

The Frontier Woman . . .

Winter's Sewing Unfinished

By BLANCHE SPANN PEASE

Housecleaning time has rolled around again. But cleaning the refrigerator interior has to be done every few days. Don't use soap and water but dissolve three tablespoons of baking soda in a quart of warm water and this makes a cleaning and deodorizing method of cleaning the refrigerator after defrosting.

When you scorch food, fill the kettle with hot water and add soda to it and let it soak a while. To go back to the discussion of refrigerators, defrost your refrigerator frequently. The longer you let it go, the harder the motor on the refrigerator has to work and the less satisfactory is the refrigerator. Your refrigerator works much more efficiently if you defrost it every few days.

Do you use a cellulose sponge in your home? At our place, we have several. I use one for washing dishes and never have to launder dishcloths any more. The sponges can be easily sterilized with boiling water. They get into crevices better than a dishcloth and are also fine for applying paste silver polish to silverware, when that task has to be done.

I much prefer a sponge to a cloth when washing walls, woodwork or anything of that sort. It does a better job and getting water out of it is as simple as a squeeze.

Using two, one in my washing solution, and one in a rinsing solution simplifies and hastens cleaning considerably. Do you have a sponge mop for your kitchen linoleum and for other floors that must be mopped? Mine is one that requires no stooping and which wrings by a simple patented process which doesn't require putting my hands in the water. I have used the same cellulose sponge that came with it for two years now, so if properly taken care of, they last a long time. I have an extra which I use to put in the mop to wipe the kitchen walls.

Dear Friends:
What is your latest project? Or do you have more than one started like I do? Sewing, cookies, cacti, new recipes, and cub scouts?

I am in the midst of spring sewing—or pardon me—some is to finish winter sewing such as flannel pajamas. I must sew some for summer before I put the pattern away. Of course, I'll have to allow for the length of those growing legs.

This reminds me of an incident which happened just before Christmas. I was cutting off Cheryl's floor-length dress. When she put it on I said, "Just look how those feet and some legs stick out. Looking very serious she said, "Of course! When you made it for me, I was four and now I'm five." Scarcely three

months had elapsed, but a birthday is so important to a child. How many boys bake cookies? My 10-year-old is trying his hand at it now. He baked enough for all in his room for valentines, using my cookie press. We had some for supper and they were good. You wouldn't think he'd have a chance with so many sisters, but the two older boys baked cakes, pies and doughnuts, too, so suppose he'll be graduating from cookies soon.

I have started a cacti collection by exchanging with a neighbor. I like them while they are tiny, don't know what I'll do with them when they outgrow my narrow window sills. Edith also gave me half of her package of cacti seed. Needless to say, I look every day and don't know what I'm looking for!

I made a resolution to try some new recipes. I tried one today for cake mix. It makes enough for four cakes and is really good. It calls for cake flour and I'm going to try all purpose flour next time. In a large roasting pan I put: Five cups sugar, eight cups cake flour, four teaspoons salt, ¼ cup double acting baking powder, two cups shortening.

These were mixed with an electric mixer at medium speed until of the consistency of cornmeal. I put ¾ cups in each of four one-quart jars, screwing the lid on firmly. Put in cupboard.

When you want to make a cake, put 3½ cups mix into a bowl. Combine ¼ cup milk and 1½ teaspoons vanilla. Add half of the liquid to cake mix, beat two minutes at medium speed (300 hand strokes). Add remaining liquid and two eggs. Beat two minutes more. Bake at 375 F. about 25 minutes in two round eight-inch layers.

I have been a cub scout den mother for a year now and enjoy the meetings. Sometimes the boys are extra noisy and then I don't wonder that bears hibernate.

Best wishes to everyone,
MRS. G. L. OBERMIRE

If you're tired, don't drive. Fatigue is one great cause of accidents. Many a driver has gone to sleep for good at the wheel. Slow down for curves. Accidents are hard on the nerves.

The bride, given in marriage by her father, wore a white ballerina-length dress made with a lace top and net skirt with lace panels. The Eton jacket was of lace and a jeweled tiara held the fingertip veil of bride's illusion. She carried a bouquet of white gladioli.

The matron-of-honor wore a dress of Chinese red net over taffeta made ballerina-length. She wore a white satin beret and carried a bouquet of white carnations.

A reception followed. Miss Jane Pruniski, sister of the bridegroom, was in charge of the wedding cake and Miss Jean Ann Pratt was at the punch bowl. Mrs. Thomas Moore was in charge of the bride's book. The couple left for a wedding trip to New Orleans, La., and are now living at 212 Plainview Circle, Park Hill, North Little Rock, Ark.
