, Thayer county, October the lessees of the Cheyenne was the first man to "get onto" the and Arapahoe reservation paid to the Indians the semi-annual rent, amounting to about \$32,000. This is the second Marshal Hastings, who telegraphed to made under these leases.

WAGNER,

Has long been acknowledged and more so at this day than any other. The vast field of medical science is ever increasing, and its sumerous branches are brought nearer and nearer to perfection, and no one man can any longer grasp them at Hence the necessity for dividing the labor. And it is true beyond all doubt that discase, affecting the gento-urinary organs need special study more than any hing cles, if we would understand and know how reat them properly.

DR. H. WAGNER is fully aware that there are DR. H. WAGNER is fully aware that there are many physicians, and some sensible people, who will condemn him for making this class of diseases a specialty, but he is happy to know that with most persons of refinement and intelligence a more enlightened view is taken of the subject, and that the physician who devotes himself to relieving the afflicted and awing them from worse than death, is no less a phianthropist and benefactor to his race than the surgeon or physician who by close application excels in any other branch of his profession. And fortunately or humanity, the day is dawning when the false phranthrophy that condemned the victims of folly or crime, like the lepers under the Jewish law, to die uncared for has passed away.

Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was entirely avoided by the profession, and medical works of but a few years ago would hardly mention it.

To-day the physician is of a different opinion; he is aware that it is his duty—disagreeable though it may be—to handle this matter without gloves and speak plainly about it; and intelligent parents and guardians will thank him for doing so.

The results attending this destructive vice were formerly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not invite close investigation, it was willingly ignored.

The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitement once experienced, the practice will be repeated again and again, until at last the habit becomes firm and completely enslaves the victim. Mental and nervous affections are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassitude, dejection or irrascibility of temper and general debility. The boy seeks seclusion, and rarely joins in the sports of his companions. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams, emissions and cruptions on the face, etc., sre also prominent symptoms.

If the practice is violently persisted in, more serious

bashfulness in their presence. Lascivious dreams, emissions and cruptions on the face, etc., sre also prominent symptoms.

If the practice is violently persisted in, more serious disturbances take place. Great palpitation of the heart, or epileptic convolsions, are experienced, and the sufferer may fall into a complete state of idiocy before, thally, death relieves him.

To all those engaged in this dangerous, practice, I would say, first of all, stop it at once; make every possible effort to do so; but if you fall, if your nervous system is already too much shattered, and consequently, your will-power broken, take some nerve tonic to aid you in your effort. Having freed yourself from the habit, I would further counsel you to go through a regular course of treatment, for it is a great mistake to suppose that any one may, for some time, be tevery so little, give himself up to this fascinating but dangerous excitement without suffering from its svil consequences at some future time. The number of young men who are incapacitated to fill the duties enjoined by wedlock is alarmingly large, and in most of such cases this unfortunate condition of things can be traced to the practice of self-abuse, which had been abandoned years ago. Indeed, a few months' practice of this habit is swiffcient to induce spermnorrhoa a later years, and I have many of such cases under treat ment at the present day.

Young Men Who may be suffering from the effects of youthful follies or indiscretions will do well to avail themselves of this, the greatest boon ever laid at the altar of suf-fering humanity. Dr. Waosez will guarantee to forfelt \$500 for every case of seminal weakness or private disease of any kind and character which he under-takes to and fails to cure.

Middle Aged Men.

There are many at the age of 30 to 60 who are troubled with too frequent evacuations of the bladder, often accompanied by a slight smarting or burning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of thin milkish hue, again changing to a dark and torpid appearance. There are many meny men who die of this difficulty, ignorant of the cause, which is the second stage of seminal-weakness. Dr. W. will guarantee a perfect cure in all cases and a healthy restoration of the genito-urinary organs. Consultation free. Thorough examination and ad-
