

Deloit News

Mr. and Mrs. Leland Clark and Mr. and Mrs. Ralph Tomjack were Sunday evening callers at the Henry Reimer home.

Don Larson and a friend visited in West Point Thursday evening and attended the teachers convention in Norfolk.

Mr. and Mrs. Don Larson, Lyle and Linda spent the weekend in Sterling, Kans., where they visited their son, Larry, who is a freshman in college there. Mr. and Mrs. J. A. Larson stayed at the farm home.

There were many pheasant hunters here this weekend and a few birds were available.

Mrs. Fred Harpster spent a few days at the home of her mother in Ewing the last of the week.

Sunday morning the ice was quite thick on water here.

Compicking is in full swing. Yields are good in most places. One reported 80 bushels per acre on irrigated land.

Mrs. Alice Lodge is visiting relatives in Grand Island.

Mr. and Mrs. Stanley Bartak visited the Carl Bartak home in West Point one day last week.

Mrs. Henry Reimer and Elaine attended teachers convention in Norfolk Thursday and Friday.

Mr. and Mrs. Wayne Knowles visited the Bud Bartak home and went pheasant hunting Saturday.

Mrs. Foster Filker is visiting her daughter, Mrs. Eestrom, and family in Los Angeles, Calif.

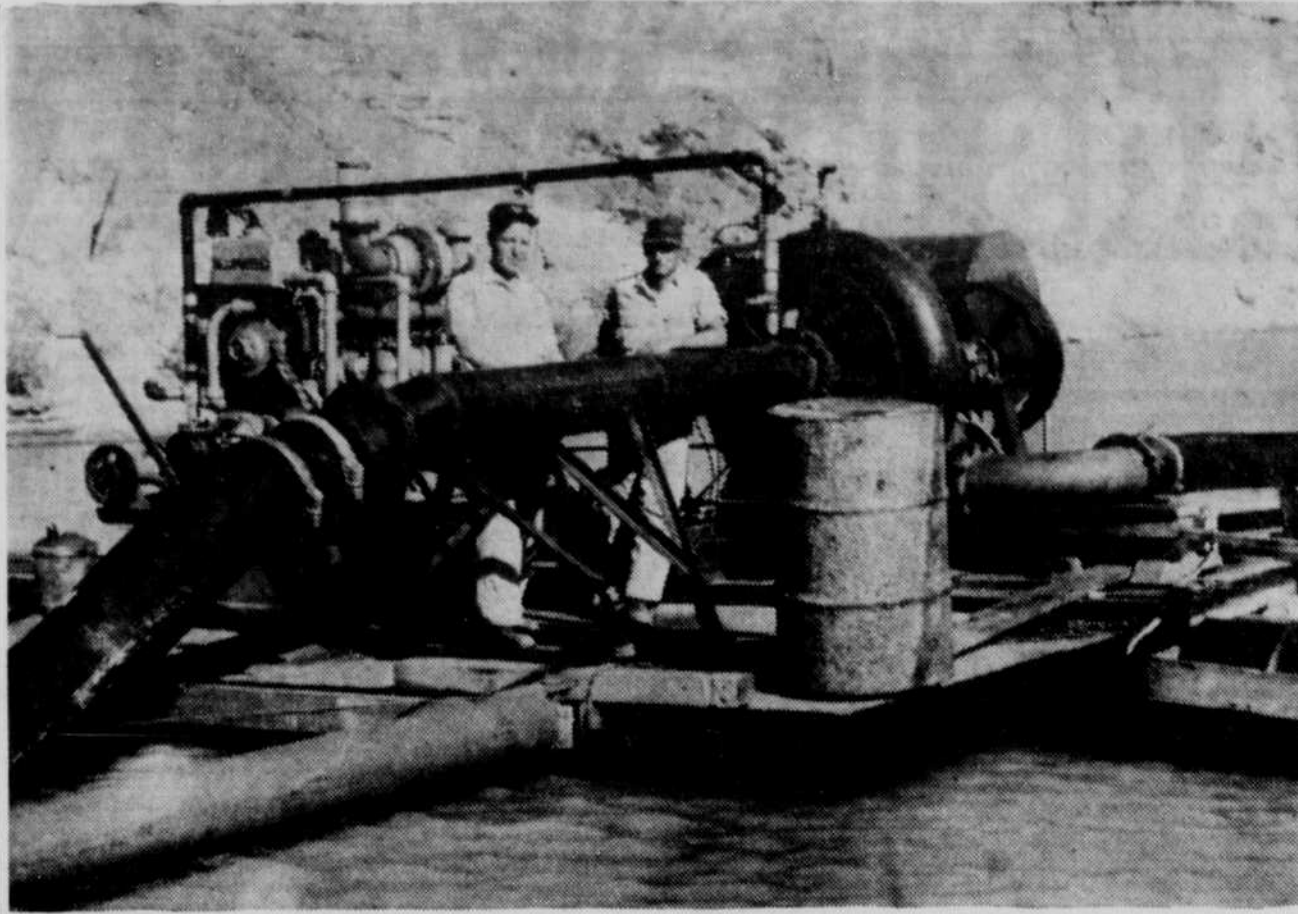

Most of the dial phones have been installed and the service has been excellent.

Mr. and Mrs. Earl Schunk and family are visiting Mr. and Mrs. Roland Schunk and three children in Denver, Colo. Mrs. Gilbert Olson and baby daughter, Gina Elizabeth are visiting at the home of her parents, Mr. and Mrs. Frank Urban.

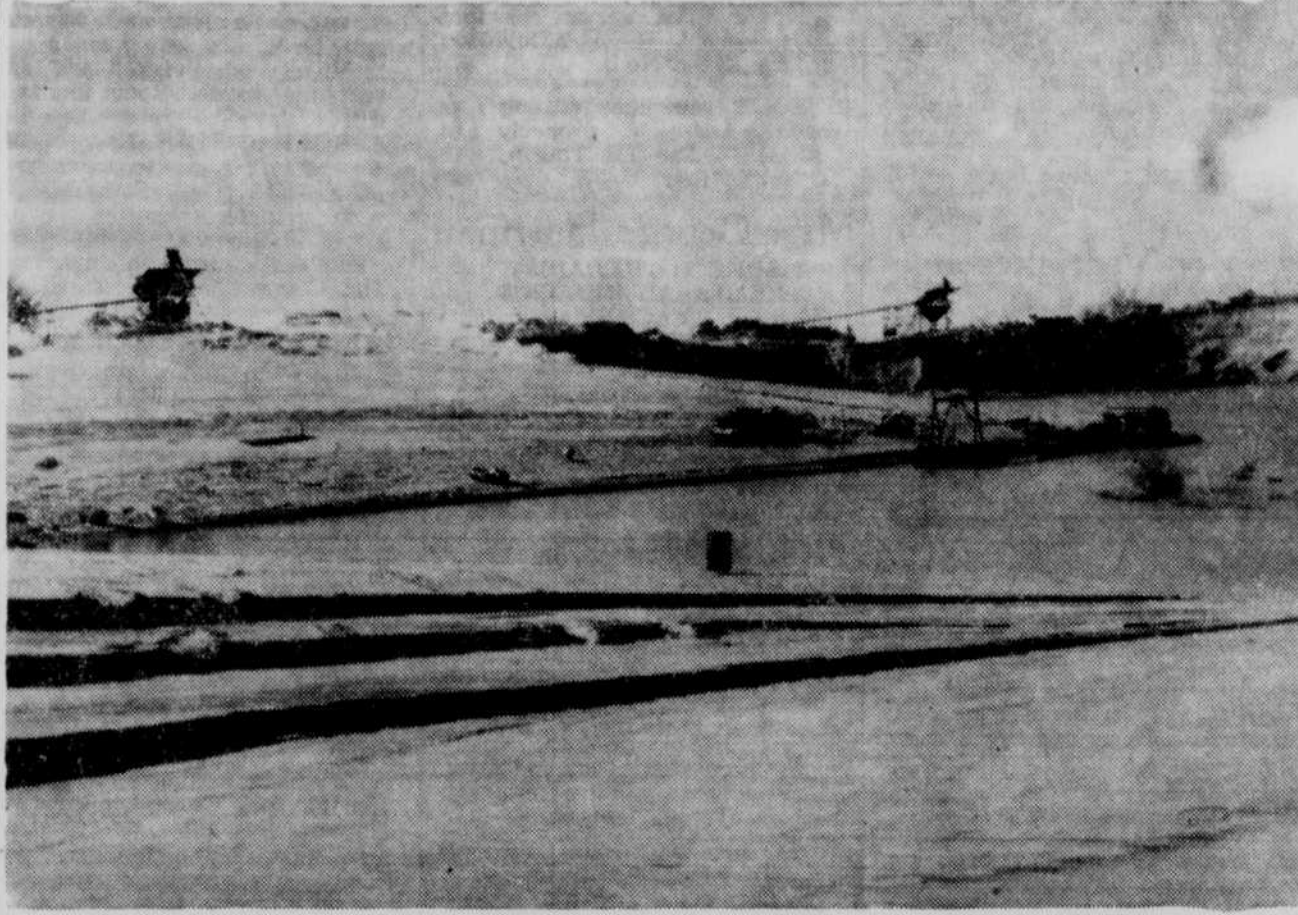

Mr. and Mrs. Carl Bartak of West Point visited Mr. and Mrs. Stanley Bartak and sons on Sunday.

Mr. and Mrs. Pat Burke called at the Glenn Harpster home on Friday evening.

Mr. and Mrs. Leonard Larsen and Mr. and Mrs. Ralph Tomjack visited Reimers last week.

Closeup of the new 310-hp. diesel pump purring away in Ewing's big gravel pit. Pictured are Willis Rocky (left), Continental Oil company diesel fuel supplier, and Allan Pollock, owner of the firm.—The Frontier Photo.

Deep lake, white sand beaches and precipitous hills form workshop for new pump (center) which forces sand 400 feet up into hopper (extreme left). Trucks are loaded in matter of seconds.—The Frontier Photo.

310-Hp. Diesel Installed—

New Pump and 'Low-Grade Gold'

EWING—A brand new 310-hp. diesel engine is sucking gravel from the depths of a big pit northeast of town and is pushing the stuff on a stiff incline 400 feet into a hopper.

Allan Pollock, owner and operator of the Pollock Sand & Gravel company, says the new machine nearly triples output of this miniature Grand Canyon pit that is owned by Sis Ebensgaard.

Two other pumps are situated at opposite ends of the lake that has been created. The lake is bounded on the west and north by precipitous hills. Water in the lake is at the same level as the Elkhorn river, which lazily winds several stone's throws away.

The whopper engine is said to be the biggest of its kind in a big area and its output of gravel, brought to the surface through a 10-inch suction line, is enough to satisfy much of the sand and gravel appetite in Holt, Wheeler, Antelope counties.

"Biggest users of gravel," according to Pollock, "are the county governments who use the sand and gravel for highway work".

Pollock purchased the firm from John Walker, now of Norfolk, about seven years ago. At that time there was one pump—a 100-hp. unit. Later Pollock added a second pump of the same capacity. Comes now the big new diesel that keeps a fleet of trucks busy.

The suction pipe is controlled by a winch and cable which enable it to probe the bottom of the lake. The pump is operated by centrifugal suction, which brings the material to the surface and forces it up the eight-inch discharge pipe to the bin where most of the sand is eliminated through a screen and the gravel is dumped into trucks.

The bin elevator is 94 ft. above the pump.

The site is a veritable beach of white sand with "mountains" of the stuff on several sides.

The lake covers about 25 acres and, naturally, there are many deep holes. In many places the lake is up to 50 ft. deep.

Pollock gets the jitters when trespassers come around on this leased property. Sandpits are dangerous and are positively no good for fishing, swimming, boating, or what have you.

Especially hazardous in the area is quicksand.

The pumps float on improvised pontoons supported by sealed oil barrels.

The pit currently is producing from eight- to 10-thousand-cubic-yards of gravel per month.

Both smaller units have six-inch suction pipes.

A manganese steel dredge is part of the equipment.

Pollock's helpers and drivers are Charles Krumtorf, Kith Gibson, James Bois and Dick Wright. Most of the summer Archie Tuttle has been on the crew.

Pollock thinks the sand and

gravel would be comparable to low-grade gold in such a market as Southern California, for example.

"But the freight rates make it difficult to compete on shipping out there," he explains.

Mr. Pollock and his wife have a daughter, Miss Patsy, who is a student at the University of Nebraska.

(A tape-recorded on the scene interview with Mr. Pollock, conducted by Ben Bolt, will be heard on Saturday's "Voice of The Frontier" program, WJAG, 780 kc, 9:30 a.m.)

Muny Skating Rink Being Constructed

A skating rink is being readied on East Clay st. between Fifth and Sixth on residential property owned by Fred Saturo. The rink will be suited north from the Methodist church and parsonage.

The city park board is making arrangements to have the dikes built and lighting facilities installed.

In previous years the city's rink has been located on the northeast outskirts on idle property owned by the O'Neill city schools. Meanwhile, that site is being transformed into an athletic field complete with track and tennis space for skating.

Selma Trainey was in Sioux City this week.
