CITY COMMITTEE EVOLUTIONS CONDEMNED

Demand by Resolution that Chris Albrecht and John Broch Be Recognized as Regularly Elected Members of Committee,

The First Ward Democratic club has declared war against Walter Moise and the heutenants who sided him in securing contrai of the demo-ratio city committee last Saturday night. The club mot at the corto secure speakers for last evening was velicus medicine. John Sheehan presented the report. He was one of the Firm ward committeemen present at the meeting of the city committee. He related how the original committee, elected in 1897, comprised Frank Fixa. L. W. Bongress and himself, and how 188. fall, at the time of the nomination of a ticket for the Board of Education, Fixa and Dongress having moved out of the ward. on his own motion Fritz Albrecht and John Hroch had been elected to succeed them He also told how, at the meeting last Saturday night, it was discovered that there had been a meeting of a me of the members of the committee, of which he had never been notified, at which John C. Droxel had been made a member of the committee. At the committee meeting he had protested against the calling of the name of Drexel on the roll, as he also protested against Owen Slaven being recognized on a proxy

Sheelian denounced Walter Moise as chairman of the committee as a bulld zer and the coterie of county demo racy men headed by him as bootlers, blacklegs and the "rotten ring," and threatened that when the opportunity came Moise and his lieutenants. who are now in the saddle, will go to the foot of the class. He declared that he was the only one of the three legitimate members of the committee from the First ward who had been recognized by the ruling element, that Drexel had been admitted without warrant and one vacancy declared whereas Albrecht and Dongress should have been recognized.

Albrecht was also present at the meeting and when called upon reiterated the statements of Sheehan and produced a typewritten notice sent him as a member of the committee in October last by Moise, recognizing him as a member.

At the conclusion of these statements a rising vote of thanks was unanimously tendered Sheehan for the stand he had taken in favor of the First ward committeemen and a committee was appointed to draft a resolution consuring Moise and his figutenants for ousting the other two members. A resolution was also adopted by a unanimous vote declaring it to be the sense of the club that Albrecht and Hroch were the regularly elected members from the First ward and demanding that they be seated at the meeting of the committee next Tuesday

The club decided to hold regular weekly meetings Wednesday evenings at the hall at Tenth and Hickory.

Coughs, Colds, Asthma and Croup Cannot Exist where it is Used.

The two illustrations above show more plainly than words can express, the orderful change that has been made in the treatment of respiratory diseases buring the past two years. Formerly, any sufferer from Catarrh, Asthma, Conamption or Bronchitis was at once placed under the care of some physician and dosed with all sorts of nauscating drugs and tonics. Even as far back as years ago, the doctor reach these diseases inhalation must be used, and experimented with atomizers arrays and douches, in the hope of finding some germicide which could be forced nto the bronchial tubes and lungs. That all these treatments proved practically seless is shown by the fact that, during the past twenty years the number of deaths from catarrh and consumption alone, has increased from \$,000 to over 200,000 a year. The discovery that these terrible scourges were germ discases did not lessen the death rate, for of all the germicides known to the profession but one of them could be lubaled into the lungs, and this, Chlorine Gas, was feedly poison. The others, carbolic acid, ammonia and creesete (liquids) must touch the germs themselves in order to destroy; consequently, could not be used with effect, as it is absolutely impossible for moisture in any form to enter the bronchial tubes and lungs.
