Mercury for 1960 is both distinctive and functionally clean in design. The car's soft, smooth ride is the result of the blending of body, frame, suspension, engine and transmission into a completely road-tuned car. Two-barrel carburetors increase economy of the low-friction V-8 engines. Two of the engines offer added economy by using regular gasoline. Mercury's spacious interiors with lowered transmission and driveshaft tunnel afford comfort for six passengers. Thirteen models in four series, all on 126-inch wheelbase, are available. Pictured is the Montclair four-door cruiser (hardtop).
