**4400 FARMERS KILLED  
300,000 INJURED**

## DON'T "CULTIVATE" ACCIDENTS ON YOUR FARM

A field half plowed—a furrow left unturned—work stopped by accident!

To the farmer, working against time and weather, delay can mean the difference between a crop and no crop, a good year or a lean one. So accidents have no place in his schedule; they cost money, delay production—and the growing season keeps rolling along.

Yet, farming ranks third most hazardous in eight major industries. Think of it, while the death rate for all industry is 29 per 100,000 workers, in agriculture it is 55 per 100,000! One farmer in every 15 is injured on the job! Total—4400 killed, 300,000 disabled by injury every year.

The wise farmer knows where his hazards are—and avoids them. Falls, machinery and animals account for most accidents down on the farm. Their annual cost—\$75,000,000. Yet, they're so easy to prevent. Just a little caution is all it takes.

Don't "cultivate" accidents and losses! Instead, "cultivate" safety and success!
