Long Pine, Neb. May 2, 1960
Public Pulse
To Whom It May Concern
As members of the Long Pine school board we are considering the installation of a fire alarm system which is compulsory by the state. This installation is to be completed by the fall term. The state of Nebraska, being the only state making this a law for such a system by forcing the school boards over the state to spend some eight million dollars of tax payers money, is making a burden on all school districts. No locally contracted installation has been approved to date by the state. Is this a political graft??? Long Pine School Board Norman Johnson, Secretary
