arrived in the city yesterday afternoon and will today open a recruiting office at the Dodge Light Guards' armory in the Masonic building. Under the scond call for volunteers Iowa's quota will be made up not by organizing new companies, but by recruiting the companies of the regiments already in the field up to the full limit of 108 men. At present the strength of the companies is sixty-eight men, so there will be thirty-nine men more needed for each Recruiting Officer Silverthorn will be at

the armory today from 10 a. m. until 5 p. m, and it is thought that he will have no difficulty in securing the thirty-nine recruits to reinforce company L. He will select such men only as will pass the prelimipary examination, which he will make as to weight, beight and chest expansion,

The recruiting quarters for the Second battalion are at Red Oak and the men recruited by him will have to go there for the physical examination. The men, as soon as they pass the examination, will at once be sent forward to San Francisco to join the regiment, where they will be out-

GRAND PLAZA OPENS AGAIN

Lake Manawa's Pleasure Resort Ready for Town-Weary People.

MANY IMPROVEMENTS AT THE BEACH

Everything Shows New and Clean Offering an Invitation to the Peonie Who Want to Get Away from the Heat.

The Grand Plaza at Lake Manawa was formally opened for the summer season yesterday and the beautiful resort was visited by a very fair crowd, considering it was the first day and in view of the fact that so many people from Council Bluffs took adthan a week to visit the Transmississippt

Exposition. During the spring a number of improvenents were carried out at the lake and the Grand Plaza this season is looking better than it has for years. The lawns within the enclosure are in the very pink of condition, the recent rains having given the grass a they held out for half of the fund to be luxuriant growth, and with the plentiful use been cut until the grass plots are nearly as any further compromise and the conference smooth and level as a billiard table. The shrubbery and shade trees are out in full foliage and the whole presents a decidedly attractive scene. The lake itself is also at its best at present, with more water in it than has been the case for several years past. Everything around the Grand Plaza has been treated to a new coat of paint and the big pavilion, with its many easy lounging chairs, looks especially inviting to the at The Bee office, 10c each.

The bath houses at the Plaza having been converted into stables, all bathing this season will be on the Manhattan side of the lake, where the best sand beach is to be had. The approach to the pler at the road outside the Grand Plaza enclosure has been fenced off this season and the only way to reach the steamers will be through the Grand Plaza grounds.

County Superintendent Gets an Interesting Letter from His Soldier Son. County Superintendent Sawyer has received a letter from his son, Berne, who is in the First Illinois infantry. The letter was written on the 6th from Port Tampa, since which time according to newspaper report, the First Illinois has been ordered to Santiago. Describing the departure of the troops from Chickamauga, the writer says: We broke camp about 10 o'clock on the norning of the hottest day of the year, each man carrying forty-nine pounds of baggage. Our march of twelve miles was over a dusty course and we tried to make good time, with the result that fully a quarter of them came in at the finish. Of our company, eightyfour men, twenty-two marched into Ringo about 4 o'clock, dead tired, but still in the ring, and your little son was in that same bunch, at the head of the gang. The men dropped out in twos and threes and lay down at the roadside, some dizzy, others unconscious. Whatever doubt I may have enter-tained about holding out on a long march has been entirely dispelled, as I believe 1 hurt any of our men and anybody who gets sick here would stand an equal chance of sickness in any of the northern states sea breezes modify the heat to

Still Hangling Over Road Fund.

Saturday morning the Board of County Supervisors held a conference with the city council with a view to a settlement of the controversy over the expenditure of the road fund. City Attorney Wadsworth, for the city council, submitted the proposition that the council would allow one-third of the road tax collected within the city limits to be expended by the county on roads adjacent to the city under the direction of Chairman Baker of the county board; the remaining two-thirds of the fund to be expended within the city and all work done in the city to be under the supervision of the street supervisor and all the bills to be accepted and endorsed by Chairman Baker of the county board. This latter proviso was necessary, in view of the fact that Judge Smith in his ruling decided that the funds should remain in the hands of the county treasurer.

This proposition did not meet with a very cordial reception from the supervisors and expended outside the city limits on adjacent ended with the controversy in the same condition as it was before the meeting. The amount in the road fund over which the controversy is amounts to about \$4,000.

ROUNDUPS ARE ABOUT OVER.

Losses on South Dakota Ranges Not Over One Per Cent. PIERRE, S. D., June 12 .- (Special.) -A large portion of the range has been worked over by the roundup wagons and those who have been out on the work report the best possible conditions existing in the range country, both as to the condition of the country, and as to the cattle. Early in the season there was scarcity of water on portions of the range and in some sections losses were reported on this account, but with the rains of May and so far this month, every stream and water hole has been filled to the brim, and where the losses were re ported they are being accounted for by the roundup finding the cattle strayed away from the home range to where they could more easily find water, and the loss at that time has proven only an imaginary one. All reports put the loss at much below 1 per cent; in fact, so light that it is not worth considering.

The calf crop is immense, and is estimated by those who have been buying in other sections of the cattle country to be at least 25 per cent greater than for any other range state of the union. This increase, with that of the cattle which have een shipped and driven onto the Sioux range this spring, is going to put a larger number of cattle in the country west of the Missouri than ever before. The shipments to this point have fallen off lately on account of the high price which prevailed, but they are again beginning to come in. Besides the shipments here a large number of southern cattle are coming in, being shipped to points in Nebraska and Wyoming and driven to the home ranches, the argest of these being about 5,000 head by the Minnesota and Dakota Cattle company, managed by Scotty Philip, and 3,500 head by W. B. Stearns of Yankton. A large number of high grade bulls have been placed on the range this year, being principally Herefords, Shorthorns, and a few Galloways, but this latter breed does not take well for some reason, even where hornless cattle are desired, the raisers preferring to de-

horn the other breeds. About 20,000 head were shipped out of here last year and it is estimated that the shipments this year will fall below that number, as many of the holders cleaned up so closely last year that they will be short on shipping cattle this season, besides the market for feeders, which took such a large number last year, does not develop this season.

The sheep men, as well as the cattle men, are jubilant over the outlook this year, The price of wool has so materially advanced that they will reap almost double the profit from the same amount of clip this year as they have for several years past and the increase in number of their flocks will give them far more wool to ship, and on which to secure a profit. While shearing is yet in progress, many have completed their work, having sheared early to give the new growth of wool a chance to start before shipping their wethers to market, as they will present a better appearance than if shipped immediately after shearing. The

estimates of the amount of wool which will be shipped from this point this year are as high as 300,000 pounds, some going even higher than that figure. In this connection scouring mill is being talked of for this city. The water from the artesian wells here is said to be just the thing for the purpose and the same well would furnish the water desired for the purpose as well as the power to run the machinery required, and it could be operated very cheaply with such power. Such a move would save thou sands of dollars to wool growers in freights, as the scoured wool could be more easily handled, and there would be no freight to pay on dirt. Wool grown all along the river could be cheaply delivered to such a mill by boat and the amount to be easily and cheaply secured would make such a

project a paying one from the start. Orders Transfer of Clerk. CHAMBERLAIN, S. D., June 12 .- (Spe cial.)-Commissioner Hermann of the gen eral land office has issued an order trans ferring I. N.
