Beauty Routine Starts With Old-Fashioned Cleanliness

Jean Simmons, whose hands are important to her both as an actress and as a woman, bleaches them with lemon before applying rich cream for smoothing them.

OLD-FASHIONED beauty tricks are often the best, according to Jean Simmons, well-known British film actress, who strives toward natural loveliness rather than sophisticated glamor.

Although her beauty routines are simple ones, she doesn't overlook the importance of regular care. She stresses that the basis of good looks is—first of all—cleanliness. Hair should be frequently washed, shining, well-brushed. Faces should be thoroughly cleansed before make-up is applied.

It's important, she continues, to concern yourself with beauty as a whole. Hands are too often neglected, she feels.

SHE suggests this routine for keeping them always ready for the spotlight of unexpected attention. Slice a lemon in two and rub the cut half over your hand. This will aid in bleaching, and in giving your hands the milky look toward which current fashion is trending.

To make certain they are smooth as well as white, she advises the use of a rich hand cream. Use this regularly before retiring, and supplement its good work during the day with a non-sticky hand lotion. Apply the lotion, after drying, to restore the oils that are lost when your hands are dipped in water.
