## Loretta Berry Weds Linden Mulford

STUART—Miss Loretta Berry, daughter of Mr. and Mrs. William Berry, of Rogersville, Mo., and Linden Mulford, son of Mr. and Mrs. Charles M. Mulford, of Stuart, exchanged marriage vows Sunday, August 12, at 2:30 p.m., at the Elm Grove Methodist church near Rogersville.

The double-ring ceremony was performed by Rev. Orin Graff, of Stuart.

Mrs. Kate Smith was soloist, accompanied by Mrs. Kennedy, who also played the wedding march.

The bride, given in marriage by her father, wore a white strapless marquisette gown, fashioned with a full gathered skirt and a jacket of white chantilly lace.

A fingertip veil was held in place by a crown of orange blossoms. She carried a white Bible and corsage.

The maid-of-honor, Miss Laura Mulford, sister of the bridegroom, wore white marquisette over green taffeta with a corsage of pink gladiolus.

The bridegroom was attended by his brother, William Mulford. They wore dark business suits.

The mothers of the bride and bridegroom wore navy blue dresses with white accessories.

A reception was held at the home of the bride following the ceremony. Miss Helen Larson was in charge of the guest book.

Mrs. Mulford graduated from the Stuart high school with the class of 1950 and taught school last year.

Mr. Mulford graduated with the class of 1948 and attended state agricultural college at Lincoln 2 years.

The couple will reside 14 miles north of Stuart where the bridegroom is engaged in farming with his father.

## JOHN DEERE Truss-Frame Design means Rugged Strength with Extra Clearance!

Rugged strength and ample clearance—two plow essentials for fast, deep plowing behind today's more powerful tractors—are two outstanding advantages of John Deere Truss-Frame Plows.

John Deere Truss-Frame Plows stand the gaff because the shocks of hard work are distributed over the entire frame, instead of being concentrated on a single member. There are no curved beams . . . but instead straight frame bars, bottom standards, and cross-bracing . . . all heat-treated and rigidly held together by heavy steel truss brackets.

There's greater clearance because Truss-Frame Design opens up the entire plow frame . . . to permit deep, steady, fast plowing in trashy fields where plows of less clearance would choke up repeatedly. Ease of adjustment, operation, and servicing are added "plus" values. See us for complete details.
