The fly's mouth and tongue are covered with fine hairs. Consequently some of the filth in which they mess clings to them. And the microscope discloses these tiny drops of unspeakable uncleanness alive with bacteria-disease germs. A fly may infect anything it touches. Milk, food, baby's eyes, open wounds are favorite sources of infection. But with FLY-TOX a house can be kept free of flies and similar insects. FLY-TOX is fragrant, stainless. FLY-TOX is harmless to humans but sure death to flies, mosquitoes and similar disease carrying insects.—Adv. 5-1
