### Pairieland Talk

(Continued from page 2.)

ors—and jiggers—are not seen but they can't be ignored. My little saddle horse used to get impatient when he heard the shuffling of ears of corn. Daughter-in-law's mother came up from the Fillmore county farm a day last week, bringing her bushels of sweet corn. So mother and daughter got busy cooking and cutting the corn from the cobs, packing it for storage in the freezer. It was a day's job. Now when the odor of that cooking corn came to my attention as I sat at the typewriter the urge was irresistible, my spellbound feet being drawn to the vicinity of the steaming kettles. Like that saddle pony when he was tressed a few ears of corn, the urge met its gratification in the consumption of a yellow roasting ear. And that corn in the locker holds promise for the future.

If you saw him running the length of Douglas street twice every morning you would regard him as a nitwit. A gent by the name of Parry started such footwork for himself in 1901. Now at 73 he has 36,500 miles to his credit, a good pair of legs to show for it and outwinds a horse.

Harold was at the steering wheel. His wife, my daughter, sat by his side and from time to time would say, "Turn right, turn left. In Cincinnati a wrong turn was made. Bewildered but not cast down when a police patrol came to the rescue and escorted us, not to jail, but onto the right trail. The highway patrolmen constitute an outfit that gets too little credit for their services.

Capt. Charles Blair made the flight over the North Pole from Barduf, Norway, to Fairbanks, Alaska, in 10 hours and 20 minutes. Of the 865 gallons of fuel with which he started there were 175 gallons left when the Mustang landed.

The U.S. Leather company, a going concern for 58 years, has folded up. Leather substitutes and the cost of hides explain it.

The MacArthur incident is not yet closed. Neither is the Korean war.
