

Starts Instantly!

This Instant Light Preheater now on all models

Coleman Cookers

Make their own Gas

This new Coleman Instant Light Preheater is one of the most remarkable inventions and improvements ever put on any type of liquid fuel stove. It does just what its name implies—lights instantly. All you have to do is touch a lighted match to it, open a valve and its going right now. In less than a minute from the scratch of the match, it generates the stove to full cooking heat—any amount or degree of heat you want for any kind of cooking.

You don't have to preheat this starter with a couple of matches or with a torch—no generating of any kind. It starts going the minute you scratch a match and turn a valve or turn a valve and scratch a match—either way you do it is right—you can't go wrong—you can't flood it.

There are starters and starters but there is none like the Coleman. It's different, new and original. It's on all models of Coleman Cooker Stoves—from the beautiful white porcelain enamel range, clear down to three-burner black enamel hot plate. Come in and see it work.

HAROLD LLOYD in "SPEEDY"

—a comedy comet! Up, up, up—another rocket of roars when big Harold Lloyd gets into action and there are no limits for "Speedy."

LOCAL NEWS.

Harry Bowen reported at 1:15 today that 58 inch of rain had fallen last night and today, Tuesday night .16 inch fell.

James Pinkerman experienced some difficulty in making the detour near the cemetery Wednesday evening and as a result his car was considerably damaged.

Ruth Scott, as "Ethel," will have for a husband, only the man who has "sowed his wild oats." Come to "The Whole Town's Talking," and see what she gets.

SCHOOL NOTES.

Second Grade—In a test on "Following Directions" the following received 100 percent: Elizabeth Graves, Alice Saxsmith, Margaret Wyant, Nadine Kilpatrick and Robert Hancock.

Fifth and Sixth Grades—The attendance of the fifth and sixth grades has been 100 per cent for the past month. The fifth and sixth grades are taking up the study of birds in their Nature Study. The classes are very much interested in watching the different kinds of birds during their spare time.

Eighth Grade: Marjory Britell and Donovan Martin led the class in Thursday's Arithmetic. Max Ballard received a letter from Bulgaria which was much enjoyed by the class. We have taken up the study of physiology and hygiene in lieu of reading and drawing in place of penmanship. In a lesson in bookkeeping Monday, Geraldine Madison, Marjorie Gillespie, Delmar Spangler, and Hulene Abercrombie had the neatest papers. Clarence Saunto and Donovan Martin earned 100 per cent in a lesson in mental Arithmetic, Tuesday. Marie Williams, Clarence Saunto and Garland Bressler had a perfect English lesson Wednesday.

EDUCATIONAL NOTES.

The County Superintendent with the winners of the Holt County Spelling Contestants drove over to Mitchell, South Dakota, on last Thursday, April 26, to enter the Inter-state Spelling Contest. Ninety contestants representing the best spellers of South Dakota, Minnesota, Nebraska, Iowa and Missouri took part in this contest. They were accompanied by Miss Elizabeth Schelkopf, County Superintendent of Fillmore County, who drove to O'Neill the day before with her contestants. While we did not bring home the honors, Holt County may well be proud of her spellers, since they stayed up until very close to the last. Each of our contestants received a certificate as a Perfect Speller. In this contest Clay County, Nebraska, won first place, Douglas County, Nebraska, second and a county in South Dakota, third.

The grades have been sent out from the first Eighth Grade Examination. If any pupil has not received a grade in any subject in which he took the examination, will you please write to this office immediately. The second examination will be held on Thursday and Friday, May 10 and 11.

A new project is being tried out in the Normal Training classes of the county this year. Graduate Normal Trainers are being placed in the rural schools to do actual teaching for several days under the direct supervision of a good teacher. St. Mary's and the O'Neill Public School Normal Trainers were out last week. They report a very profitable week spent. We feel that this will give the graduate actual experience and bring them into direct contact with the problems which they must meet later. This plan has been tried out very successfully.

District No. 56, Miss Hendricks, teacher, held a rather unique program and pie social last week. The program was put on by the patrons of the district instead of by the school children as is the general rule. Each adult member of the district took some part. There was a large attendance and everyone reported a good time. The proceeds, which netted \$14.00, will be spent for gas light for the school.

The districts of Sand Creek precinct are planning a program consisting of a Declamatory Contest and a Spelling Contest to be held on Friday evening, May 4th at the Celia School House, District No. 74. All schools in this precinct are entering these contests. The patrons are much interested and it promises to be a very successful undertaking.

The county eighth grade examination in history will be given on Friday morning instead of Thursday afternoon as the schedule shows. County Superintendent.

Don't fail to see Hugh O'Donnell, as "Chet Binney," set "The Whole Town Talking," at the K. C. Hall, Monday, May 7th.

CALIFORNIA AND RETURN BY AUTOMOBILE

On December 15th, R. H. Parker and J. L. McNabb pulled the anchor and started in the Parker Sedan for Long Beach.

The thermometer showed about zero and snowing some that morning and many people thought we would not get to first base, and asked that we send back an S. O. S. when snowed in.

We took a direct South route down through Kansas, into Oklahoma. After visiting a day in Oklahoma with some relatives of McNabb, we started through Texas and on to El Paso on the Border line between the United States and Old Mexico.

We crossed the Rio Grande River into Old Mexico and spent a day and some money in Juarez, commonly known as Warez, Old Mexico.

After leaving Texas, we went through Deming, New Mexico, and followed the Border line between the United States and Old Mexico through the State of New Mexico and into Arizona.

Near Phoenix, Arizona, we visited the Roosevelt Dam, which I think is the largest irrigation dam in the world.

We drove across on top of the dam and this dam is about 300 feet high or three times as high as our water Stand pipe in O'Neill.

The road over the top of the dam might be considered dangerous by some, but we drove it with ease, although Jim had one foot on the running board ready for a jump.

Going down the West Slope of the Rocky Mountains we shut the engine off and let the car coast, using the brakes occasionally and we coasted nine miles in one stretch.

We were too far south for snow and road conditions were very good along the Southern Border of the

United States.

When in Phoenix, Arizona, we visited some O'Neill, Nebraska, people.

We passed through Yuma, Arizona, and Yuma has a record of being the hottest place in the United States, and it takes a long thermometer to register the heat. I once saw the heat at 120 degrees, and they say it reaches 150 degrees.

Water in the radiator of an automobile would boil with the car parked at the curb.

Leaving Yuma, Arizona, we entered California through the Imperial Valley, a wonderful irrigated valley. Then on to San Bernardino, Los Angeles and Long Beach.

We were fourteen days making the trip to California.

Reached California in about 2500 miles travel.

On our road we counted more than 40 automobiles along the highway that were total wrecks, either from collision or falling off the road, and sometimes the fall is nearly half a mile down the side of a mountain. Some cars catch fire while running, and burn on the highway.

We also saw one aeroplane that was a total wreck close to the highway.

After reaching California, we toured California for some time. McNabb landed a job at about \$10 per day and decided to remain, and who could blame him; and besides all of that, there was a girl with a large Sedan showing him around so much that I seldom got to see him during the last thirty days.

After being in California about four months, I started for good old Nebraska, and another Nebraska real estate man with me.

Left California on April 11th and took nineteen days in driving back and making side trips.

Visited Grand Canyon, which is one of the seven Wonders of the World, and where one can look a mile and a quarter down to the river below, and where it takes a seven-mile trip on a burrow to ride down to the river.

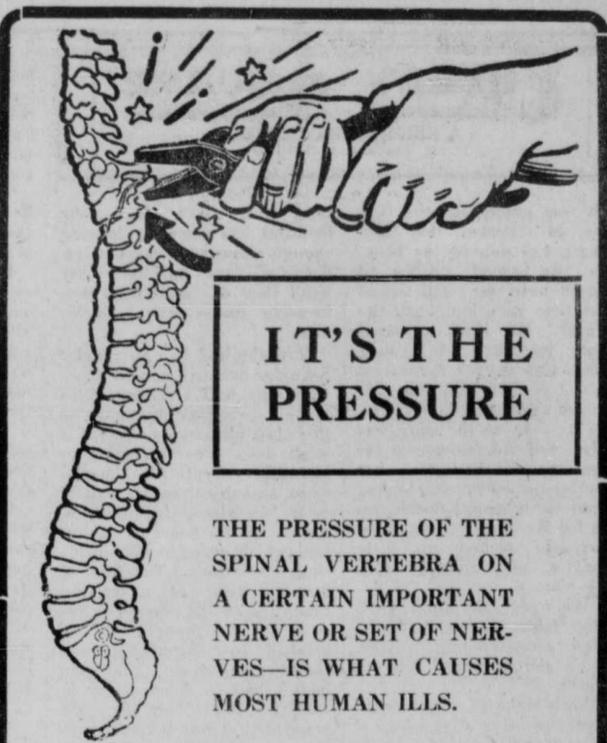

After visiting the Grand Canyon, the next scenic place was the Petrified Forest of Arizona. Two days was spent there and I have some nice specimens of the petrified trees in my office.

Then into New Mexico, stopping at Albuquerque, and Santa Fe.

Town of Santa Fe is very ancient, its early history dating back to Spanish Grants and a great curiosity is the early Spanish Missions, established nearly 350 years ago, when the Priests built Missions to civilize the Cliff Dwellers and other tribes who existed then but are nearly extinct now. A great many of these landmarks still remain.

Santa Fe was inhabited and these Missions built and conducted long before Nebraska was a State.

In coming over the Continental Divide in the Rocky Mountains the elevation raises up to about 9,500 feet and the clouds come right up and

IT'S THE PRESSURE

THE PRESSURE OF THE SPINAL VERTEBRA ON A CERTAIN IMPORTANT NERVE OR SET OF NERVES—IS WHAT CAUSES MOST HUMAN ILLS.

Chiropractic Adjustments of the spine will relieve that pressure! It has done wonders for others and it will help you, too.

Call on us for an examination and further information.

Dr. C. H. Lubker

kiss you, and as they pass along leave considerable snow; we found it best to pull out on one side of the road when a cloud hits us and wait until it passes over to avoid running into some other car. These clouds are filled with wet snow or heavy misty rain and you can not see ten feet ahead until they pass over.

Entered Colorado over the Raton Pass which is very beautiful. Highway is elegant through Colorado, and scenery is beautiful around Colorado Springs, Pueblo and Denver, then we traveled east into Nebraska and on homeward.

Made the return trip in about 2300 miles.

R. H. PARKER, O'Neill, Nebr.

Amelia Saunto as Letty Lythe, the movie queen, almost finishes things for "Chet," in "The Whole Town's Talking."

A tonic for every motor — More Power and Smoother Operation

RED CROWN ETHYL GASOLINE gives every motor a higher range of power for hill climbing, for responsiveness in traffic or when you want to jump past the car ahead. Deep mud, loose sand or hard going of any kind can't make your motor knock.

This new and improved fuel acts like a tonic. There is, nothing like genuine Red Crown Ethyl Gasoline for power and economy, whether your machine is new or half worn out.

Carbon doesn't cause knocks, because the higher the compression is, the better Red Crown Ethyl Gasoline works.

It is always reliable, quick starting Red Crown Gasoline combined with Ethyl Brand of Anti-Knock Compound—a matchless combination for power, speed, quiet operation and economy.

Sold by reliable dealers and at Red Crown Service Stations everywhere in Nebraska.

"Knocks out the Knocks—turns carbon into power"

MILESTONES on the Pathway of Telephone Progress!

Each improvement made in the telephone since Dr. Alexander Graham Bell invented it in 1876 has been a forward step on the pathway of telephone progress, reflecting the development of the entire telephone art.

More than 100,000 other individual parts of the telephone system have had to keep pace with the telephone instrument to make it possible for you to call anyone of the more than 17,500,000 telephones throughout the United States.

With these improvements has come increased use of the service until now more than 70,000,000 telephone conversations are held in this country each day.
