L. L. Cornell O'Neill Electric Shoe Shop

It's the soles of the people he keeps in view,
For he is the doctor of boot and shoe;
He serves the living and not the dead
With the best of leather, wax, nails and thread.
He can sew on a sole and make it fast,
And do a good job and make it last.
A great many patients come to his door,
Worn out and run down, besides feeling sore;
Though he doesn't use poultice, plaster or pill,
He cures sick shoes, no matter how ill.

This little ditty refers to the shop that has the latest electrical machinery and which guarantees satisfaction.

Something Besides the Butter and Egg Money

Start a Fordson tractor working for you now—and before Spring, the savings and profits that you realize from custom work or work on your own farm will have mounted to a worthwhile figure.

Wood-sawing, grain grinding, shredding and numerous heavy hauling jobs are some of the ways in which hundreds of Fordson farmers are making otherwise unproductive time pay during the winter months.

And from the time you start your spring plowing, right through every season and stage of growing and harvesting your crops, you are assured of abundant and dependable power that will do each job in less time and with greater economy.

Next time you are in town just drop in and let us talk over with you our plan that makes it possible for every farmer to own a Fordson.
