New School Building For O'Neill

It is a fact that O'Neill needs more schoolroom. However, it seems that plans are being made to buy land without determining what the majority of the people need and want. Present plans indicate an intention to locate the new school at the far Northeast corner of the city on the old Fairgrounds. No consideration has been given to the location of a grade school in the South Central part of the city to relieve the situation.

A majority of the children are in the South Half of the city, and are and will be forced to travel an unreasonable distance to a new school. A count of numbers and location of grade school children should be taken.

Plans contemplate the expenditure of \$25,000 or \$30,000 for additional land. Adequate sites can be obtained in the South part of the city with this money. Present plans also contemplate a cost of near \$500,000 for a new High School. A grade school building could be built at much less cost to provide the additional room. The City of Norfolk with a population of 11,335 has eight grade schools distributed throughout the city. A proposal has been considered to run busses into the south part of the city. A better solution would be to locate the school more conveniently. O'Neill has no school lunch program for the small children. They have to come and go four times a day.

The responsible officials should consult the people and determine what is best for O'Neill. Through the medium of a public meeting.
