**When Buying Diamonds . . .**

In our search to scientifically standardize our diamond grading we have arrived at an accurate, never-varying grading which assures you a constant standard of quality.

Our system of diamond grading is fundamental. There are gradations of color (not counting the fancy colored diamonds) AA, A, B, C, etc. There are, also, ten degrees of internal perfection—0, 1, 2, etc. It is the COMBINATION of these other factors—plus cutting—proportion and size—that determines the dollar cost of any one particular stone. . . . This meticulous grading is YOUR protection. You must know exactly what you are getting—regardless of the particular grade "it appears to be" . . . whether it is tomorrow or next year. Few others can make this statement.
