#### TONE OF MARKET IS STRONG

There is Every Indication of an Early Recovery in Prices.

SUSPENSION OF SPECULATIVE SELLING During This Week There Will Be

Large Payments of Dividend and Interest Money Which WIII Encourage Investors.

NEW YORK, July 3 .- Henry Clews, head of the banking house of Henry Clews & Co.

writes of the situation in Wall street; On the stock exchange we have had another week of duliness. The tone of the market, however, has been decidedly strong, with indications of an approaching recovery in prices. There has been a general suspension in speculative selling and any moderate revival of buying would be likely to give an upward impulse to prices. substantial backing to the market for the coming week will be the large buying for the investment of the semi-annual dividend and interest money which will be paid out on the first of the month and will be the largest amount paid by corporations on record. It will be but natural for the recipi-ents of this money to be appreciative of the good treatment they have received by the various companies who have contributed this income, which they are likely to show by reinvesting in the same properties. What better evidence to base confidence upon can investors have than the source their income provides? Such buying, consequently, cannot fail to be large and will be an important factor in advancing prices in the immediate future. Besides that, additional encouragement will be found in the good crop pros pects in all directions, the superabundance money and the continued confidence in the result of the war and its early termination. As a matter of fact there is scarcely any cause for distrust to come from any quarter. The war has certainly served one wholesome purpose in keeping Americans from indulging in foreign travel this summer to a very great extent. The expendi-tures are not likely to be more than onehalf that of former years for that purpose, making a saving to this country of at least \$50,000,000. This is an item of con-siderable importance. These stay-at-home people, instead of traveling in Europe, will do so in this country and our internal transportation companies will be correconding gainers. In view of these factors the market seems to be verging toward a condition in which a fresh rise in prices will become the order of the day.

Somewhat unexpectedly here, the Bank of England on Thursday put down its rate to 2 1-2 per cent. This indicates a more settled feeling on the European money markets and no doubt in part reflects the revival of confidence due to the settlement of the dispute between England and France on the distribution of African territory. That settlement removes a very serious danger from the region of foreign politics and so far it is calculated to revive confidence in the European investment markets. which our own may possibly participate No doubt the action of the bank has been influenced by the prospect of American payments of July interest and dividends to foreign holders, which can hardly be estimated at less than \$40,000,000. This liquidates a considerable part of the balance of indebt-edness due from Europe to the United States and so far diminishes the tension in the foreign exchanges. But there must still remain a large unliquidated sum of that floating debt, which may soon show its ef-fects in a renewal of gold shipments to the United States. Bills drawn against our new crops will be forthcoming and with a less amount of imports to be remitted for than usual it is not impossible that within the present month gold may be flowing freely in this direction. This foreshadows a continuance of the present case in the

local money market.

It it now generally conceded that of the whole \$200,000,000 of the national loan about \$125,000,000 will be taken up by the small subscriptions. This unexpected result has some of the banks in a rather awk ward position. Those institutions had sold their older issues of bonds in order to get the new ones, which would pay better, the result being that they are now left without these investments and may have to pay a good premium to replace what they have sold. This is the more inconvenient because it interferes with the ability of some of the anks to accept treasury deposits, not hav ing sufficient securities to hypothecate

This large absorption of the loan by persons of small means has been unattended by the sale of other securities to procure the means of payment. This investment of so large an amount of the savings of the non-investing class is not only a healthy symptom as to the well-to-do condition of that class, but also is a fact on which the country may for obvious reasons congratu-late itself. By these subcriptions a large mass of our people have increased their in-terest in the fortunes of the nation and put themselves in a position for feeling more closely than ever their dependence upon good government, conservative politics and nd money and more than this the invest ments are a gratifying evidence of popular confidence in the institutions under which the subscribers are governed. There is probably no other country whose masses uld make such a contribution to the wants

of the government. While all is going well at the seat of war in Cuba and may possibly result in an earlier peace than has been looked for a seem-ing cloud of distrust is rising on the horizon of the Philippines. Public opinion is arrested by the fact that Germany is reported to have collected seven war vessels the control of Admiral Dewey. It is understood that the German government dis-avows to ours any unfriendly intention in this course and affirms that nothing is con-templated beyond the protection of German residents and property. One hesitates to believe that in view of German's very large commercial interests in the United Statesimmeasurably exceeding anything she has or can have in the Philippines—she could take a course calculated to alienate our people and which might possibly precipitate hostilities between the two countries expect that she would show her amity at Manila as well as in her diplomatic assur-ances. And yet she presents herself at the theater of hostilities in overwhelming naval apparently contemplates giving additional significance to that demonstration by the presence of Prince Henry, Such action from any other country would be conmay be allowed for the fact that the em-peror is wont to be exceptionally demontrative in dealing with armies or ships and such exhibitions and their occasions. If, however, he claims the right to indulge his personal taste in such matters and defy all international usage he should make it un-derstood that he has no unfriendly purposes in contemplation. That, however, he has not done and the absence of such definite assurances is leading to a distrust that must reach to the European courts as well as disturb confidence in Washington. This state of things, whether it means a mere carnest, must either be soon explained with explicitness or develop into serious complications; it cannot be continued much longer without raising the gravest inter-

#### SOAP AND ITS USES.

of Makers and Users. There is now exported from Great Britain, reports the New York Sun, more soap thua was used in Great Britain at the beginning of the present century, and, besides, according to authentic figures, 400,000,000 pounds of soap is used in Great Britain regular ments of the market. every year, exclusive of 55,000,000 pounds exported to other countries, chiefly English colonies. The French manufacture of soan amounts approximately to 300,000,000 pounds a year, the larger part of which is made in the city of Paris. The sale in other countries of French soap, and particularly French perfumed soap, is a considerable item of commerce. The exports of soap from Great Britain in recent years have been as follows: 1875, 12,500 tons; 1880, 19,500; 1885, 20,100; 1890, 25,000; 1895, 27,500. What were known in England as the soap taxes originated during the reign of Queen Anne and were originally fixed at \$150 a ton, yielding n the year 1830 a public revenue in excess of \$7,000,000.

An official estimate recently made shows the average consumption per inhabitant of similar average prevails in France, Belgium and Holland, though a popular belief ascribes to the last country a much larger use of soap, particularly for housecleaning.

There are no official figures on the subject, but there is a general belief that very little soap is used in Spain. Certainly no soap is imported into that country (the Spanish blockade on soap has been of long duration), and none is exported from it. The United States stands at the head of all other countries in the use, if not in the manufacture, of soap. The average exportations of American soap in a year amount to 30,000, 000 pounds. The importations into the 600 pounds. The importations into the United States of soap amount to 3,000,000 pounds, or one-tenth as much. There are nearly 500 soap factories in the United States, with a cash capital of \$25,000,000, using materials to the value of \$30,000,000 and giving employment to 10,000 persons. In the number of such establishments New ported in the yards and they came in late. They were mixed western lambs. The market was \$4.20, while on the last day of the month was touthed on the first day of the month and the extreme low point was not reached until the last day.

SHEEP—There were only two cars reported in the yards and they came in late. They were mixed western lambs. The market was \$4.20, while on the last day of the month the average price paid for hogs on this market was \$4.20, while on the last day of the month the average price was \$3.55, a drop of sic. The extreme low point was not reached in the paid for hogs on this market was \$4.20, while on the last day of the month the average price was \$3.55, a drop of sic. The extreme last day of the month the average price was \$1.55, a drop of sic. The extreme last day of the month and the extreme low point was not reached and the price was \$1.50, and the price was \$1.55, and the continuous price was \$1.55, and the price strued as a direct threat and an insult to using materials to the value of \$30,000,000 this country it certainly is. But something and giving employment to 10,000 persons. York stands first among American cities,

Stars to Spare.

A flag fakir in Washington the other day thus announced his wares: "Look a-here, feilers, there's forty-eight stars on this flag-Forty-eight, mind you. I'll bet a Matanzas mule that you can't find another old glory in this country that has not got forty-eight on it. These that you buy in the stores has only got forty-five stars-one for each built for the occasion. It's got three extra stars added for the new states—Spain, Cuba and Philippineland. See? If you don't and Philippineland. get one of 'em you ain't in the push. You'll have to paint three more stars on the flag you've already got, and you can't make a neat job of it. You might as well have one o' them old flags with thirteen stars

6,610 Receipts today were small but it was a Saturday with two holidays to follow, Sunday and Monday, and no great supply was required. The markets were generally in good shape and the most

shade higher, but heavy and unattractive cattle were not much different from yes-Cows and helfers were unchanged so far s values were concerned and the few odds and ends offered were soon disposd of. Veat

week ago. The cow market during the week has not shown much change. Good dry lot helfers and cows are good sellers and prices are just as high as they have been any time. As a matter of course grassy cow stuff has been discriminated against and the market on that kind of stuff is liable to break badly most any time when the arrivals become larger. Stock. when the arrivals become larger. Stockers and feeders have declined during the week 20025c, but the loss was largely on the heavy feeders. In fact, the decline has been most on that kind while choice little stock cattle have held up much better still they are considerably lower than ter, still they are considerably lower than during the high time. Cattle sold this week

at \$4.65 that would at one time have brought requirements of the market.

The trade opened strong to 5c higher than yesterday. To start with, it was pretty generally a \$360 market, with more sales above than below. Then came reports of an easier market at Chicago and some of the more urgent orders being filled the trade weakened under that influence and closed with the advance process. luence and closed with the advance prac-ically all lost. early market was active and though

This has been a week of large receipts not only at South Omaha, but at all market points, and of lower markets. There has been a demand for everything received, but the large run of thogs has steadily acted as a bear factor for the depression of values.

The week opened with values a strong 5c lower, but on Tuesday there was no material change. The market declined 25c on Wednesday and 5c on Thursday. In other words, by Thursday the market was 125c lower than at the close of the previthe commencement of the month the av York stands first among American cities, but prior to its enlargement Philadelphia had the first place. New York second and Brooklyn third. Boston, San Francisco and Cincinnati follow in the order named, and in respect of the value of materials used in soap making Chicago comes first, having many facilities for procuring them, but turning out a cheap and inferior grade of soap.

Stars to Spare.

They were mixed western lambs. The market did not show any very material change. The offerings of sheep and lambs have been very light at this point all the week past and for several weeks in fact. The receipts of the week, as will be noted from the table of figures given at the head of this column were not so bad, but of the arrivals a considerable proportion was shipped direct to packers, while of the balance quite a good many were not of the wind calculated to stimulate free buying. On most days, in fact, there have not been enough desirable mutton, sheep or lambs on sale to make a test of the market. Still terested in the war between the United

stie to make a test of the market. Still other markets have been lower and it might be safe to say that had there been any here to amount to anything the market would have been all of 196/29c lower on lambs. Very few spring lambs have been received here but they are bringing the best prices in years for this season of the year. In the language of the yards they are as high as a house. Lambs have been good sellers all this season. When Colorado lambs stopped coming spring lambs began to put in an appearance in the markets of the country and the demand has been in excess of the supply right along.

CAME TO WATCH THE WAR.

of the Foreign Attache with the Invading Army. The foreign military attaches who accompanied the United States army to Cuba ar an interesting group of men, not so much for their individuality, which is not marked The disposition of the day's receipts was as for what they represent. It is considered noticeable by the army officers that ber of head indicated: as for what they represent. It is consid With one exception, they are of minor stations in their own armies, although probably above the general average in intelligence and power of observation.

This group of foreigners in picturesque uniforms, at a loss for something to do, was an ever-present feature of the lobby of the Tampa Bay hotel for several weeks before the army embarked for Cuba, writes a correspondent of the Kausas City Star. The United States government furnished each of them with a saddle horse and a mounted soldier attendant or "striker." They herded together in the hotel and rode among the

camps several hours each day. The chief difficulty they seemed to have were generally in good shape and the most of the receipts soid in good Season.

CATTLE—There were hardly enough cattle here to make a test of the market, and it was the smallest run for a long time. What cattle were offered, however, sold well and the market was entirely satisfactory to holders.

Beef cattle if at all desirable were a shade higher, but heavy and unattractive to the rather loose, free-and-easy style of our own officers. A meeting between a foreign and a United States officer the first time generally resulted in some confusion and embarrassment in the matter of salutes, but was usually compromised by an old-scale of the receipts and the rather loose, free-and-easy style of our own officers. A meeting between a foreign and a United States officer the first time generally resulted in some confusion and embarrassment in the matter of salutes, but was usually compromised by an old-scale of the receipts and the rather loose, free-and-easy style of our own officers. A meeting between a foreign and a United States officer the first time generally resulted in some confusion and embarrassment in the matter of salutes. was in accommodating their strict military fashioned handshake.

Highest in rank of these attaches is Major General Thaulow, surgeon general of the Norwegian army. He is a big, fine, ruddy looking old fellow, who stands high in the

and ends offered were soon disposd of. Venil calves sold about the same as yesterday, some very choice native calves bringing \$6.75. Not enough bulls or stags were offered to establish quotations.

There were no stockers or feeders in first hands, or at least none of any consequence. The cattle market as a whole this week has been in pretty good shape. Both receipts and demand have been of liberal proportions and each day's arrivals as a rule and the stage of the receipts and demand have been of liberal proportions and each day's arrivals as a rule celpts and demand have been of liberal proportions and each day's arrivals as a rule have met with ready sale at good prices. The tendency of fat cattle has been upward. Heavy cattle are now 5g10c higher than a week ago. The cow market during the week has not shown much change. Good

In 1893 Count von Goetzen, accompanie by 625 natives, made an exploring trip across Africa, discovered a lake or two and a vol cano. He is the only white man who has followed certain portions of Stanley's trail

he little Japanese soldier, Major Shiba, of the Japanese artillery. He has been in this country before, speaks English fluently and is well educated. He was for some time with the Japanese legation in Washington. Captain Abildgaard represents the royal navy and army of Sweden and Norway. He is on the staff of the famous Norwegian general, L'Orange, and is making a particular being study of the mobilization of volunteers. Captain A. Wester represents the Swedish infantry and Captain T. Rodler the naval and military attache at Washington, the Austro-

The early market was active and though later it hung fire, owing to the fact that salesmen all wanted early prices, still everything was sold and weighed up early in the morning.

The market as a whole averaged considerably higher than yesterday and South Omaha was the best and highest market on the river today.

In military attache at Washington, the Austro-Hungarian forces. He is a lieutenant in the navy.

Russia is represented by Colonel Yermo-loft, whose baggy trousers and big cap add largely to the gally of natives in a tropical content. Captain Arthur H. Lee of the climate. Royal artillery represents the English army and is a clever, bright young officer, who has made himself very popular with the soldiers of the United.

This list would not be complete without a mention of Captain Paget of the royal British navy, who, while not concerned with army matters, is making a report on subsidized vessels such as this government is now using for transports. The captain i inimitable. He is tall and elderly, a short gray beard, not well trimmed, lengthens the effect of his naturally long face. His valet is kept busy preparing uniforms for differthe captain's socks. On occasions when a white gold-laced Eton Jacket, white duck trousers, shortened by many launderings, and low patent leather shoes are de rigeur according to the captain's schedule, the effect of the socks is at times startling.
