GRAND COOK

THE GREAT EVENT

of the season in years past has been the Charity Ball. For weeks it would be talked about, but now that it is given the 12th and 13th instants, it is the biggest bugle bid't appear by the car load.

No doubt the continued illness of Miss Thie Frelinghuysen, eldest daughter of the secretary of state, had much to do with the lagging interest, as she has in years past been the leading spirit and center, assisted by the greatest of the smiling presence and the gracious attentions of Count Von Kesson, who is now in Berlin tending charity and aid to Prince Bismarck at the German court. Of course Miss Frelinghuysen's "set" didn't go out of respect to her, a pretty compliment. The president went to the theatre that night to see Robson and Grene. He is very fond of the theatre and often goes, accompanied by a party of friends. Another thing that helped to make the ball a social failure was, Sam Randall went over to Baltimore to attend the charity ball given there the same evening. Alan Arthur, the president's son also went. There are those who prefer to attend a ball away from home, have more fun, Sam Randall needs looking after, he's getting giddy whirling around the country. His political walks through the south during the holiday recess were much admired, by the holders especially. Yet "awful charity" received regrets of a substantial nature and it won't matter much forty years from now if the charity ball was a social failure so that it was a financial success. Usually charity balls "cost" more than they come to, so to speak. Tuesday night following the ball came the

WASHINGTON SOCIETY.

Brilliant Social Gatherings Pictured by an Admirer.

Shadows of Coming Events—The Lights and Shades of Official Life and the Ups and Downs.

Special Correspondence to the Bee.

WASHINGTON, D. C., January 22.—Washington has now the appearance of being a big society cauldron where parties, lectures, germanos, Moody revival meetings, theatres, operas, amateur concerts, Appalman's water breakfasts, club and swell dinners, "cold teas," and brandy and soda midnight lunches are constantly bubbling and boiling over and over day and night. It takes a strong head to withstand the flattering pressure upon it, and a stronger stomach to resist the seductive temptations spread before it. Merely a question of full purses and physical endurance how long our votaries of fashion and folly can endure the tare and strain. And all of this whirl and excitement will be changed to "Washington markets" next summer. But there will be a chance for rest after the 4th of March, so "we'll live while we live" seems to be the prevailing maxim; yet how under the heavens they manage to wade through these days and nights that are ten feet deep with amusements and live, is something for a well regulated brain to ponder over. It will fairly take away your breath to hear half of the happenings of social life last week.

THE GREAT EVENT

of the season in years past has been the Charity Ball. For weeks it would be talked about, but now that it is given the 12th and 13th instants, it is the biggest bugle bid't appear by the car load.

No doubt the continued illness of Miss Thie Frelinghuysen, eldest daughter of the secretary of state, had much to do with the lagging interest, as she has in years past been the leading spirit and center, assisted by the greatest of the smiling presence and the gracious attentions of Count Von Kesson, who is now in Berlin tending charity and aid to Prince Bismarck at the German court. Of course Miss Frelinghuysen's "set" didn't go out of respect to her, a pretty compliment. The president went to the theatre that night to see Robson and Grene. He is very fond of the theatre and often goes, accompanied by a party of friends. Another thing that helped to make the ball a social failure was, Sam Randall went over to Baltimore to attend the charity ball given there the same evening. His political walks through the south during the holiday recess were much admired, by the holders especially. Yet "awful charity" received regrets of a substantial nature and it won't matter much forty years from now if the charity ball was a social failure so that it was a financial success. Usually charity balls "cost" more than they come to, so to speak. Tuesday night following the ball came the

PRESIDENT'S CARD RECEPTION

to the army and navy and congress in the White House was by far the finest given at the white house in our day. Everything that money, skill and art could do to make the entertainment a success was accomplished. The president outdid himself as an agreeable entertainer, thereby taking away the stiff formality that usually characterizes these gatherings. The ladies in attendance were simply magnificent, their dress, their manners of beauty and elegance. Surely fortune's favored sons and daughters were there that night, while the children of want were groping their way through the midnight blackness to some miserable hole for shelter. Much comment has been made upon the fact that President Arthur has paid the army and navy such marked attention, giving these special receptions in which they figure so much prominently. First the army and navy to meet the diplomatic corps, and the diplomatic corps to meet the army and navy, and then the navy and army to meet congress, and so on. I believe all officials of the government are invited, but the figure heads are the army and navy, with ladies belonging to their families. It has been the custom to give three evening receptions for the "dear public" during the winter, but this is going to be too plebeian for this age and administration; we must have "Caste," and what a caste it is too! However, this is President Arthur's business and his business is pretty well settled. At least he pays the bills, I suppose, and has the right to choose his guests; he must have away his time between now and the 4th of March; and besides, in the times of peace and harmony, with a few exceptions, these fostered children of the government have a chance to exercise their beautiful dukes and great talents. There are some noble men in the army and navy, and some insufferable snobs, who strut around the capital like game cocks, and in consequence of much conceited and loud insensible talking of the incompetency of the "vulgar herd, don't you know," they brought down upon their feet the nodules the wrath of congress and many others in public and private life, and most justly so. I remember hearing the wife of a navy officer, who, by the way, is now high and dry inland for repairs, boast that she considered it her duty to apologize whenever she had the occasion to introduce a member of congress to a lady friend; and yet this very woman is having afternoon oranges "brought" to play her part toward getting her husband a fat station on shore. So you see it is just a trifle humiliating to be asked to dance in attendance, or in other words to be a side-show at the whitehouse. Speaking of the army and navy, reminds me of the trials going on here of men who once held lofty positions. Who doesn't remember the case of Gen. Swain acted so well in poor Gen. Garfield's

OFF FOR NEW ORLEANS.

How the Old Liberty Bell Will Travel to the Crescent City.

Philadelphia Record.

The old Liberty bell will start on its long journey to New Orleans at 10 o'clock this morning. The bell has made its notable journey before, one across the ocean, which was brought from the maker, Robert Charles, in London, in 1752, and another in 1777, it was taken to Bethlehem to preserve it from the hands of the British troops, who were expected to occupy the city. It has been more than 100 years since it was brought back from Bethlehem. Its trip to that place was made on a cart, at probably five miles an hour. The journey to New Orleans will be made at fifty miles an hour, and its custodians will not be compelled either for sleep or food, to step off the train during the entire trip to the southern metropolis. Yesterday the bell was thoroughly washed, and at 5 o'clock in the afternoon was loaded upon a six foot cart on the pavement in front of the State house, where it was decorated with garlands, flowers and flags. The precious relic was guarded all night by special officers. A half past 7 this morning six horses, decorated with flags, will be harnessed to the truck and transport it to the old Pennsylvania Railroad depot, Thirty-second and Market streets, whence the special train will start at 10 o'clock. The escort of the bell to the depot will consist of thirty-two police officers from the reserves and one sergeant and sixteen men from each of the twenty-four police precincts. Lieutenant Brodie will command the reserves, Captain Schreyer and Quirk will be in joint command of the escort. The Liberty coronet band and the Wee-wee band will also be in the procession.

SKIN DISEASES CURED.

By Dr. Frazier's Magic Ointment. Cures it by magic: Pimples, Black Heads or Grub Blisters and Eruptions on the face, leaving the skin clear and beautiful. Also cures Itch, Salt Rheum, Sore Nipples, Sore Lips, Itch, Obsolete Ulcers. Sold by druggists, or mailed on receipt price, 50 cents. Sold by Kahn & Co., and C. F. Goodman.

Florida has a town named "Hurrah."

I was afflicted with kidney disease, and suffered intensely. I was induced to try Hux's (Kidney and Liver) REMEDY, and before I had used two bottles I was entirely cured. Richard Henshaw, Providence, R. I.

BEYOND VALENTINE.

Information About Lands and Settlers in the White River Country.

Certainties, Prospects and Probabilities.

The Big Cattle-Men and the Small Cattle-Men—Railroad Building to Go On at Once.

Freemont Herald.

Mr. C. C. Craig, who owns and runs a horse and cattle ranch about forty miles west of Vale, in the valley, among the sand hills, is in the city to-day. He is the gentleman who had the contract for doing the "breeding" on the timber claims taken last year by Fremont parties, and his present visit here is for the purpose of completing settlement for doing the work with Peter Bruhn, the agent of the Fremont company.

Mr. Craig states that the land where the Fremont people have their claims located is of excellent character, and among the best in north Nebraska. He broses up the Fremont company about 400 acres, and the amount broken on each claim ranged from 5 to 11 acres.

Our informant says the settlers are coming into the country very rapidly, and an immense immigration is looked for during the coming season. Many of the settlers who located their land last season will move on to the claims with their families when spring opens, and before many years have passed vacant lands will be as scarce in that country as it is now the case along the valley of the Platte. As a consequence of the fact that settles the large stock men are moving out "seeking pastures new," as it were, and their places is being taken up by the farmers, who both toil and spin—who till the soil and raise corn and feed their stock, and raise families to populate this country, and are of vastly more benefit to the country than their predecessors.

In regard to the paper published in almost all the papers of the country—that fourteen persons perished in that country during a recent storm—Mr. Craig says that it is a great exaggeration, although the truth is bad enough. The fact is that two men who were out hunting lost their way and were found frozen and dead within two miles of home, and another man who had stock to feed was away from home for two days when the storm came. He unhitched his horse and mounting one of them trusted to the instinct of the brute to find his way home. But the animal was at fault and drifted with the storm, and when the man was found two days afterward, he was in a snow drift, stark dead, while the faithful animal was keeping watch over the corpse of his master, and had worn paths in the snow where he had walked constantly in a circle around him. It is a matter of history that such privations and hardships are incident to the opening up and settlement of all new countries, and only a few years hence fertile farms, busy households, and cattle upon a "thousand hills," will be the monument over the country which is now a dreary, snow white.

C. P. Treat, of Sioux City, who has the contract for grading the fifty-one miles of the Great Northern Railway from Elk Horn & Missouri Valley railroad from Gordon, the end of O'Hara Bros' contract (completed last fall) to Chadron, on White river, is already upon the ground and making extensive preparations for commencing work as soon as possible. He is letting subcontracts and Mr. Craig has taken the job of grading three miles, commencing at Gordon. Mr. C. is now on his way to Minnesota, to send out teams and men to work for himself and Mr. Treat. The contract for the entire line of grading calls for completion by the 15th of July, and consequently there is no time to lose. Work will be commenced at once excavating the deep cuts, where they can keep below frost lines and where it will be put vigorously forward, as it is promised the iron horse will go screaming and puffing into White river valley by the 1st of August, A. D. 1885.

OMAHA HAS A GROWING CITY

The remarkable growth of Omaha during the last few years is a matter of great astonishment to those who pay an occasional visit to this growing city. The development of the Stock Yards—the necessity of the Belt Line Road—the newly paved streets—the hundreds of new residences and costly business blocks, with the population of our city more than doubled in the last five years. All this is a great surprise to visitors and is the admiration of our citizens. This rapid growth, the business activity, and the many substantial improvements made a lively demand for Omaha real estate, and every investor has made a handsome profit.

Since the Wall Street panic May, with the subsequent cry of hard times, there has been less demand from speculators, but a fair demand from investors seeking homes. This latter class are taking advantage of low prices in building material and are securing their homes at much less cost than will be possible a year hence. Speculators, too, can buy real estate at a cheaper price and ought to take advantage of present prices for future profit.

The next few years promises greatest developments in Omaha than the past five years, which have been as good as we could reasonably desire. New manufacturing establishments and large jobbing houses are added almost weekly, and all add to the prosperity of Omaha.

There are many in Omaha and throughout the State, who have their money in the banks drawing a nominal rate of interest, which, if judiciously invested in Omaha real estate, would bring them much greater returns. We have many bargains which we are confident will bring the purchaser large profits in the near future.

We have for sale the finest residence property in the north and western parts of the city.

North we have fine lots at reasonable prices on Sherman avenue, 17th, 18th, 19th and 20th streets.

West on Farnam, Davenport, Cuming, and all the leading streets in that direction.

The grading of Farnam, California and Davenport streets has made accessible some of the finest and cheapest residence property in the city, and with the building of the street car line out Farnam, the property in the western part of the city will increase in value.

We also have the agency for the Syndicate and Stock Yards property in the south part of the city. The developments made in this section by the Stock Yards Company and the railroads will certainly double the price in a short time.

We also have some fine business lots and some elegant inside residences for sale.

Parties wishing to invest will find some good bargains by calling

He is letting subcontracts and Mr. Craig has taken the job of grading three miles, commencing at Gordon. Mr. C. is now on his way to Minnesota, to send out teams and men to work for himself and Mr. Treat. The contract for the entire line of grading calls for completion by the 15th of July, and consequently there is no time to lose. Work will be commenced at once excavating the deep cuts, where they can keep below frost lines and where it will be put vigorously forward, as it is promised the iron horse will go screaming and puffing into White river valley by the 1st of August, A. D. 1885.

The Big Cattle-Men and the Small Cattle-Men—Railroad Building to Go On at Once.

Freemont Herald.

Mr. C. C. Craig, who owns and runs a horse and cattle ranch about forty miles west of Vale, in the valley, among the sand hills, is in the city to-day. He is the gentleman who had the contract for doing the "breeding" on the timber claims taken last year by Fremont parties, and his present visit here is for the purpose of completing settlement for doing the work with Peter Bruhn, the agent of the Fremont company.

Mr. Craig states that the land where the Fremont people have their claims located is of excellent character, and among the best in north Nebraska. He broses up the Fremont company about 400 acres, and the amount broken on each claim ranged from 5 to 11 acres.

Our informant says the settlers are coming into the country very rapidly, and an immense immigration is looked for during the coming season. Many of the settlers who located their land last season will move on to the claims with their families when spring opens, and before many years have passed vacant lands will be as scarce in that country as it is now the case along the valley of the Platte. As a consequence of the fact that settles the large stock men are moving out "seeking pastures new," as it were, and their places is being taken up by the farmers, who both toil and spin—who till the soil and raise corn and feed their stock, and raise families to populate this country, and are of vastly more benefit to the country than their predecessors.

In regard to the paper published in almost all the papers of the country—that fourteen persons perished in that country during a recent storm—Mr. Craig says that it is a great exaggeration, although the truth is bad enough. The fact is that two men who were out hunting lost their way and were found frozen and dead within two miles of home, and another man who had stock to feed was away from home for two days when the storm came. He unhitched his horse and mounting one of them trusted to the instinct of the brute to find his way home. But the animal was at fault and drifted with the storm, and when the man was found two days afterward, he was in a snow drift, stark dead, while the faithful animal was keeping watch over the corpse of his master, and had worn paths in the snow where he had walked constantly in a circle around him. It is a matter of history that such privations and hardships are incident to the opening up and settlement of all new countries, and only a few years hence fertile farms, busy households, and cattle upon a "thousand hills," will be the monument over the country which is now a dreary, snow white.

C. P. Treat, of Sioux City, who has the contract for grading the fifty-one miles of the Great Northern Railway from Elk Horn & Missouri Valley railroad from Gordon, the end of O'Hara Bros' contract (completed last fall) to Chadron, on White river, is already upon the ground and making extensive preparations for commencing work as soon as possible. He is letting subcontracts and Mr. Craig has taken the job of grading three miles, commencing at Gordon. Mr. C. is now on his way to Minnesota, to send out teams and men to work for himself and Mr. Treat. The contract for the entire line of grading calls for completion by the 15th of July, and consequently there is no time to lose.
