EDMISTEN'S CHANCES GROWING SMALLER

Populists Distrust Him and Democrats Don't Want Him—Spencer Gaffin a Source of Worry and Thompson an Enigma.

LINCOLN, July 29.—(Special.)—It has developed that as between the friends of A. H. Weir and Uncle Jake Wolfe on the populist state delegation Weir has a slight majority and his forces will favor the selection of the gubernatorial candidate before any of the other officers are nominated. The Wolfe men are in favor of re-nominating the present officials by a sort of blanket resolution and after that settling the nomination for the head of the ticket in order to not dare to openly oppose the Weir men for fear of a rupture in the convention. The Edmisten machine is encouraging the strife between the Weir and Wolfe men, though it would take a long head to figure out how the populist chairman could be benefited by an open quarrel between the two Lancaster county candidates.

The "reformers" have concluded that Holcomb is entirely out of the race and the attempt is being made to turn the machinery of the populist party to the aid of Edmisten. In spite of this there is a strong move at the state house to advance the interests of Neville, and the family at the capitol building is not altogether a happy one. There are some few who are for Gaffin and it is said the Saunders county state has a large number of friends in the state who will make their influence felt at the conventions. In his campaign for the nomination Gaffin has not carried a brass band around with him, and it is hard for the state house prophets to make an estimate of his strength.

New Objection to Edmisten.

News comes from over the state that there is a strong feeling against Edmisten, the belief being that he is too much of a professional politician to make a creditable candidate for governor. A prominent populist from several counties, who is at present holding an important county office, was in the city Wednesday and expressed himself freely on this question. He said that the people were very suspicious of Edmisten and that he would surely be beaten if nominated, as it is very hard to get a trickster who would sacrifice the rights of the people for political power and emoluments. The Seward county man is also opposed to Holcomb and Gaffin, gave it as his opinion that the Thompson boom is built up under the impression that the "Little Giant" is the candidate, and finally settled upon Neville as the most available man.

Congressman Strode was interviewed today on the situation in the First congressional district relative to the republican nomination. He said that to him it looked much as if Bursett would be nominated by acclamation. He considers the chances for republican success in the election exceedingly bright.

War Tax Decisions.

The attorney general recently referred a list of controverted questions with respect to the proper construction of the new internal revenue act to the collector at Omaha, with the request that he give his view of the law for the information of the public, to guide the state officers and others in the proper observance of its provisions and to avoid a clash of opinion between the state and federal authorities. The attorney general's extract is made from a letter received today by the attorney general from Collector Houtz:

A pamphlet is published weekly for the use of revenue and customs officers and contains a list of decisions rendered by the Treasury department relative to the collection of the revenue. In the last issue a ruling of the commissioner of internal revenue is published for the guidance of collectors, and as it contains a general rule that will enable you to arrive at a decision of some of these matters of doubt, I will quote it:

The first requirement necessary to subject any given certificate that general certificate to tax is that it shall be one which is required to be given by law, national, state or municipal. All such are taxable except those coming within the exemption of section 17, that is to say, those which are given strictly in the exercise of the functions—governmental, taxing or municipal—of the state or corporation.

Certificates given by an officer, not for a public or governmental purpose, but for private interests and use, are liable to the tax if they are given in obedience to any law which requires them to be given when called for.

A certificate of search showing that the docket or records of a court have been searched and that no liens, mortgages or other claims exist as to property, or that judgments are recorded, or are not recorded, and also certificates of search to ascertain whether or not titles of land, whether taxes have been paid, and other certificates of this character, are not such as are required in the general discharge of governmental functions on the part of the officers giving them, but are such as are needed for private use and private interests, and are, therefore, subject to the tax if they are required by law to be given when called for.

If the act performed, or the certificate issued by the officer, is in the discharge of an official function necessary in operating the general machinery of the government, it is exempt.

The memorandum on the back of a deed or a mortgage, made by the register or recorder, that the instrument has been placed upon record, is not a subject of taxation. It is not a certificate such as is contemplated by the law. It is a brief note on the back of the deed or mortgage citing the date of filing and the date of recording. The ordinary notary's jurat is not required to be stamped.

Two decisions have been rendered respecting the acknowledgment to deeds and mortgages and they are in direct opposition to each other. Inasmuch as this law was intended for the benefit of the government and as the construction must be broadly in favor of the revenue to prevent evasion, I would suggest that all these acknowledgments near the stamp tax be certified without regard to the stamp affixed to the instrument itself.

State House Gossip.

It is announced today that E. E. Spencer and Mrs. Ames have been appointed to act as referees for Lancaster county cases under the new bankruptcy law, which goes into effect August 1.

Discharges from the Nebraska guard are made out by Edgar H. Wheeler and U. W. Symore, both of whom are members of the Western battery. The reason for the discharges is the expiration of the time of service.

A. P. S. Stewart, one of the prominent citizens of Lincoln, was hurt in a runaway this forenoon. When the horse started to jump, Stewart was thrown to the pavement and dragged several rods sustaining several painful bruises. It is not believed that any of the injuries are serious.

Charles Hammond has filed a petition in district court in which he alleges that C. W. Mosher and R. C. Outcalt gave him their promissory note in July, 1897, for \$10,000, and secured the same with 100 shares of Capital National bank stock. He says the note has not been paid and asks for judgment of \$13,975.75.

S. C. Keith of Geo. Mont., writes General Burdick to see if there is any opportunity to enlist with the troops of this state. He says in the letter that Montana was not called upon to furnish any men under the second call and that the young men of that state are thus obliged to go to some other state for a chance to enlist.

State Superintendent Jackson has traveled 800 miles this week in visiting the teachers' associations. Wednesday he was at Benkelman and Thursday at Kearney, coming home from there by way of Omaha. At Kearney he attended the annual convention of the institute, and with great interest manifested among the teachers. The institute at Benkelman was also a good one, although not so largely attended.

The State Board of Printing today let contracts for the printing of assessment books, tax list books and blanks for the coming year, the total amounting to about \$1,000. The State Journal company secured the assessment books at one-sixth of 1 cent per page. The work was done last year at one-tenth of 1 cent per page, a reduction from last year's price. The assessment blanks will be furnished at 70 cents per 1,000. The Journal company got the bulk of the contracts today, with Jacob North and the Woodruff company coming in for the balance.

The republicans of this county are in earnest this fall and are going to be in line with the rest of the state in making an aggressive fight. A recent poll of this county shows quite an increase in the party over last year and many republicans who went out on the free silver issue are coming back and identifying themselves with the party. Chase county will present before the state convention the name of Hon. Cash D. Fuller for the office of secretary of state. Mr. Fuller is an old soldier and a pioneer of this state, with large interests in this locality. He is a man of high attainment and well qualified to discharge the duties of the office. He is a republican of the stalwart breed, earnest and untiring in his efforts for the party's success at all times. His record is clean.
