Simplicity Steals Show in Home Decorating Dramas

BY EDNA MILES

ELEGANT simplicity is the keynote in today's decorating themes. There's nothing stark or barren-looking about traly modern room settings, only a clean-cut, dramatic look as the designs of furniture and fabric are allowed to take the spotlight instead of gew-gaws.

The unfurnished-barn look that some faddish modernists achieved in the early days of functional furniture is out, too. Upto-date decorators-amateur and professional-are striving for the warm, home-like interior of grandmother's days-minus the

If you're dissatisfied with the old-fashioned look of your home, the first step is not the tossing out of every piece of furniture you own-as many homemakers sometimes would like to do-but the elimination of accessory furnishings that don't actually add anything to the general decorating scheme.

Ranking high among these are unsuitable wedding presents, such as lamps, vases and candlesticks, which many homemakers wrongly feel they must keep on display for all of their married lives.

When choosing new pieces for your home, determine in advance just what effect you'd like to achieve. This is particularly important when your furniture must be bought piece-meal—a chair this month, and a table later when the budget gets padded again.

It makes no difference what period or type furniture you select, so long as you keep it consistent. Don't mix traditional furniture with abstract sculpture, for instance.

Whatever your choice, make sure not only that the piece is pleasing to the eye, but that it will make living easier for you as well. This is the secret of good design.
