Mrs. Leonard Jungman spent Monday afternoon visiting Mrs. Robert Batenhorst in Stuart.

## Report from Washington

By Congressman Dave Martin Fourth District, Nebraska

The Committee for Economic Development this week came up with a startling statement in regard to our agricultural situation and farm program. They declared that one-third of the nation's farmers should abandon agriculture during the next five years. The CED said that such a mass movement of two million farmers into other occupations is needed if surplus agricultural production is to be reduced.

Such a mass movement from the farms would result in a further decline in our economy in Nebraska. Nebraska is fortunate

in that our State and cities are waging a vigorous campaign to attract industry to our State. The number employed in industry over the last few years is increasing at a rapid rate. This takes up the slack from a drop in employment in agriculture and creates new jobs to boost our economy and population.

As this is being written, the House is scheduled to consider the second farm bill presented this Session. It is a continuation of the present feed grains program with out the rigid controls included in the Freeman farm bill which was defeated last month on the floor of the House. My guest is that next year's farm program will be substantially the same as this year's although the vote may be close.

Labor Secretary Goldberg warned on July 16 that the Administration will ask Congress for laws to halt strikes at missile plants and sites, if two unions carry out a threatened walkout on Monday, July 23. I have written to the Secretary advising that such a bill has already been introduced. I introduced such a bill, H. R. 7036, on May 15, 1961, which outlaws any strikes, work stoppages,

or slowdowns at any defense installation. I sent a copy of my bill to the Secretary, informing him that it would take care of the situation if enacted into law.

The Auto Workers and the Machinists are the two unions involved in the dispute. The unions are installing on a union shop agreement, in which all employees must belong to this union, regardless of their wishes. This is the stumbling block in the negotiations. It is unthinkable that irresponsible union leaders would call a strike in view of the urgency of the missile program.

Last week the House passed the foreign economic aid program for the coming year. The Washington Post headlined the next morning:

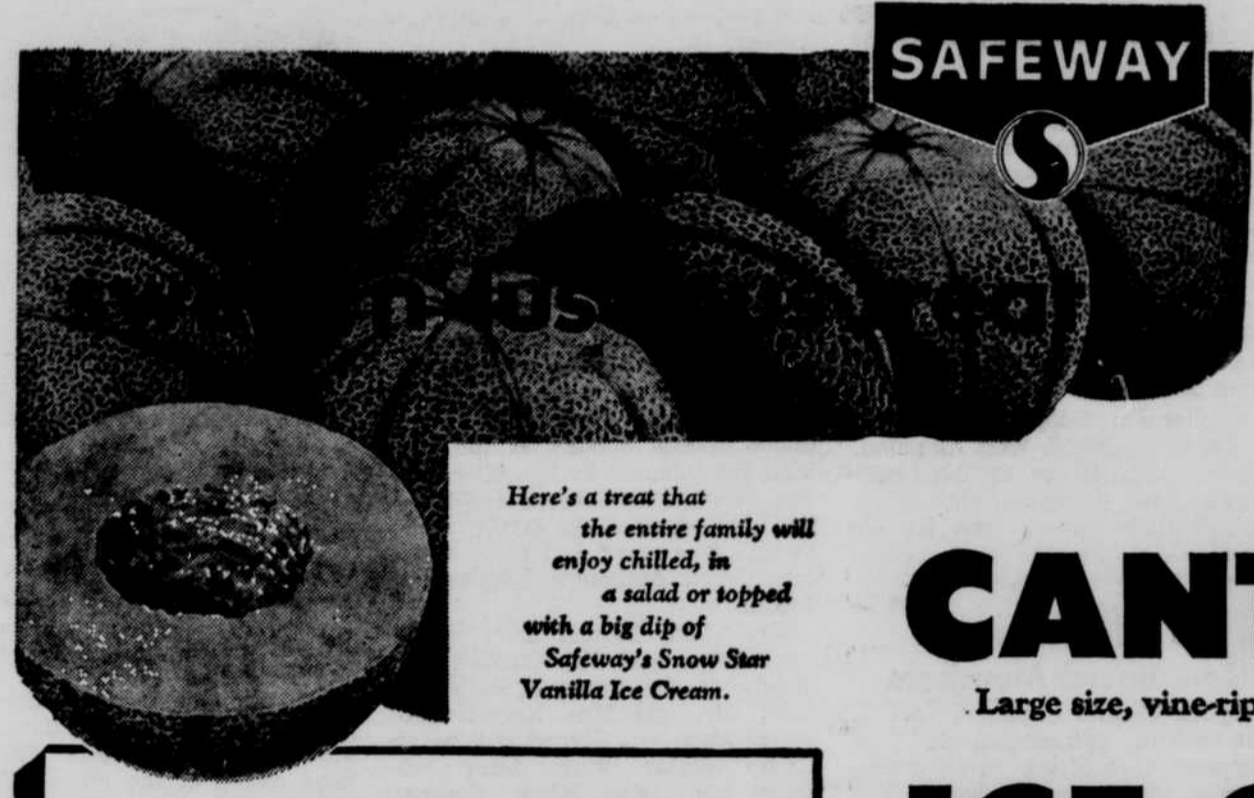

"President Voted Power to 'PRESIDENT VOTED POWER TO AID REDS'"

An amendment was offered on the floor to stop all aid to communist-controlled or dominated countries. This amendment was defeated, and a substitute was passed which states that the President shall decide if giving assistance is in the best interests of

the United States. If he so determines, then aid can be given. Many of us wanted to specifically stop all aid to communist countries and even named the countries in the amendment. This foreign give-away program is ridiculous in itself, but it is incredible when the State Department decides that we should give assistance to communist countries. I opposed this \$4.9 billion program as it is a waste of the taxpayers' money. We are creating more ill-will than good with the continuation of this waste of our resources and wealth.

The Civil Aeronautics Board heard verbal arguments this week on Frontier Airlines' request for a one-year extension to fly the southern and north-south routes in Nebraska. I appeared at the hearings, along with other members of the Nebraska delegation, in support of this request.

This week's Washington story: White House aides reportedly no longer say, "Goodbye Chief" when leaving a conference with President Kennedy; now the farewell is a lusty, "MORE power to you, Mr. President." (Roll Call)
