ENDING DEBATE ON FINANCE

Last Week of Talk in the Senate Draws a Large Crowd to Galleries.

MEMBERS ALSO TAKING MORE INTEREST

Three Important Addresses Scheduled for the Day—Elkins Leads Off for the Republican Side.

WASHINGTON, Feb. 12.—More than usual interest was manifested today in the senate debate on the financial bill. It was known that the opening day of the week of the financial discussion was to be marked by the presence of three speakers, Mr. Elkins, Mr. Wolcott of Colorado, and Mr. Allen of Virginia, and in addition to a large attendance of senators the public galleries were well filled.

Mr. Allen's resolution, introduced last Saturday, expressing sympathy with the Bowers party over without losing its place.

The financial bill was then called up and Mr. Elkins addressed the senate. His opening sentences were a reference to the speech delivered on Saturday by Mr. Chandler. He said: "That was a speech which would be distributed to hundreds of thousands of people by the political press, but by his political enemies."

He commended the general provisions of the bill, but criticized the sixth section, which provides for the funding of the public debt. Upon this provision he said in part: "The refunding of the public debt is not a matter of expediency, but a matter of principle. Why mix the subject of establishing and defining the monetary standard and strengthening the public credit with what must be at best under the provisions of the bill an experiment, and which, if it should fail, would prove a heavy burden on the people?"

Mr. Elkins had concluded his bill on the general calendar were taken up and the following passed:

Of course it will, and it would so continue if the senate were to pass the bill. We might as well simply pass a law providing that a yard shall continue to be three feet in length. Its re-enactment changes in no single respect existing law. The section has been a law since 1873, and is hardly worth discussion now.

Mr. Elkins also commended the payment of the principal and interest of the new bonds in gold represents, I think, a mistaken view as to our national credit. I cannot but express my regret that the committee felt that the exigencies of the money market required a departure from the terms heretofore established.

Adverting to national banks and to the provisions of the bill which afford them opportunity to increase their circulation to the par value of all government bonds deposited, Mr. Wolcott said:

"Succeeding years have only more firmly implanted in the minds of the people the belief in the principle of bimetallic standard, not to be uprooted without a more radical change of policy than any party or administration would care to attempt."

"It is estimated that within the next few months at least \$200,000,000 of additional currency will be required for the permanent passage of the bill. There is no department of human industry today in the United States and in the rest of the world as well that is not suffering because of an insufficient volume of money and which would not be benefited by a legitimate enlargement of the currency. Under our existing gold standard there seems to be no other available method of giving us this greatly needed increase than the one favored by this bill."

"Looking to the currency problems of the whole world, all legislation of the character of the proposed bill is to those who believe in the principle of bimetallic standard, because under the beneficent working of the bimetallic system it would be unnecessary. It is but one more step to be eventually retraced."

"But the enactment of this measure into law without at the same time accompanying it with a reaffirmation of our policy of a republican party respecting international bimetallicism would be an apparent abandonment of the principles and policy of the party, and the amendment reported by the finance committee conveys a positive assurance to the world that the republican party hold its own among the nations of the earth with gold as its standard, is still ready to meet and treat with the other leading commercial countries looking to an international agreement to open the minds of the world to silver as well as gold."

"In this country bimetallicism has received its greatest impetus from the successful bloc at the hands of the Bryan administration. In close alliance with the populist party, which still demands an irredeemable and inflated paper currency, clamoring for silver at 16 to 1 by the United States alone to the neglect of any other settlement of the question, they have succeeded in securing money, ridiculing all idea of international agreement, associating their demands with a snarling protest against every policy which seeks the enforcement of law and order and the maintenance of the honor of our country and the fulfillment of our obligations to mankind. It is not surprising that they have so clouded the minds of men that many of them see no difference between the free silver of Bryan and bimetallicism, are inclined to seek an end of the whole matter and hesitate to deal with the subject in any form."

Mr. Wolcott summarized the work of the international bimetallic commission, of which he was chairman, and paid a tribute to the co-operation of the president in the carrying out of the commission's work. He said: "The commission, which was organized by Mr. Bryan's cause sought to throw doubt and ridicule over the attempt, although there were notable exceptions among the Bryan demagogues."

Mr. Wolcott also said that there is a radical change taking place not only in Colorado, but in all the far northwestern states. Our people are tired of hearing only a sound of hate and sectionalism. We don't care for such attacks as we formerly did to the projects of despoiling a poor man who earnestly warms up against the wrath to come, that someone don't come. We are getting a glimmering shadow of an idea that if we want friendships and prosperous communities, and capital for our marvelous resources, we are as apt to get them by maintaining cordial relations with the rest of the country, even if they don't fully agree with us on the silver question, as we are by bitter words and savage hate towards everybody who happens to differ with us on the silver question. We are as apt to get them by maintaining cordial relations with the rest of the country, even if they don't fully agree with us on the silver question, as we are by bitter words and savage hate towards everybody who happens to differ with us on the silver question.

"Life isn't all cheerfulness and content,

NEBRASKA MAN FOR PARIS

Peter Jansen is Appointed One of the Commissioners to the International Exposition.

WASHINGTON, Feb. 12.—The president today sent the following nominations to the senate:

To be commissioners of the United States to the international exposition at Paris: Peter Jansen, Nebraska; Henry A. Farr of Maryland; Henry M. Putney of New Hampshire; Alvin H. Sanders of Illinois; Louis Stern of New York; William G. Thompson of Michigan; William M. Thornton of Virginia; Arthur E. Valois of New York; Thomas F. Walsh of Colorado.
