**Holt ACP Funds
Less Than in '57
More Conservation
Foreseen**

The 1958 cost-sharing agricul-
tural conservation program
(ACP) will place special empha-
sis on practices which provide
long-term benefits and tie in with
production adjustment, according
to Harry E. Ressel, chairman of
the Holt county ASC committee.
He said that the county pro-
gram has now been announced

and that a letter has been sent to
every farmer in the county an-
nouncing the program for 1958—
the same as in past years.
This program includes 19 prac-
tices capable of meeting all of the
most common conservation prob-
lems found in Holt county. All
but one of the 19 practices are
the kind which give returns over
a period of years. This single
exception is a seeding practice to
establish a temporary cover on
and which is to be planted.
Holt county's allocation of
ACP funds for making cost-sharing
conservation payments for
1958 is \$96,081, which is \$6,978 less
than was received last year.
Chairman Ressel explained that plans are being

still greater amount of conserva-
tion in this county than was ac-
complished last year even though
the amount of funds available to
share costs is less than was avail-
able last year. Major accomplish-
ments under the 1957 program
were the construction of 8,586
linear feet of terraces, 143 acres
of blowout control, 887 acres of
strip-cropping, 19 erosion control
and livestock water dams con-
structed 15 acres of cropland level-
ed, 84 wells developed for live-
stock water, 379 acres were planted
in a permanent cover, 199
acres of trees were planted, and
legumes and grasses in crop rota-
tion system were increased by
8859 acres.
"Your request for federal cost-

sharing must be filed with the
Holt county ASC committee on or
before March 21 if you desire as-
sistance in carrying out practices
numbered 17, 18, 20, 22, 26 and
31," Ressel said. "For all other
practices, your request must be
filed during the 30-day period prior
to the time when the practice will
be started."
