# What's that 3rd pump doing at Conoco?

Answer: to provide you with the right gasoline power at the right price for your car! Which Conoco grade should you use? How can you tell? Conoco answers these and other 3-grade questions below.

**Q.** Why is Conoco offering a choice of 3 grades of gasoline?

**A.** To meet the power needs of today's wide range of cars. Only with 3 grades can you be sure of no wasted octane, no wasted money... paying only for power your car needs.

**Q.** How can I tell which Conoco grade is for me?

**A.** Listen to your car! Start with Premium. If it doesn't knock, you may be able to use Regular. If it does knock on Premium, step up to Super Premium.

**Q.** What is this new Super Premium gasoline, anyway?

**A.** It's Conoco's highest octane gasoline (101 plus!), especially made for today's top-horsepower, top-compression cars.

**Q.** My car works fine on Premium. Why use Super Premium?

**A.** Don't! If your engine doesn't knock on Premium, save your money! Fact is, Conoco's new Premium actually saves you money!

**Q.** What's the plus in TCP plus stand for?

**A.** For Conoco 4051—a specially developed additive that oil-plates rings, valves and cylinders with a tough shield of lubricant.

**Q.** My car used to run fine on Regular, but now needs Premium. Why?

**A.** As cars get older, carbon deposits build up. This increases your engine's compression ratio and the need for a higher-octane fuel.

**Q.** Will high-octane gasolines such as Super Premium and Premium burn out my valves quicker?

**A.** Just the opposite! A knock-free engine actually runs cooler!

**Q.** Are all Conoco stations in my neighborhood featuring 3 grades of gasoline?

**A.** Not just yet. All 3 grades are available only at Conoco Stations displaying this sign.

**Start to save today... the 3-grade way... at CONOCO**
